the true story of a Florida man's attempt to sell a dinosaur skeleton from Mongolia. In 2012 a New York auction catalogue boasted an unusual offering: a superb Tyrannosaurus skeleton. In fact, Lot 49135 consisted of a nearly complete T. bataar, a close cousin to the most famous animal that ever lived. The fossils, now on display in a Manhattan event space, had been unearthed in Mongolia more than six zero miles away. At eight feet high and twenty-four feet long, the specimen was spectacular, and when the gavel sounded, the winning bid was over 1 million. Eric Prokopi, a thirty-eight-year-old Floridian, was the man who had brought this extraordinary skeleton to market. A onetime swimmer who spent his teenage years diving for shark teeth, Prokopi's singular obsession with fossils fueled a thriving business hunting, preparing, and selling specimens to clients ranging from natural history museums to avid private collectors like actor Leonardo DiCaprio. But as the T. bataar went to auction, a network of paleontologists alerted the government of Mongolia to the eye-catching lot, resulting in an international custody battle and unraveling Prokopi's world.

Paige Williams's *The Dinosaur Artist* is a stunning work of narrative journalism about humans' relationship with natural history and a seemingly intractable conflict between science and commerce. A story that stretches from Florida's Land O Lakes to the Gobi Desert, it illuminates the history of fossil collecting, a murky, sometimes risky business populated by eccentrics and obsessives where the lines between poacher and hunter, collector and smuggler, enthusiast and opportunist can easily blur.

*The Art of Naming* Michael Ohl, 2019-02-26

From Tyrannosaurus rex to Heteropoda davidbowie, scientific naming as a joyful and creative act. Tyrannosaurus rex, Homo sapiens, Heteropoda davidbowie. Behind each act of scientific naming is a story. In this entertaining and illuminating book, Michael Ohl considers scientific naming as a joyful and creative act. There are about 1.8 million discovered and named plant and animal species, and millions more still to be discovered. Naming is the necessary next step after discovery; it is through the naming of species that we perceive and understand nature. Ohl explains the process with examples, anecdotes, and a wildly varied cast of characters. He describes the rules for scientific naming; the vernacular isn't adequate. These rules, in standard binomial nomenclature, the generic name followed by specific name, go back to Linnaeus, but they are open to idiosyncrasy and individual expression. A lizard is designated *Barbaturex morrisoni* in honor of the Doors' Jim Morrison, the Lizard King, a member of the horsefly family *Scaptia beyonceae*. Ohl, a specialist in winged things that sting, confesses that among the many wasp species he has named is *Ampulex dementor*, after the dementors in the Harry Potter novels. Scientific names have also been deployed by scientists to insult other scientists, to make political statements, and as expressions of romantic love. I shall name this beetle after my beloved wife. *The Art of Naming* takes us on a surprising and fascinating journey in the footsteps of the discoverers of species and the authors of names, into the nooks and crannies and drawers and cabinets of museums and through the natural world of named and not yet named species.

*Fifth Book of Junior Authors & Illustrators* Sally Holmes Holtz, 1983. Comprises 239 sketches of authors and illustrators of young people's books who have come to prominence since the previous volume.
