Grindr app data mined to expose gay priests

Catholic group legally paid millions in a new frontier of private surveillance

BY MICHELLE BOONSTEIN
AND MAXWELL KOLBY

A group of conservative Catholic activists has spent millions of dollars to buy mobile app tracking data that identified priests who used gay dating and hookup apps and then shared it with bishops around the country. The secretive effort was the work of a Catholic nonprofit called Catholic Life and Change for Renewal, whose founders are philanthropists Mark Beutman, John Morini and Tim Burchett, according to public records, an audio recording of the nonprofit's president discussing the mission and other documents. The use of data to comb through a vast, mostly hidden frontier in which private individuals can potentially track others' movements, intentions and actions using commercially available information. The U.S. data privacy laws prohibit the sale of this data.

The group's aim, according to its records, is to "empower the church to carry out the mission" by giving bishops "robust, actionable intelligence" with which to identify weaknesses in their clergy from priests.

In response to requests for comment and a detailed list of questions, a spokesman for Catholic Life and Change for Renewal initially said the group's president, April Hernandez, would appear for an interview at a certain time, but Hernandez did not call or return several messages seeking comment. After The Washington Post reached out again, Hernandez on Wednesday provided a first-person piece on the site First Things, saying the new group is the part of the group, which says it has been the Church's ally to help the Church to be fully with every tool it could be given, including data. He wrote that the group has done other projects, in addition to the analysis of dating and hookup apps.

Asylum seekers are stuck in squalid camps in Mexico, struggling to use Customs and Border Protection's new app to enter the United States

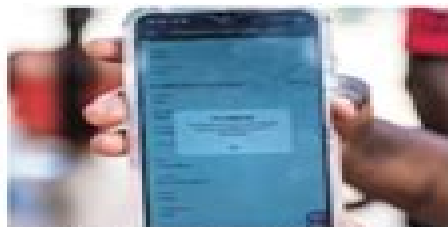

At the border, a technology wall

BY ANDREW R. HERNANDEZ • IN WASHINGTON, D.C.

I was supposed to be his last day in Mexico. The 17-year-old Venezuelan boy beamed as he bade farewell to his mother, Liliana Carlin, at a school for migrant children living in tents while waiting for their chance to move to the United States.

His family, finally, had obtained an appointment to follow up with U.S. Customs and Border Protection after weeks of trying to use a new app to secure a slot.

Now they hoped to be allowed to begin a new life in America. He

"We are never going to leave," Carlin murmured, her face telling her as she watched the waiting child into an almost barren as the "wait times."

As the future administrative struggle to bring order to the border, some of the most vulnerable migrants are finding themselves stuck in a digital limbo in Mexico. A significant number are working asylum in the United States and were expecting the continuity of the nation's immigration law, which offers a greater chance of protection to request protection to make their

Bailout debated in bank collapse

CALLS GROW FOR AID TO BIG DEPOSITORS

Government rescue may provoke public backlash

BY JANE WOLFE
AND CHRIS MONROE

Federal officials faced growing pressure Saturday to bail out even the biggest customers of the collapsed Silicon Valley Bank, igniting a bipartisan political debate over Washington's role in turning down potential threats to the broader U.S. financial sector.

Both conservatives, former government officials said at least two Democratic lawmakers called for safeguarding depositors with money at stake in the collapse of a bank for the bank's assets isn't covered by FDIC insurance, arguing that it's the only way to limit a cascade of bigger problems.

Conservatives said that bailouts with Silicon Valley Bank are already warning that the bank's failure may have thousands of deposits in California, and prompt help would threaten the bank's next paycheck.

Some experts worry that large numbers of companies could move to other banks, leaving local regional banks similar to SVB to suffer giant commercial banks' bankruptcy, leading to a bank run or a decline in confidence.

A move to make Silicon Valley Bank's depositors whole without a bailout would probably require Congress to provide a new funding mechanism to help larger depositors. A move to help larger depositors argue that it would establish a troubling precedent, leading other banks to make similar arrangements to protect their assets, or even to encourage them to do so.
