Mahar, 1979-05-01 Development planning for Amazonia past and present Regional population and labor force The regional economy an overview Fiscal incentives of SUDAN **Frontiers of Development in the Amazon** Antonio Augusto Rossotto Ioris, Rafael R. Ioris, Sergei V. Shubin, 2020-06-22 Frontiers of Development in the Amazon Riches Risks and Resistances contributes to ongoing debates on the processes of change in the Amazon a region inherently tied to the expansion of internal and external socio economic and environmental frontiers This book offers interdisciplinary analyses from a range of scholars in Europe Latin America and the United States that question the methods of development and the range of socio ecological impacts of those methods by examining the theoretical methodological and empirical dimensions of frontier making along with evaluating and refining existing frameworks Contributors focus on the complex politics of border formation shaped by institutional economic and political forces placing them in relation to ethical imaginary and symbolic elements In doing so contributors explore the dynamic production of identities values and subjectivities covering matters of migratory patterns complex power struggles and intensive at times violent clashes Among other topics this book assesses the recent encroachment of export driven agribusiness into the Amazon Region in the context of recolonization resource exploitation and multiple programs of modernization and national integration Scholars of Latin American studies international development environmental studies and applied social sciences will find this book particularly useful **Amazonia and Global Change** Michael Keller, Mercedes Bustamante, John Gash, Pedro Silva Dias, 2013-05-02 Published by the American Geophysical Union as part of the Geophysical Monograph Series Volume 186 Amazonia and Global Change synthesizes results of the Large Scale Biosphere Atmosphere Experiment in Amazonia LBA for scientists and students of Earth system science and global environmental change LBA led by Brazil asks how Amazonia currently functions in the global climate and biogeochemical systems and how the functioning of Amazonia will respond to the combined pressures of climate and land use change such as Wet season and dry season aerosol concentrations and their effects on diffuse radiation and photosynthesis Increasing greenhouse gas concentration deforestation widespread biomass burning and changes in the Amazonian water cycle Drought effects and simulated drought through rainfall exclusion experiments The net flux of carbon between Amazonia and the atmosphere Floodplains as an important regulator of the basin carbon balance including serving as a major source of methane to the troposphere The impact of the likely increased profitability of cattle ranching The book will serve a broad community of scientists and policy makers interested in global change and environmental issues with high quality scientific syntheses accessible to nonspecialists in a wide community of social scientists ecologists atmospheric chemists climatologists and hydrologists **The Future of Amazonia** A. Hall, D.

Goodman,1991-01-12 The future of Brazilian Amazonia the world s largest remaining tropical rainforest hangs in the balance Two decades of destructive development have provoked violent struggles for control over the region s resources with disastrous social and environmental consequences This multi disciplinary collection reviews past experience but focusses on the latest phase of Amazonian settlement Chapters by leading authorities examine such issues as colonisation in the most recent frontier areas multinational mining projects hydro electric schemes and the military occupation of Brazil s borders After demonstrating how new government and business activities have exacerbated social tensions and ecological destruction the volume considers alternative more sustainable strategies **Global Deforestation** Christiane Runyan,Paolo

D'Odorico,2016-04-18 A concise but comprehensive interdisciplinary examination of global deforestation for a broad audience of scientists and policymakers [Air University Review](#) ,1986-07 **Security, the Environment and**

Emancipation Matt McDonald,2012-01-30 This book offers an examination of the role of emancipation in the study and practice of security focusing on the issue of environmental change The end of the Cold War created a context in which traditional approaches to security could be systematically questioned This period also saw a concerted attempt in IR to argue that environmental change constituted a threat to security This book argues that such a notion is problematic as it suggests that a universal definition of security is possible which prevents a recognition of security as a site of contestation in which a range of actors articulate alternative visions of who or what is in need of being secured If security is understood and approached in traditional terms as the territorial preservation of the nation state from external threat then it is indeed difficult to see how environmental issues would benefit from being placed on states security agenda If however security is defined in terms of the emancipation of the most vulnerable individuals from contingent structural oppressions then drawing a relationship between environmental change and security may be beneficial for redressing those environmental issues and prioritising the needs of those most at risk from the manifestations of global environmental change This book takes the limitations of contemporary approaches to the relationship between the environment and security as its starting point and seeks to do two things First it aims to illustrate the ways in which arguments over approaches to environmental issues can be viewed as contestation over the meaning of security in particular political contexts Central here is the composition and assumptions of the dominant security discourse to emerge regarding those issues a framework of meaning for the most important forms of action on behalf of a particular group defining the terms for meaningful contestation and negotiation about security itself within that group As such the book attempts to illustrate the dynamics of competition over the meaning of security with reference to environmental issues particularly focusing on instances of political change in the dominant security discourse through which that issue is approached In the process the author points to the central role of these dominant security discourses in underpinning the most practically significant actions regarding environmental issues such as deforestation and global climate change The book employs methodological tools that enable a focus on how particular

frameworks of meaning are constituted and become dominant how they provide a lens through which various issues are approached and how discourses most consistent with redressing environmental change and the suffering of the most vulnerable might come to provide the framework through which security is viewed in particular contexts This book will be of much interest to students of Critical Security Studies geography sociology IR and Political Science in general

Degradation in Tropical Latin America William M. Denevan, 1982

Tropical Deforestation C. J. Jepma, 2014-02-04

The depletion of the tropical rain forests has attracted considerable attention in recent times and the serious consequences for the global biosphere are widely acknowledged Yet deforestation continues apace and in some areas for example southeast Asia the very existence of the forests is seriously threatened Contrary to popular belief evidence suggests that local economic and living conditions are more significant in this than timber exploitation for exports to the Northern countries Tropical Deforestation A Socio Economic Approach offers a new perspective on the economic imperatives which encourage indigenous populations to encroach upon their own forests and shows how action against deforestation must form part of a wider movement to improve both the living conditions of the local inhabitants and the durability of their national economies Part 1 offers an overview of the processes surrounding deforestation and an assessment of the current situation Part 2 analyses the land use issues and explains the socioeconomic imperatives in the affected regions In an absorbing conclusion Part 3 guides the reader through a series of hypothetical policy scenarios using a specially adapted economic computer model to predict which combinations of policies and trade arrangements might bring about a more beneficial state of affairs

The Dilemma Of Amazonian Development Emilio F Moran, 2019-05-28 This book the first to apply the combined approaches of anthropology geography ecology economics and sociology to the analysis of the Amazon River region and its imminent development explores the impact of development on Amazonian populations and the results of rural and urban growth strategies The authors use the methodologies of environmen

Air university review, 1982, 1982 **Entangled Edens** Candace Slater, 2002 The skill with which Slater combines various levels and modalities of narrative utilizing her personal experience as a colorful unifying thread is truly remarkable Antonio Candido author of Antonio Candido On Literature and Society Howard S Becker editor A very important book that quite gracefully elegantly and persuasively moves beyond the usual myth and history format to put at its center stories about the

Amazon and the people who tell them Entangled Edens persuasively argues that the Amazon can only be grasped understood and come to terms with through its myths and stories It addresses a very real failing of modern environmentalism which for all its virtues tends to dehumanize and metaphorically depopulate when it does not villainize populations that do share its concerns or share them in very different ways Instead of forcing us to choose between land and people Slater uses the stories and the people who tell them to rethink human relations with nature and each other Richard White author of The Organic Machine The Remaking of the Columbia River Elegant erudite profoundly serious Entangled Edens is a source of inspiration and knowledge for the reader interested in the Amazon Without the cultural tradition and the life experience of Amazonia s people any analysis of the Amazon risks becoming inconsequential or opportunistic This is one of the powerful messages of this important reflection on the Amazon whose greatest riches are ultimately its people Candace Slater has written a book that will last Milton Hatoum author of The Tree of the Seventh Heaven 1994 and The Brothers 2002 **The Political**

Economy of Brazil Lawrence S. Graham,Robert H. Wilson,2014-07-03 The transition from authoritarian to democratic government in Brazil unleashed profound changes in government and society that cannot be adequately understood from any single theoretical perspective The great need say Graham and Wilson is a holistic vision of what occurred in Brazil one that opens political and economic analysis to new vistas This need is answered in The Political Economy of Brazil a groundbreaking study of late twentieth century Brazilian issues from a policy perspective The book was an outgrowth of a year long policy research project undertaken jointly by the Lyndon B Johnson School of Public Affairs and the Teresa Lozano Long Institute of Latin American Studies both at the University of Texas at Austin In this book several noted scholars focus on specific issues central to an understanding of the political and economic choices that were under debate in Brazil Their findings reveal that for Brazil the break with the past the authoritarian regime could not be complete due to economic choices made in the 1960s and 1970s and also the way in which economic resources committed at that time locked the government into a relatively limited number of options in balancing external and internal pressures These conclusions will be important for everyone working in Latin American and Third World development *Amazonia, Agriculture and Land Use Research* Susanna B. Brannstrom,Jacqueline M. Vadjunec,2014-01-23 Recent claims regarding convergence and divergence between land change science and political ecology as approaches to the study of human environment relationships and sustainability science are examined and analyzed in this innovative volume Comprised of 11 commissioned chapters as well as introductory and concluding synthesis chapters it advances the two fields by proposing new conceptual and methodological approaches toward integrating land change science and political ecology The book also identifies areas of fundamental difference and disagreement between fields These theoretical contributions will help a generation of young researchers refine their research approaches and will advance a debate among established scholars in geography land use studies and sustainability

science that has been developing since the early 2000s At an empirical level case studies focusing on sustainable development are included from Africa Central and South America and Southeast Asia The specific topics addressed include tropical deforestation swidden agriculture mangrove forests gender and household issues The Xavante in Transition Carlos E. A. Coimbra, Nancy M. Flowers, Francisco M. Salzano, Ricardo V. Santos, 2010-04-23 The Xavante in Transition presents a diachronic view of the long and complex interaction between the Xavante an indigenous people of the Brazilian Amazon and the surrounding nation documenting the effects of this interaction on Xavante health ecology and biology A powerful example of how a small scale society buffeted by political and economic forces at the national level and beyond attempts to cope with changing conditions this study will be important reading for demographers economists environmentalists and public health workers an integrated and politically informed anthropology for the new millennium They show how the local and the regional meet on the ground and under the skin Alan H Goodman Professor of Biological Anthropology Hampshire College This volume delivers what it promises Drawing on twenty five years of team research the authors combine history ethnography and bioanthropology on the cutting edge of science in highly readable form Daniel Gross Lead Anthropologist The World Bank No doubt it will serve as a model for future interdisciplinary scholarship It promises to be highly relevant to policy formulation and implementation of health care programs among small scale populations in Brazil and elsewhere Laura R Graham Professor of Anthropology University of Iowa Carlos E A Coimbra Jr is Professor of Medical Anthropology at the National School of Public Health Rio de Janeiro Nancy M Flowers is Adjunct Associate Professor of Anthropology Hunter College Francisco M Salzano is Emeritus Professor Department of Genetics Federal University of Rio Grande do Sul Brazil Ricardo V Santos is Professor of Biological Anthropology at the National School of Public Health and at the National Museum IUFRRJ Rio de Janeiro **Humid Tropical Environments** Alison Reading, Andrew C. Millington, Russell D. Thompson, 1995-10-30 The humid tropics contain some of the world's richest most diverse most important and most threatened environments This book draws on recent work by geographers biologists ecologists geologists and climatologists to present a complete and integrated appraisal of the natural environment of all the humid tropical regions of the world The most complete textbook on this key subject Fully illustrated throughout with photographs and diagrams Informative case studies and examples Considers the physical environment as a whole and stresses the link between the elements
