Heating and Cooling of Buildings Jan F. Kreider, Peter S. Curtiss, Ari Rabl, 2009-12-28 The art and the science of building systems design evolve continuously as designers practitioners and researchers all endeavor to improve the performance of buildings and the comfort and productivity of their occupants Retaining coverage from the original second edition while updating the information in electronic form *Heating and Cooling of Buildings Design for Efficiency Revised Second Edition* presents the technical basis for designing the lighting and mechanical systems of buildings Along with numerous homework problems the revised second edition offers a full chapter on economic analysis and optimization new heating and cooling load procedures and databases and simplified procedures for ground coupled heat transfer calculations The accompanying CD ROM contains an updated version of the Heating and Cooling of Buildings HCB software program as well as electronic appendices that include over 1 000 tables in HTML format that can be searched by major categories a table list or an index of topics Ancillary information is available on the book s website www.hcbcentral.com From materials to computers this edition explores the latest technologies exerting a profound effect on the design and operation of buildings Emphasizing design optimization and critical thinking the book continues to be the ultimate resource for understanding energy use in buildings

Heating and Cooling with Ground-Source Heat Pumps in Cold and Moderate Climates Vasile Minea, 2022-04-19 *Heating and Cooling with Ground Source Heat Pumps in Cold and Moderate Climates Fundamentals and Basic Concepts* covers fundamentals and design principles of vertical and horizontal indirect and direct expansion closed loop as well as ground and surface water ground source heat pump systems It explains the thermodynamic aspects of mechanical and thermochemical compression cycles of geothermal heat pumps and describes the energetic economic and environmental aspects associated with the use of ground source heat pump systems for heating and cooling residential and commercial institutional buildings in moderate and cold climates Based on the author s more than 30 years of technical experience Focuses on ground source heat pump technologies that can be successfully applied in moderate and cold climates Discusses technical aspects as well as the most common and uncommon application fields of basic system configurations This work is aimed at designers of HVAC systems as well as geological mechanical and chemical engineers implementing environmentally friendly heating and cooling technologies for buildings *System Performance: Maximizing Energy Efficiency in Heating and Cooling* Randy F. Petit, Sr., Turner L. Collins, Earl Delatte, Erik Rasmussen, 2014-07-01 *Heating Ventilation Air Conditioning* HVAC equipment is only as good as the installation Studies show that the majority of HVACR equipment is not installed to manufacturer specifications costing the consumer more money 68% of all air conditioning systems are improperly charged 70% of all systems have improper airflow 91% of systems remain untested for combustion safety and efficiency The *System Performance* training manual is broken into four sections Each section covers the techniques and procedures required for a technician to maximize the energy efficiency of HVAC systems 1 Airflow Covers the properties of air airflow

measuring tools CFM calculations requirements blower performance and sensible heat ratios 2 Critical Charging Reviews the three charging methods by weight system superheat and condenser subcooling It gives examples of calculating the total charge based on line sizes and provides an easy method to check whether a system is operating to rated capacity 3 Psychrometrics Covers the parts of a psychrometric chart and calculating the thermodynamic properties of air Also this section demonstrates using wet and dry bulb temperatures to plot air conditions being heated or cooled which enables the technician to obtain a systems effect on sensible and latent building load 4 Combustion Analysis This section reviews the basic combustion process and the factors that affect heating efficiency Proper methods for furnace setting of airflow adjustment and testing fuel pressure and flue gas venting

Heating and Cooling Essentials Jerry Killinger,1993 Activities are designed to help students review content and develop critical thinking skills A wide variety of activities is provided for various learning styles

Heating and Cooling of Buildings T. Reddy,Jan F. Kreider,Peter S. Curtiss,Ari Rabl,2016-09-01 Heating and Cooling of Buildings Principles and Practice of Energy Efficient Design Third Edition is structured to provide a rigorous and comprehensive technical foundation and coverage to all the various elements inherent in the design of energy efficient and green buildings Along with numerous new and revised examples design case studies and homework problems the third edition includes the HCB software along with its extensive website material which contains a wealth of data to support design analysis and planning Based around current codes and standards the Third Edition explores the latest technologies that are central to design and operation of today s buildings It serves as an up to date technical resource for future designers practitioners and researchers wishing to acquire a firm scientific foundation for improving the design and performance of buildings and the comfort of their occupants For engineering and architecture students in undergraduate graduate classes this comprehensive textbook

Heating and Cooling with Ground-Source Heat Pumps in Moderate and Cold Climates, Two-Volume Set Vasile Minea,2022-07-30 Heating and Cooling with Ground Source Heat Pumps in Moderate and Cold Climates Two Volume Set focuses on the use of very low temperature geothermal energy for heating and cooling residential institutional and industrial buildings and aims to increase the design community s awareness and knowledge of the benefits design and installation requirements of commercial institutional building ground source heat pumps GSHP This set helps readers assess applicability select a GSHP system type and estimate building thermal load to ensure proper size for ground source subsystems appropriate brine and groundwater flow rates and apt design of building closed loops with distributed or central geothermal heat pumps The first volume addresses fundamentals and design principles of vertical and horizontal indirect and direct expansion closed loop as well as ground and surface water ground source heat pump systems It explains the thermodynamic aspects of mechanical and thermochemical compression cycles of geothermal heat pumps as well as the energetic economic and environmental aspects associated with the use of ground source heat pump systems for heating and cooling residential and commercial institutional buildings in moderate and

cold climates The second volume focuses on applications and cases studies of ground source heat pumps in moderate and cold climates It details technical aspects as well as the most common and uncommon application fields of basic system configurations The principles of system integrations and applications in moderate and cold climates are also presented each followed by case studies This comprehensive work is aimed at designers of HVAC systems as well as geological mechanical and chemical engineers implementing environmentally friendly heating and cooling technologies for buildings District Heating and Cooling United States. split air conditioning systems Presents the fundamentals of heating and cooling of air through coils Explains the psychrometric chart used for assessing the physical and thermodynamic properties of air in the heating and cooling processes Covers numerous coil types and constructions Discusses the key equipment used in the coil fluid piping systems that deliver hot water steam condensate and chilled water to and from the coils Considers various energy sources to the fluid in the coil piping system for heating and cooling including solar heat energy ocean thermal energy and geothermal energy This book will interest engineers and researchers involved in the design and operation of heat exchangers and HVAC systems It can also be used as a textbook for undergraduate and graduate students majoring in relevant fields such as thermal and fluids HVAC and energy management

Making the Most of Your Energy Dollars in Home Heating and Cooling Madeleine Jacobs, Stephen R. Petersen, United States. National Bureau of Standards, 1975 Heating and Cooling Time-Life Books, 1977 Provides step by step directions for adjusting furnaces to achieve maximum efficiency and for installing ducts radiators central air conditioning humidifiers and solar water heaters Heat and cold storage with PCM Harald Mehling, Luisa F. Cabeza, 2008-08-15 The years 2006 and 2007 mark a dramatic change of peoples view regarding climate change and energy consumption The new IPCC report makes clear that mankind plays a dominant role on climate change due to CO emissions from energy consumption and that a significant reduction in CO emissions is necessary within decades At the same time the supply of fossil energy sources like coal oil and natural gas becomes less reliable In spring 2008 the oil price rose beyond 100 barrel for the first time in history It is commonly accepted today that we have to reduce the use of fossil fuels to cut down the dependency on the supply countries and to reduce CO emissions The use of renewable energy sources and increased energy efficiency are the main strategies to achieve this goal In both strategies heat and cold storage will play an important role People use energy in different forms as heat as mechanical energy and as light With the discovery of fire humankind was the first time able to supply heat and light when needed About 2000 years ago the Romans started to use ceramic tiles to store heat in under floor heating systems Even when the fire was out the room stayed warm Since ancient times people also know how to cool food with ice as cold storage
