Heavy Snow My Fathers Disappearance Into Alzheimer:

The Loss of Self Donna Cohen, Carl Eisdorfer, 2002 Provides information on the causes prevention diagnosis treatment drugs and care of Alzheimer patients to help families caregivers and professionals deal with the disease Reconsidering Dementia Narratives Rebecca Bitenc, 2019-07-05 Reconsidering Dementia Narratives explores the role of narrative in developing new ways of understanding interacting with and caring for people with dementia It asks how the stories we tell about dementia in fiction life writing and film both reflect and shape the way we think about this important condition Highlighting the need to attend to embodied and relational aspects of identity in dementia the study further outlines ways in which narratives may contribute to dementia care while disputing the idea that the modes of empathy fostered by narrative necessarily bring about more humane care practices This cross medial analysis represents an interdisciplinary approach to dementia narratives which range across auto biography graphic narrative novel film documentary and collaborative storytelling practices The book aims to clarify the limits and affordances of narrative and narrative studies in relation to an ethically driven medical humanities agenda through the use of case studies Answering the key question of whether dementia narratives align with or run counter to the dominant discourse of dementia as loss of self this innovative book will be of interest to anyone interested in dementia studies ageing studies narrative studies in health care and critical medical humanities

At a Particular Age: John Haugse, 2020-05-19 *At a Particular Age Heavy Snow Revisited* is the story of a son taking care of his father who is slowly and painfully disappearing into Alzheimer s disease Through the illustrated vignette style of the book the author was able to portray with poignancy and humor the tragedy of Alzheimer s and the terrible strain it puts on the caregiver family and friends The son s disturbing dream sequences reveal the psyche and the hidden fears we all have about this frightening disease While the story focuses on the care of an Alzheimer s suffer it is also the story of how an estranged father and son are brought together by illness For over forty years the conservative minister father and the artist son have had a relationship based on conflict and anger By caring for his father the son hopes to resolve their bitter difficulties and find peace before the disease makes it impossible

Heavy Snow John E. Haugse, 1999 The unforgettable words and images of Haugse s story explore the narrator s childhood up to the death of his father deftly detailing the progressive stages of Alzheimer s and their ramifications on the patient caregiver and family

Mediating Alzheimer's Scott Selberg, 2022-05-24 An exploration of the representational culture of Alzheimer s disease and how media technologies shape our ideas of cognition and aging With no known cause or cure despite a century of research Alzheimer s disease is a true medical mystery In *Mediating Alzheimer's* Scott Selberg examines the nature of this enduring national health crisis by looking at the disease s relationship to media and representation He shows how collective investments in different kinds of media have historically shaped how we understand treat and live with this disease Selberg demonstrates how the cognitive abilities that Alzheimer s threatens memory for example are integrated into the operations of representational technologies

from Polaroid photographs to Post its to digital artificial intelligence Focusing on a wide variety of media technologies such as neuroimaging art therapy virtual reality and social media he shows how these cognitively oriented media ultimately help define personhood for people with Alzheimer s Media have changed the practices of successful aging in the United States and Selberg takes us deep into how technologies like digital brain training and online care networks shape ideas of cognition and healthy aging Packed with startlingly fresh insights Mediating Alzheimer s contributes to debates around bioethics the labor of caregiving and a national economy increasingly invested in communication and digital media Probing the very technologies that promise to save and understand our brains it gives us new ways of understanding Alzheimer s disease and aging in America

Global Perspectives on Probing Narratives in Healthcare Casal, Teresa, Cabral, Maria de Jesus, 2023-06-01 There is often a communication disconnect between medical caregivers including doctors nurses therapists and other assistive medical personnel and the patient While medical staff usually understand a patient s symptoms causes and treatments communicating this understanding to a patient using industry terminologies can lead to confusion and misunderstanding and similarly patients may lack the vocabulary to effectively communicate their experiences back to their caregivers A new approach to communication must be bridged between these groups by individuals who have experience on both sides of the conversation Previous studies of doctors who end up in the role of the patient reveal how these individuals have a dual perspective on illness combining their medical knowledge with their own personal medical experiences Narratives including autobiographical accounts and fictional stories can help bridge the gap between experiential and academic knowledge of illness by expanding one s limited perspective and accessing others points of view Autobiographical and fictional narratives can both play a role in developing a more comprehensive understanding of illness beyond simply treating the disease It is necessary to further examine the ethical and methodological underpinnings of narrative based interventions in the education of healthcare professionals practitioners and patients Global Perspectives on Probing Narratives in Healthcare offers a multidisciplinary examination of theoretical and methodological uses of narratives in healthcare by bringing together medical aspects of healthcare and the study of arts and humanities This illustrates specific applications of narratives in healthcare settings including improvement of clinical skills performance of the caring role and self efficacy for building a true partnership in the patient s health journey through varied approaches up to date tools and resources that can be transferred and adapted to specific educational and healthcare contexts This diverse collection of expert knowledge and experience is led by editors with over 20 years of teaching experience Dr Teresa Casal of the University of Lisbon Portugal and Dr Maria de Jesus Cabral of the University of Minho Portugal Expertise featured in this book includes contributions from some of the most prestigious academic institutions including Columbia University in the United States King s College in the United Kingdom University of Padua in Italy and more It is an essential resource for healthcare and social science researchers academics advanced healthcare students health training and education
