Heimkehr ins Exil Erwin Walter Palm, Helga von Kügelgen, Arnold Rothe, 1992 **A Historical Archaeology of Early Spanish Colonial Urbanism in Central America** William R. Fowler, 2022-01-04 In this milestone work William Fowler uses archaeology history and social theory to show that the establishment of cities was essential to Spanish colonialism Fowler draws upon decades of archaeological research on the landscape built environment and architecture of Ciudad Vieja a sixteenth century site located in present day El Salvador and the best preserved Spanish colonial city in Latin America Fowler compares Ciudad Vieja to other urban sites in the region and to the tradition of urbanism in early modern Spain to determine how the Spanish grid plan layout was modified and implemented in the Americas Using extensive archival material Fowler describes how this layout reflected and perpetuated power structures that benefited the Spanish although the city's Indigenous population was greater in number Fowler analyzes recorded interactions between colonists Indigenous peoples and enslaved Africans to demonstrate the ways the cityscape affected the relationships among individuals and cultural groups Offering an unparalleled view into a critical moment in Latin American history this book offers new ways of looking at urbanism and colonialism as intertwined forces in the emergence of the early modern world *International Handbook of Historical Archaeology* Teresita Majewski, David Gaimster, 2009-06-07 In studying the past archaeologists have focused on the material remains of our ancestors Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior Those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies communities and individuals operated and behaved Increasingly historical archaeology refers not to a particular period place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context In short historical archaeology provides direct evidence for how humans have shaped the world we live in today Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the *International Handbook of Historical Archaeology* have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world This key reference work captures the energy and diversity of this global discipline today Biographisches
