Larsen, 1998-09-01 This work by a veteran pastor and professor of homiletics looks at the history of preaching from its roots in the Old Testament prophets to its continuing development in the modern era *The Wisdom of the Ancients* H. A. Drake, 2025-02-17 This book is about four cornerstones of modern thought that were put in place by people living in the ancient Mediterranean world It covers approximately 2 000 years in time from ca 1000 BCE to 1000 CE and spatially moves from the Tigris and Euphrates rivers in Mesopotamia roughly modern Iraq through Greece and Rome to the new Germanic states growing in what is now western Europe The four ideas as author H A Drake proposes are monotheism the idea that there is only one god not many individual rights the idea that there is a limit to what the state can order us to do naturalized citizenship the idea that the full rights and privileges of citizenship can be extended to people who have no birthright to them and creation of a standard by which to judge the performance of states It is easy now to take these ideas for granted For believers it seems obvious that only a singular omnipotent deity can account for the splendour of the universe Similarly the common notion that individuals can stand up for their rights that citizenship can be freely given or that governments ought to be held to a standard of justice for

all is often accompanied by the assumption that at the time they were introduced such ideas must have been immediately recognized as superior and gratefully accepted The record is far more complicated and that makes the story of their success far more interesting By discussing these ideas in their historical context with clarity and wit The Wisdom of the Ancients reminds readers how preposterous they were originally and how different our world would be if they had not taken hold
