Metropolitan Museum of Art's symposia series furthers the study of one of the most influential but less known periods of Greek art and culture. It is based on papers given at a two-day scholarly symposium held in conjunction with the award-winning exhibition *Pergamon and the Hellenistic Kingdoms of the Ancient World* on view at the Metropolitan in 2016. The twenty diverse essays exemplify the international scope of the Hellenistic arts which cover the three centuries between the death of Alexander the Great in 323 B.C. and the suicide of Cleopatra in 30 B.C. Subjects range from twenty-first-century approaches to museum displays of archaeological material to the circulation of artists and works of art throughout the Mediterranean and the influence of Hellenistic art and its legacy in the ancient Roman world. Among the topics discussed are aspects of royal self-presentation and important elements of iconography and style in coins, gems, mosaics, sculpture, vessels, and wall paintings in mediums including bronze, faience, glass, marble, silver, and terracotta. Authored by a number of internationally renowned scholars, the essays in this volume highlight the holdings of the Metropolitan and markedly demonstrate the artistic innovations and technical mastery of Hellenistic artists, offering new insights into the vitality and complexity of Hellenistic art.

Olympia Bobou, 2015. Bobou offers a systematic analysis of ancient Greek statues of children from the sanctuaries, houses, and necropoleis of the Hellenistic world in order to understand their function and meaning. Looking at the literary and epigraphical evidence, she argues that these statues were important for transmitting civic values to future citizens.

Hellenistic Sculpture Brunilde Sismondo Ridgway, 1990 **Power and Pathos** Jens M. Deahner, Kenneth Lapatin, 2015-05-24. For the general public and specialists alike, the Hellenistic period (323-31 B.C.) and its diverse artistic legacy remain underexplored and not well understood. Yet it was a time when artists throughout the Mediterranean developed new forms, dynamic compositions, and graphic realism to meet new expressive goals, particularly in the realm of portraiture. Rare survivors from antiquity, large bronze statues are today often displayed in isolation, decontextualized as masterpieces of ancient art. *Power and Pathos* gathers together significant examples of bronze sculpture in order to highlight their varying styles, techniques, contexts, functions, and histories. As the first comprehensive volume on large-scale Hellenistic bronze statuary, this book includes groundbreaking archaeological, art historical, and scientific essays offering new approaches to understanding ancient production and correctly identifying these remarkable pieces. Designed to become the standard reference for decades to come, the book emphasizes the unique role of bronze both as a medium of prestige and artistic innovation and as a material exceptionally suited for reproduction. *Power and Pathos* is published on the occasion of an exhibition on view at Palazzo Strozzi in Florence from March 14 to June 21, 2015; at the J. Paul Getty Museum from July 20 through November 1, 2015; and at the National Gallery of Art in Washington, D.C. from December 6, 2015 through March 20, 2016.
