North Africa from Constantinople to Greece and the Balkans and from Egypt and Jerusalem to the villages and monasteries of Syria Asia Minor Armenia and Mesopotamia The Architecture of Alexandria and Egypt, C. 300 B.C. to A.D. 700 Judith McKenzie, Rhys-Davids Junior Research Fellow in Archaeology Judith McKenzie, Peter Roger Stuart Moorey, 2007-01-01 This masterful history of the monumental architecture of Alexandria as well as of the rest of Egypt encompasses an entire millennium from the city's founding by Alexander the Great in 331 B.C. to the years just after the Islamic conquest of A.D. 642. Long considered lost beyond recall, the architecture of ancient Alexandria has until now remained mysterious. But here Judith McKenzie shows that it is indeed possible to reconstruct the city and many of its buildings by means of meticulous exploration of archaeological remains, written sources and an array of other fragmentary evidence. The book approaches its subject at the macro and the micro level, from city planning, building types and designs to architectural style. It addresses the interaction between the imported Greek and native Egyptian traditions, the relations between the architecture of Alexandria and the other cities and towns of Egypt as well as the wider Mediterranean world and Alexandria's previously unrecognized role as a major source of architectural innovation and artistic influence. Lavishly illustrated with new plans of the city in the Ptolemaic, Roman and Byzantine periods, reconstruction drawings and photographs, the book brings to life the ancient city and uncovers the true extent of its architectural legacy in the Mediterranean world.

Classical Architecture Curl James Stevens, 2003-04-29 This well illustrated book describes the fundamental principles and various aspects of classical architecture including a detailed illustrated glossary that is almost a dictionary of classical architecture in itself. Professor James Stevens Curl discusses in clear straightforward language the origins of classical architecture in Greek and Roman antiquity and outlines its continuous development through its various manifestations during the Renaissance, its transformations in Baroque and Rococo phases, its reemergence in eighteenth, nineteenth and twentieth century Neoclassicism and its survival into the modern era. The text and illustrations celebrate the richness of the classical architectural vocabulary, grammar and language and demonstrate the enormous range of themes and motifs found in the subject. All those who wish to look at buildings old and new with an informed eye will find in this book a rich fund of material and the basis for an understanding of a fecund source of architectural design that has been at the heart of western culture for over two and a half millennia.
