## **Hello Earth Greetings From Endeavour:**

*Hello Earth ; Greetings from Endeavour* Al Worden,1974      *The Light of Earth* Al Worden,Francis French,2021-11

Apollo 15 command module pilot Al Worden was one of the highest profile personalities among the Apollo astronauts renowned for his outspokenness and potent views but also recognized as a warm and well liked person who devoted much of his life after retiring from NASA to sharing his spaceflight experiences Worden had nearly finished writing this book before his passing in 2020 at the age of eighty eight Coauthored with spaceflight historian Francis French *The Light of Earth* is Worden s wide ranging look at the greatest ever scientific undertaking in which he was privileged to be a leading participant Here Worden gives readers his refreshingly candid opinions on the space program flying to the moon and the people involved in the Apollo and later shuttle programs as well as sharing hard hitting reflections on the space shuttle program the agonies and extraordinary sights and delights of being a NASA Apollo astronaut and the space program s triumphs and failures Worden delves into areas of personal grief that reveal the noble and truly human side of the space program s earliest years He does not hold back when discussing the shocking deaths of his fellow astronauts in the three major tragedies that struck the space agency nor does he shy away from sharing his personal feelings about fellow Apollo astronauts including Neil Armstrong and Buzz Aldrin Worden was known as a charismatic speaker and one of the most thoughtful Apollo astronauts His candid entertaining and unique perspective in *The Light of Earth* will captivate and surprise      *Falling to Earth* Al Worden,Francis French,2012-07-24 As command module pilot for the Apollo 15 mission to the moon in 1971 Al Worden flew on what is widely regarded as the greatest exploration mission that humans have ever attempted He spent six days orbiting the moon including three days completely alone the most isolated human in existence During the return from the moon to earth he also conducted the first spacewalk in deep space becoming the first human ever to see both the entire earth and moon simply by turning his head The Apollo 15 flight capped an already impressive career as an astronaut including important work on the pioneering Apollo 9 and Apollo 12 missions as well as the perilous flight of Apollo 13 Nine months after his return from the moon Worden received a phone call telling him he was fired and ordering him out of his office by the end of the week He refused to leave What happened in those nine months from being honored with parades and meetings with world leaders to being unceremoniously fired has been a source of much speculation for four decades Worden has never before told the full story around the dramatic events that shook NASA and ended his spaceflight career Readers will learn them here for the first time along with the exhilarating account of what it is like to journey to the moon and back It s an unprecedentedly candid account of what it was like to be an Apollo astronaut with all its glory but also its pitfalls

*Moon dust* Andrew Smith,2006-04-04 In 1999 Andrew Smith was interviewing Charlie Duke astronaut and moon walker for the Sunday Times During the course of the interview which took place at Duke s Texan home the telephone rang and Charlie left the room to answer it When he returned some twenty minutes later he seemed visibly upset It seemed that he d

just heard that the previous day one of his fellow moon walkers the astronaut Pete Conrad had died The more Charlie spoke the more Andrew realised that his grief was something more than the mere fact of losing a friend Now theres only nine of us he said Only nine Which meant that one day not long from now there would be none and when that day came no one on earth would have known the giddy thrill of gazing back at us from the surface of the moon The thought shocked Andrew and still does Moondust is his attempt to understand why The Apollo moon programme has been called the last optimistic act of the 20th Century Over a strange three year period between 1969 and 1972 twelve men made the longest and most eccentric of all journeys and all were indelibly marked by it In Moondust Andrew sets out to interview all the remaining astronauts who walked on the moon and to find out how their lives were changed for ever by what had happened Where do you go after you ve been to the moon In addition to this question that would prove hugely troubling to many of the returned astronauts they also had to deal with the fantasies of faceless millions at their backs for this was the first truly global media event The walkers would forever be caught between the gravitational pull of the moon and the earth s collective dreaming

**The Last of NASA's Original Pilot Astronauts** David J. Shayler, Colin Burgess, 2017-06-19 Resulting from the authors deep research into these two pre Shuttle astronaut groups many intriguing and untold stories behind the selection process are revealed in the book The often extraordinary backgrounds and personal ambitions of these skilled pilots chosen to continue NASA s exploration and knowledge of the space frontier are also examined In April 1966 NASA selected 19 pilot astronauts whose training was specifically targeted to the Apollo lunar landing missions and the Earth orbiting Skylab space station Three years later following the sudden cancellation of the USAF s highly classified Manned Orbiting Laboratory MOL project seven military astronauts were also co opted into NASA s space program This book represents the final chapter by the authors in the story of American astronaut selections prior to the era of the Space Shuttle Through personal interviews and original NASA documentation readers will also gain a true insight into a remarkable age of space travel as it unfolded in the late 1960s and the men who flew those historic missions

[How Apollo Flew to the Moon](#) W. David Woods, 2008-02-13 Between 1968 and 1972 twenty four daring men journeyed from Earth to the Moon This fascinating book traces what was a massive accomplishment right from the early launches through manned orbital spaceflights detailing each step Out of the battlefields of World War II came the gifted German engineers and designers who developed the V 2 rocket which evolved into the powerful Saturn V booster that propelled men to the Moon David Woods tells this exciting story starting from America s postwar astronautical research facilities The techniques and procedures developed have been recognised as an example of human exploration at its greatest demonstrating a peak of technological excellence

**Apollo in Perspective** Jonathan Allday, 2018-02-06 Apollo in Perspective Spaceflight Then and Now takes a retrospective look at the Apollo space program and the technology that was used to land a man on the Moon Using simple illustrations and school level mathematics Jonathan Allday explains the basic physics and technology of spaceflight and conveys the huge technological

strides that were made and the dedication of the people working on the program Physics topics covered include the laws of motion rocketry how to maneuver in orbit and more Informal and engaging the book also discusses the designs of the Apollo Command Service and Lunar modules and how these changed as the plans for the manned mission evolved Guidance systems computers and engines all had to be developed for the first time With Apollo as background the book proceeds to look at the space shuttle the technology being developed for its replacement the International Space Station and the possibilities for a manned Mars mission The book concludes with an exploration of the far future including Mars colonies and journeys to other stars

*The Mission of a Lifetime* Basil Hero,2019-04-02 Award winning former investigative reporter Basil Hero chronicles the life lessons humanity can learn from the twelve remaining Apollo astronauts who went to the Moon In rare in depth interviews the twelve remaining lunar explorers for the first time talk at length about the real right stuff the true source of courage leadership and the quiet patriotism that it took to risk their lives going to the moon Hero begins each chapter with key life lessons that readers can gain from these honorable men whom he calls the Eagles He describes how they mastered their emotions and learned to conquer their fears through techniques that can be used from the classroom to the boardroom More importantly their voyages to the Moon led them to the most incredible discovery of all our home planet and its precious place in the universe They fear for Earth s future and offer sensible solutions to its mounting crises and the path to future space exploration In *The Mission Of A Lifetime* the Eagles share their wisdom and urge us to reframe our view of Earth to theirs no identifiable nations borders or races just Earthlings working together as a collective civilization

**Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office,1976 **Apollo Confidential** Lukas

Viglietti,2019-07-30 The inside stories of the Apollo program and the live of astronauts as told to the author by the men themselves with a forward by astronaut Charlie Duke Between 1969 and 1972 twelve people walked on the surface of the Moon Twelve others flew over its majestic surface They were the sons of ordinary individuals But they believed anything was possible and they proved it to the entire world Fascinated by these men heroes such as Alan Shepard Neil Armstrong Buzz Aldrin and many others airline pilot Lukas Viglietti personally recorded their testimonies becoming a close friend and confidant to many of them in the process Now he shares his exclusive and unprecedented insight into their adventures and the Apollo program overall in *Apollo Confidential Astronauts and Cosmonauts Biographical and Statistical Data, Report Prepared for ..., June, 1975* United States. Congress. House. Science and Technology Committee,1975

**Two Sides of the Moon** David Scott,Alexei Leonov,2024-03-26 Growing up on either side of the Iron Curtain David Scott and Alexei Leonov experienced very different childhoods but shared the same dream to fly Excelling in every area of mental and physical agility Scott and Leonov became elite fighter pilots and were chosen by their countries burgeoning space programs to take part in the greatest technological race ever to land a man on the moon In this unique dual autobiography astronaut Scott and cosmonaut Leonov recount their exceptional lives and careers spent on the cutting edge of science and space exploration

With each mission fraught with perilous risks and each space program touched by tragedy these parallel tales of adventure and heroism read like a modern day thriller Cutting fast between their differing recollections this book reveals in a very personal way the drama of one of the most ambitious contests ever embarked on by man set against the conflict that once held the world in suspense the clash between Russian communism and Western democracy Before training to be the USSR s first man on the moon Leonov became the first man to walk in space It was a feat that won him a place in history but almost cost him his life A year later in 1966 Gemini 8 with David Scott and Neil Armstrong aboard tumbled out of control across space Surviving against dramatic odds a split second decision by pilot Armstrong saved their lives they both went on to fly their own lunar missions Armstrong to command Apollo 11 and become the first man to walk on the moon and Scott to perform an EVA during the Apollo 9 mission and command the most complex expedition in the history of exploration Apollo 15 Spending three days on the moon Scott became the seventh man to walk on its breathtaking surface Marking a new age of USA USSR cooperation the Apollo Soyuz Test Project brought Scott and Leonov together finally ending the Cold War silence and building a friendship that would last for decades Their courage passion for exploration and determination to push themselves to the limit emerge in these memoirs not only through their triumphs but also through their perseverance in times of extraordinary difficulty and danger

*Space Science and the Arab World* Jörg Matthias Determann, 2018-01-29

When Sultan bin Salman left Earth on the shuttle Discovery in 1985 he became the first Arab first Muslim and first member of a royal family in space Twenty five years later the discovery of a planet 500 light years away by the Qatar Exoplanet Survey subsequently named Qatar 1b was evidence of the cutting edge space science projects taking place across the Middle East This book identifies the individuals institutions and national ideologies that enabled Arab astronomers and researchers to gain support for space exploration when Middle East governments lacked interest Jorg Matthias Determann shows that the conquest of space became associated with national prestige security economic growth and the idea of an Arab renaissance more generally Equally important to this success were international collaborations to benefit from American and Soviet expertise and technology Arab scientists and officials had to commit to global governance of space and the common interests of humanity Challenging the view that the golden age of Arabic science and cosmopolitanism was situated in the medieval period Determann tells the story of the new discoveries and scientific collaborations taking place from the 19th century to the present day An innovative contribution to Middle East studies and history of science the book also appeals to increased business media and political interest in the Arab space industry

**A Man on the Moon** Andrew Chaikin, 2007-08-28

The authoritative masterpiece L A Times on the Apollo space program and NASA s journey to the moon This acclaimed portrait of heroism and ingenuity captures a watershed moment in human history The astronauts themselves have called it the definitive account of their missions On the night of July 20 1969 our world changed forever when Neil Armstrong and Buzz Aldrin walked on the moon Based on in depth interviews with twenty three of the twenty four moon voyagers as well as those who

struggled to get the program moving A Man on the Moon conveys every aspect of the Apollo missions with breathtaking immediacy and stunning detail A Man on the Moon is also the basis for the acclaimed miniseries produced by Tom Hanks From the Earth to the Moon now airing and streaming again on HBO in celebration of the 50th anniversary of Apollo 11

To Touch the Face of God Kendrick Oliver,2013-01-15 Oliver s study is rigorous and detailed but contemplative in its approach examining the larger meanings of mankind s first adventures in the heavens Suddenly, Tomorrow Came-- Henry C. Dethloff,1993 *Space Education* ,1981 **Congressional Record** United States. Congress,1974 **Astronauts and Cosmonauts Biographical and Statistical Data** ,1994 *Manned Spaceflight* Britannica Educational Publishing,2009-10-01 Space travel is a familiar concept Such was not the case in the early 20th century when the United States and the former Soviet Union were locked in a race to send humans into orbit This book details the history of manned spaceflight from the development of rockets to the advent of space tourism Readers also are introduced to the men and women who have been willing to soar into the great unknown
