History in the Comic Mode Rachel Fulton Brown, Bruce W. Holsinger, 2007-05-01 In this groundbreaking collection twenty one prominent medievalists discuss continuity and change in ideas of personhood and community and argue for the viability of the comic mode in the study and recovery of history These scholars approach their sources not from a particular ideological viewpoint but with an understanding that all topics questions and explanations are viable They draw on a variety of sources in Latin Arabic French German Middle English and more and employ a range of theories and methodologies always keeping in mind that environments are inseparable from the making of the people who inhabit them and that these people are in part constituted by and understood in terms of their communities Essays feature close readings of both familiar and lesser known materials offering provocative interpretations of John of Rupescissa s alchemy the relationship between the living and the saintly dead in Bernard of Clairvaux s sermons the nomenclature of heresy in the early eleventh century the apocalyptic visions of Robert of Uz s Machiavelli s *De principatibus* the role of demotic religiosity in economic development and the visions of Elizabeth of Sch nau Contributors write as historians of religion art literature culture and society approaching their subjects through the particular and the singular rather than through the thematic and the theoretical Playing with the wild possibilities of the historical fragments at their disposal the scholars in this collection advance a new and exciting approach to writing medieval history

Spiritual Alchemy Mike A. Zuber, 2021 *Spiritual Alchemy* traces the early modern antecedents of modern alchemy through generations of followers of Jacob Boehme the cobbler and theosopher of G rlitz Spiritual alchemy combines traditional elements of alchemical literature with Christian mysticism In 1850 it inspired Mary Anne Atwood to write her landmark *Suggestive Inquiry into the Hermetic Mystery* usually seen as the first modern interpretation of alchemy Drawing extensively on manuscript and otherwise obscure sources Zuber challenges the received wisdom that posits a rupture between pre modern and modern forms of alchemy

Intelligence and Wisdom Bing Song, 2021-09-08 This book centers on rethinking foundational values in the era of frontier technologies by tapping into the wisdom of Chinese philosophical traditions It tries to answer the following questions How is the essence underpinning humans nature and machines changing in this age of frontier technologies What is the appropriate ethical framework for regulating human machine relationships What human values

should be embedded in or learnt by AI Some interesting points emerged from the discussions For example the three dominant schools of Chinese thinking Confucianism Daoism and Buddhism invariably reflect non anthropocentric perspectives and none of them places humanity in a supreme position in the universe While many Chinese philosophers are not convinced by the prospect of machine intelligence exceeding that of humans the strong influence of non anthropocentrism in the Chinese thinking contributed to much less panic in China than in the West about the existential risks of AI The thinking is that as human beings have always lived with other forms of existence living with programs or other forms of beings which may become more capable than humans will not inevitably lead to a dystopia Second all three schools emphasize self restraint constant introspection and the pursuit of sage hood or enlightenment These views therefore see the potential risks posed by frontier technologies as an opportunity for the humanity to engage in introspection on the lessons learned from our social and political history It is long overdue that humanity shall rethink its foundational values to take into account a multi being planetary outlook This book consists of nine leading Chinese philosophers reflections on AI s impact on human nature and the human society This is a groundbreaking work which has pioneered the in depth intellectual exploration involving traditional Chinese philosophy and frontier technologies and has inspired multidisciplinary and across area studies on AI philosophy and ethical implications Chapters 1 3 5 7 and 10 are available open access under a Creative Commons Attribution NonCommercial NoDerivatives 4 0 International License via link springer.com

Wilson,Christopher Bamford,Kevin Townley,2007-05 Hermeticism or alchemy is the ancient primordial mystery science of nature through which people in all times and places have for the sake of world evolution sought to unite Heaven and Earth divinity cosmos earth and humanity as a single whole Selfless intimate dedicated to healing and harmony Hermeticism has accompanied and sustained every religious epoch and revelation It may be found in all historical cultures from the traditions of India and China in the East to the Judeo Christian West It could even be said that Hermeticism is the primal cosmological revelation and the common ground of all spiritual traditions Nevertheless in the great revival of mystical esoteric traditions and practices during the last century Hermetic tradition in fact Nature herself has been largely ignored Today when the

Earth seems most under attack Green Hermeticism is especially appropriate The book explores not only the ancient Masters inner science but also their science of Nature During spring and summer 2006 Pir Zia Khan convened a series of gatherings to begin to unfold the contemporary meaning of ancient sacred science for our time Green Hermeticism is a partial record of that meeting Peter Lamborn Wilson explores the many ramifications of the alternative worldview offered by Hermeticism Christopher Bamford provides a broad historical overview of the tradition from the Ancient Mysteries to contemporary manifestations of the alchemical tradition while Kevin Townley brings a practical dimension to the gathering teaching the preparation of herbal elixirs and demonstrating that cosmology and philosophy can become a truly healing path for the Earth Green Hermeticism is necessary reading for anyone seeking a spiritual and cultural path for the healing of the current ecological and cultural crisis In Alchemy there is an injunction to quicken or revive the dead which is illustrated by a dead tree growing verdant again That is exactly what this wonderful and rare work does in awakening human consciousness to its Divine potential and Ultimate Destiny Art thus helps Nature to achieve its ideal Perfection The authors must be congratulated for their insightful words I wholeheartedly recommend reading it again and again and again Stanislas Klossowski de Rola author Alchemy The Secret Art and The Golden Game Alchemical Engravings of the Seventeenth Century Environmental solutions today are largely technical but the planetary crisis is also a crisis of soul or better yet of the Imagination Too tricky for religion too poetic for reductionist science Green Hermeticism reheats a prophetic imagination still in love with the material world a new alchemy of ancient nature Erik Davis author The Visionary State A Journey through California s Spiritual Landscape Just when you felt numb and disenfranchised thinking the world had become bleak and dead along comes this rare much needed book to remind us that there is still some sanity depth and creative energy percolating up from the heart of Reality Thank God and the Goddess Nature for this smart and inspiring breath of fresh air Green Hermeticism is where the wasteland ends and where the world becomes re enchanted with genuine living thought that goes beyond superficialities It s a rare pleasure to be in the presence of living minds who actually know something wonderful and have not been deadened by the opiates of capital or the tenure track Very highly recommended David Fideler publisher Phanes Press editor Alexandria author of Jesus Christ Sun of God and translator of Love s Alchemy Poems from the Sufi Tradition with Sabrineh Fideler The publication of Green Hermeticism has the sense we so rarely get of a genuine moment in cultural history It is not just the eloquence of its authors knowledge and arguments or that they are showing us once again the depth and range and beauty of alchemy and the Hermetic tradition and what Peter Lamborn Wilson calls Romantic Science Nor is it even the links they establish between the Hermetic tradition and ecology and the value of a science that perceives the world as alive rather than a machine What makes this work significant is the sense that it shows us how we can use these ideas and knowledge to create a genuine counter to destruction and despair an alchemy of our politics as well as of our spirit Rachel Pollack author of 78 Degrees of Wisdom A Book of Tarot Green Hermeticism reminds us that the art of the Great Work is to
