Heavenly Knowledge An Astrophysicist Seeks Wisdom In The Stars:

Heavenly Knowledge Fiorella Terenzi, 1998 **Heavenly Knowledge: Astr** Fiorella Terenzi, 1998-03-01 I enthusiastically embrace the fabulous new discoveries of astrophysics but I do not want to stop there I want these discoveries to swim in our imaginations to open our hearts to new ways of thinking and feeling about life about men and women about catastrophes and rituals I want us all to hear how the music of the spheres resonates with the music of our hearts With these words Dr Fiorella Terenzi launches readers on a thrilling emotional and empowering journey that extends from the farthest reaches of space to the innermost secrets of the soul No one can better serve as inspirational teacher and guide on this very personal expedition to humanity's place in the universe Internationally renowned both as an astrophysicist and a recording artist Dr Terenzi performed the first experiment in acoustic astronomy translating radio waves from distant galaxies into audible sound She leads a new movement blending science and art knowledge and emotion Dr Terenzi shows that most of us have heretofore contemplated only portions of the majesty of the cosmos In *HEAVENLY KNOWLEDGE* she presents clear and accessible scientific facts then goes much farther she also makes unique connections between the way we live our daily lives and the vast universe that surrounds us Through her telescope Dr Terenzi brings to life a sensual universe where comets roar through space spreading life like the process of human reproduction the hidden galactic core becomes a metaphor for self knowledge and dying stars act out great truths of being nothingness and rebirth Fracture Copernicus again, 2000-03-31 One of the top three first person books of all time along with Goethe's *The Sorrows of Young Werther* and Salinger's *Catcher in the Rye* J Laine **Diversity, Equity, and Inclusion in Astronomy** Jörg Matthias Determann, 2023-11-14 Astronomy is a field concerned with matters very distant from Earth Most phenomena whether observed or theorized transcend human spaces and timescales by orders of magnitude Yet many scientists have been interested not just in the events that have occurred millennia before Earth's inception but also in their very own society here and now Since the first half of the twentieth century an increasing number of them have pursued parallel careers as both academics and activists Besides publishing peer reviewed papers they have promoted a great variety of underrepresented groups within their discipline Through conferences newsletters and social media they have sought to advance the interests of women members of racial and ethnic minorities LGBTQ and disabled people While these activists have differed in the identities they focus on they have come to share a conviction that diversity and inclusion are crucial for scientific excellence as well as social justice In this book you will read of the biographies and institutional contexts of key agents in the diversification of modern astronomy As most are recent figures whose discoveries have not been commemorated by Nobel Prizes they are relatively unknown among historians of science They have however been central to discussions about who has privileged access to the tools of astronomical inquiry including powerful telescopes and extensive databases As such they have also significantly shaped views of our universe *Across the Great Divide* Wayne Karol, 2004-10-13 Praise for Wayne Karol's *The Sixties as Science*

Fiction An Appreciation of Paul Kantner Easily the best thing I've ever seen written on him and his music and what it all means Jeff Tamarkin author of *Got A Revolution The Turbulent Flight of Jefferson Airplane* One of the finest pieces of writing about music and society that it's been my pleasure to read Bill Parry co editor *Holding Together The Sixties* were such a long time ago why can't America seem to stop re-fighting the battles we fought then Why are we still so bitterly divided Why does so much of what's happening now seem like weird repetitions of the past from the Monica Lewinsky scandal and Watergate to Iraq and Vietnam In *Across the Great Divide* Wayne Karol offers an original and insightful perspective on how we ended up in this mess and what we might be able to do about it It's his duty as a baby boomer to hope that it will change the world

Dancing the Deep Hum, One Woman's Ideas about How to Live in a Dancing, Singing Universe Connie Tyler, 2009-03 In *Dancing the Deep Hum* Connie Pwll examines the sometimes delightful and sometimes painful lessons she has learned in her sixty-five years of life and humbly presents some ideas about how to live life joyfully Weaving in and out between the personal and the public the individual and the whole the universe the infinite and the here and now she searches for the definition of that unnamable something that hums uses her own experiences and other people's stories found in books film and the media to suggest a set of principles for living that just might bring us personal happiness while moving us toward a solution to the world's ecological and social justice problems *American Book Publishing Record Cumulative 1998* R R Bowker

Subject Guide to Books in Print, 1991 **Cultures in Orbit** Lisa Ann Parks, 1998 *Library Journal*, 1998

Cultures in Orbit Lisa Parks, 2005 In 1957 Sputnik the world's first man-made satellite dazzled people as it zipped around the planet By the beginning of the twenty-first century more than eight thousand satellites orbited the Earth and satellite practices such as live transmission direct broadcasting remote sensing and astronomical observation had altered how we imagined ourselves in relation to others and our planet within the cosmos In *Cultures in Orbit* Lisa Parks analyzes these satellite practices and shows how they have affected meanings of the global and the televisual Parks suggests that the convergence of broadcast satellite and computer technologies necessitates an expanded definition of television one that encompasses practices of military monitoring and scientific observation as well as commercial entertainment and public broadcasting Roaming across the disciplines of media studies geography and science and technology studies Parks examines uses of satellites by broadcasters military officials archaeologists and astronomers She looks at *Our World* a live intercontinental television program that reached five hundred million viewers in 1967 and *Imparja* tv an Aboriginal satellite tv network in Australia Turning to satellites remote sensing capabilities she explores the U.S. military's production of satellite images of the war in Bosnia as well as archaeologists use of satellites in the excavation of Cleopatra's palace in Alexandria Egypt Parks's reflections on how Western fantasies of control are implicated in the Hubble telescope's views of outer space point to a broader concern that while satellite uses promise a global village they also cut and divide the planet in ways that

extend the hegemony of the post industrial West In focusing on such contradictions Parks highlights how satellites cross paths with cultural politics and social struggles *Books In Print 2004-2005* Ed Bowker Staff,Staff Bowker, Ed,2004
