The new edition retains the successful structure of the first, with an alphabetical organization providing the basic framework of a coherent collection of connected entries. Conceptual entries explore and explicate all the major issues, theories, and activities in information and library science, such as the economics of information and information management. A wholly new entry on information systems and enhanced entries on the information professions and the information society are key features of this new edition. Topical entries deal with more specific subjects, such as collections management and information services for ethnic minorities. New or completely revised entries include a group of entries on information law and a collection of entries on the Internet and the World Wide Web.
