Hegel And Contemporary Continental Philosophy:

Hegel and Contemporary Continental Philosophy Dennis King Keenan, 2004-06-10 Twenty three of the most important writings by contemporary continental thinkers on the work of Hegel *Hegel and Contemporary Continental Philosophy* ,

The Crisis in Continental Philosophy Robert Piercey, 2009-05-01 Continental philosophy has traditionally seen philosophy as historical claiming that there are no new beginnings in the discipline and that we must revisit the work of earlier thinkers again and again Yet continental philosophers rarely argue explicitly for their view of philosophy's past and the discussions of the topic that exist tend to be riddled with confusion Here Robert Piercey asks why and explores what the continental tradition must do to come to terms with this crisis Piercey traces the confusion about history back to Hegel who he argues sends a mixed message about historical thinking one that is later adopted by Heidegger and then passed on to his successors In addition to telling the story of this crisis Piercey offers an account of historical thinking that does not lead to the difficulties that currently plague the continental tradition The result is a highly original look at the development of continental thought and the nature of philosophy's historical turn **Kierkegaard and Modern Continental Philosophy**

Michael Weston, 2003-05-20 In *Kierkegaard and Modern European Philosophy An Introduction* Michael Weston argues that despite being acknowledged as a precursor to Nietzsche and post Nietzschean thinkers such as Heidegger and Derrida the radical nature of Kierkegaard's critique of philosophy has been missed Weston examines and explains the metaphysical tradition as exemplified by Plato and Hegel and the post metaphysical critiques of Nietzsche Heidegger and Derrida He shows how Kierkegaard's ethical critique of philosophy undermines the former and escapes the latter He considers another ethical critique of philosophy that of Levinas before identifying ethics as the non philosophical site where philosophy can be criticised *Kierkegaard and Modern European Philosophy An Introduction* argues that by refusing to allow philosophy jurisdiction over ethics and religion Kierkegaard's critique applies as much to modern continental thought as to the metaphysical thought it seeks to undermine **An Atheism that Is Not Humanist Emerges in French Thought** Stefanos Geroulanos, 2010-03-08 French philosophy changed dramatically in the second quarter of the twentieth century In the wake of World War I and later the Nazi and Soviet disasters major philosophers such as Kojve Levinas Heidegger Koyr Sartre Merleau Ponty and Hyppolite argued that man could no longer fill the void left by the death of God without also calling up the worst in human history and denigrating the dignity of the human subject In response they contributed to a new belief that man should no longer be viewed as the basis for existence thought and ethics rather human nature became dependent on other concepts and structures including Being language thought and culture This argument which was to be paramount for existentialism and structuralism came to dominate postwar thought This intellectual history of these developments argues that at their heart lay a new atheism that rejected humanism as insufficient and ultimately violent **Contemporary**

Continental Philosophy Stuart Sim, 2017-08-03 This title was first published in 2000 Contemporary continental philosophy

is a widely used but in many ways a highly problematic term and its exact frame of reference is not always clear In its more recent French manifestations in particular it continues to arouse considerable controversy and create bitter divisions with particularly hostile reactions to the work of Derrida and others Much work in the recent continental tradition can be fitted into a longer running philosophical tradition of scepticism and scepticism has always had the power to provoke and unsettle the philosophical establishment Presenting an overview of the philosophical landscape of the continental tradition since the 1940s this book traces the establishment of the new super scepticism as an intellectual paradigm with the power to threaten and disorientate existing world views and more traditional styles of philosophical discourse marking the continental divide Exploring how contemporary continental philosophy from existentialism to postmodernism can be characterised as this new more resistant form of scepticism Sim identifies a clutch of key themes including difference the subject antifoundationalism dialectics which have been obsessively worked over by key thinkers in the Existentialist Postmodernist period and demonstrates how these have contributed to the development of a super sceptical outlook Presenting a new theme led approach to provide an entry into current debates in continental philosophy Stuart Sim reintegrates the work of Sartre into the more recent continental tradition and suggests that something qualitatively different is now occurring in French philosophy

The Future of Hegel Catherine Malabou, 2004-08-26 Published in English for the first time this is one of the most important recent books on Hegel Seeking to restore Hegel's concepts of time and temporality it is essential reading for those interested in contemporary continental philosophy

Thinking About Love Diane Enns, Antonio Calcagno, 2015-11-10 Does love command an ineffability that remains inaccessible to the philosopher Thinking About Love considers the nature and experience of love through the writing of well known Continental philosophers such as Hannah Arendt Simone de Beauvoir Jacques Derrida and Maurice Merleau Ponty Evolving forms of social organization rapid developments in the field of psychology and novel variations on relationships demand new approaches to and ways of talking about love Rather than offering prescriptive claims this volume explores how one might think about the concept philosophically without attempting to resolve or alleviate its ambiguities paradoxes and limitations The essays focus on the contradictions and limits of love manifested in such phenomena as trust abuse grief death violence politics and desire An erudite examination of the many facets of love this book fills a lacuna in the philosophy of this richly complicated topic Along with the editors the contributors are Sophie Bourgault John Caruana Christina M Gschwandtner Marguerite La Caze Alphonso Lingis Christian Lotz Todd May Dawne McCance Dorothea Olkowski Felix Murchadha Fiona Utley and M lanie Walton

Understanding Hegelianism Robert Sinnerbrink, 2014-12-05 Understanding Hegelianism explores the ways in which Hegelian and anti Hegelian currents of thought have shaped some of the most significant movements in twentieth century European philosophy particularly the traditions of critical theory existentialism Marxism and poststructuralism The first part of the book examines Kierkegaard's existentialism and Marx's materialism which present two defining poles of subsequent Hegelian and anti Hegelian

movements The second part looks at the contrasting critiques of Hegel by Lukacs and Heidegger which set the stage for the appropriation of Hegelian themes in German critical theory and the anti Hegelian turn in French poststructuralism The role of Hegelian themes in the work of Adorno Habermas and Honneth are explored In the third part the rich tradition of Hegelianism in modern French philosophy is considered the work of Wahl Kojève Hyppolite Lefebvre Sartre de Beauvoir as well as the radical critique of Hegelianism articulated by Derrida and Deleuze Although the focus is primarily on German and French appropriations of Hegelian thought the author also explores some of the recent developments in Anglophone Hegelianism

The History of Continental Philosophy, 2010 From Kant to Kierkegaard from Hegel to Heidegger continental philosophers have indelibly shaped the trajectory of Western thought since the eighteenth century Although much has been written about these monumental thinkers students and scholars lack a definitive guide to the entire scope of the continental tradition The most comprehensive reference work to date this eight volume History of Continental Philosophy will both encapsulate the subject and reorient our understanding of it Beginning with an overview of Kant's philosophy and its initial reception the History traces the evolution of continental philosophy through major figures as well as movements such as existentialism phenomenology hermeneutics and poststructuralism The final volume outlines the current state of the field bringing the work of both historical and modern thinkers to bear on such contemporary topics as feminism globalization and the environment

Complicated Presence Jussi Backman, 2015-03-16 From its Presocratic beginnings Western philosophy concerned itself with a quest for unity both in terms of the systematization of knowledge and as a metaphysical search for a unity of being two trends that can be regarded as converging and culminating in Hegel's system of absolute idealism Since Hegel however the philosophical quest for unity has become increasingly problematic Jussi Backman returns to that question in this book examining the place of the unity of being in the work of Heidegger Backman sketches a consistent picture of Heidegger as a thinker of unity who throughout his career in different ways attempted to come to terms with both Parmenides's and Aristotle's fundamental questions concerning the singularity or multiplicity of being attempting to do so however in a postmetaphysical manner rooted in rather than above and beyond particular situated beings Through his analysis Backman offers a new way of understanding the basic continuity of Heidegger's philosophical project and the interconnectedness of such key Heideggerian concepts as ecstatic temporality the ontological difference the turn Kehre the event Ereignis the fourfold Geviert and the analysis of modern technology

The Relevance of Hegel's Concept of Philosophy Luca Illetterati, Giovanna Miolli, 2021-12-16 In a systematic treatment of Hegel's concept of philosophy and all of the different aspects related to it this collection explores how Hegel and his understanding of his discipline can be put into dialogue with current metaphilosophical inquiries and shed light on the philosophical examination of the nature of philosophy itself Taking into account specific aspects of Hegel's elaboration on philosophy such the scientificity of philosophy as a self grounding rational process and his explanation of the relationship between philosophy and the history of philosophy an

international line up of contributors consider Hegel's concept of philosophy in general from skepticism idealism history and difference to time politics and religion The relation of Hegel's concept of philosophy to other philosophical traditions and philosophers including Kant Fichte Schelling and Jacobi Hegel's concept of philosophy with reference to philosophy's relation to other forms of rationality and disciplines The relation of Hegel's concept of philosophy to specific issues in present metaphilosophical debates Reflecting the renewed and widespread interest in Hegel seen in Analytic philosophy and Continental thought this volume advances study of Hegel's conceptual tools and provides new readings of traditional philosophical problems

Hegel and Resistance Bart Zantvoort, Rebecca Comay, 2017-12-28 The concept of resistance has always been central to the reception of Hegel's philosophy The prevalent image of Hegel's system which continues to influence the scholarship to this day is that of an absolutist monist metaphysics which overcomes all resistance subsuming or assimilating all differences into a single organic Whole For that reason the reception of Hegel has always been marked by the question of how to resist Hegel how to think that which remains outside of or other to the totalizing system of dialectics In recent years the work of scholars such as Catherine Malabou Slavoj Žižek Rebecca Comay and Frank Ruda has brought considerable nuance to this debate A new reading of Hegel has emerged which challenges the idea that there is no place for difference otherness or resistance in Hegel both by refusing to reduce Hegel's complex philosophy to a straightforward systematic narrative and by highlighting particular moments within Hegel's philosophy which seem to counteract the traditional understanding of dialectics This book brings together established and new voices in this field in order to show that the notion of resistance is central to this revaluation of Hegel

Continental Philosophy: A Very Short Introduction Simon Critchley, 2001-02-22 Critchley discusses the ideas and approaches of philosophers such as Kant Hegel Nietzsche and Husserl and introduces key concepts such as existentialism nihilism and phenomenology by explaining their place in the continental tradition

Continental Philosophy Andrew Cutrofello, 2004-03 Continental Philosophy A Contemporary Introduction looks at the development of the tradition tracing it back from Kant to the present day

The Future of Hegel Catherine Malabou, 2005 Published in English for the first time this is one of the most important recent books on Hegel Seeking to restore Hegel's concepts of time and temporality it is essential reading for those interested in contemporary continental philosophy

Transcendence and the Concrete Jean Wahl, 2016-11-01 Jean Wahl 1888-1974 once considered by the likes of Georges Bataille Gilles Deleuze Emmanuel Levinas and Gabriel Marcel to be among the greatest French philosophers has today nearly been forgotten outside France Yet his influence on French philosophical thought can hardly be overestimated Levinas wrote that during over a half century of teaching and research Wahl was the life force of the academic extra academic and even to a degree anti academic philosophy necessary to a great culture And Deleuze for his part commented that Apart from Sartre who remained caught none the less in the trap of the verb to be the most important philosopher in France was Jean Wahl Besides engaging with the likes of Bataille Bergson Deleuze Derrida Levinas Maritain

and Sartre Wahl also played a significant role in some cases almost singlehandedly in introducing French philosophy to movements like existentialism and American pragmatism and literature and thinkers like Hegel Kierkegaard Nietzsche Jaspers and Heidegger Yet Wahl was also an original philosopher and poet in his own right This volume of selections from Wahl's philosophical writings makes a selection of his most important work available to the English speaking philosophical community for the first time Jean Wahl was Professor of Philosophy at the Sorbonne from 1936 to 1967 save during World War II which he spent in the United States having escaped from the Drancy internment camp His books to appear in English include *The Pluralist Philosophies of England and America* Open Court 1925 *The Philosopher's Way* Oxford UP 1948 *A Short History of Existentialism* Philosophical Library 1949 and *Philosophies of Existence* Schocken 1969

Continental Philosophy of Science Gary Gutting, 2008-04-15 Continental Philosophy of Science provides an expert guide to the major twentieth century French and German philosophical thinking on science A comprehensive introduction by the editor provides a unified interpretative survey of continental work on philosophy of science Interpretative essays are complemented by key primary source selections Includes previously untranslated texts by Bergson Bachelard and Canguilhem and new translations of texts by Hegel and Cassirer Contributors include Terry Pinkard Jean Gayon Richard Tieszen Michael Friedman Joseph Rouse Mary Tiles Hans J. Rheinberger Linda Alcoff Todd May Axel Honneth and Penelope Deutscher

Hegel's 'Phenomenology of Spirit' Stephen Houlgate, 2013-01-10 First published in 1801 Hegel's *Phenomenology of Spirit* has exercised considerable influence on subsequent thinkers from Marx and Kierkegaard to Heidegger Kojve Adorno and Derrida

Heidegger Jacques Derrida, 2016-06-16 Few philosophers held greater fascination for Jacques Derrida than Martin Heidegger and in this book we get an extended look at Derrida's first real encounters with him Delivered over nine sessions in 1964 and 1965 at the cole Normale Supérieure these lectures offer a glimpse of the young Derrida first coming to terms with the German philosopher and his magnum opus *Being and Time* They provide not only crucial insight into the gestation of some of Derrida's primary conceptual concerns indeed it is here that he first uses with some hesitation the word deconstruction but an analysis of *Being and Time* that is of extraordinary value to readers of Heidegger or anyone interested in modern philosophy Derrida performs an almost surgical reading of the notoriously difficult text marrying pedagogical clarity with patient rigor and acting as a lucid guide through the thickets of Heidegger's prose At this time in intellectual history Heidegger was still somewhat unfamiliar to French readers and *Being and Time* had only been partially translated into French Here Derrida mostly uses his own translations giving his own reading of Heidegger that directly challenges the French existential reception initiated earlier by Sartre He focuses especially on Heidegger's *Destruktion* which Derrida would translate both into solicitation and deconstruction of the history of ontology and indeed of ontology as such concentrating on passages that call for a rethinking of the place of history in the question of being and developing a radical account of the place of metaphoricity in Heidegger's thinking This is a rare window onto Derrida's formative years and in it

we can already see the philosopher we've come to recognize one characterized by a bravura of exegesis and an inventiveness of thought that are particularly and singularly his
