**Hegelian/Whiteheadian Perspectives** Darrel E. Christensen, 1989 *Hegel and Whitehead* George R.

Lucas, 1986-01-01 Hegel and Whitehead presents a careful exploration of the similarities between these two formidable representatives of systematic philosophy. Some of the most distinguished scholars in European and American philosophy converge herein to explore the similarities in Hegel's and Whitehead's contemporary influence as well as in the content of their respective systems and in their philosophical styles. This volume begins with important critical comparative and historical assessments of the contemporary problems in metaphysics, philosophy of science, philosophy of mind, ethics, social thought, and philosophy of religion, of history, and of culture, against the background of the important contributions made to these discussions by both Hegel and Whitehead. The result is a collection of vigorous new essays in systematic philosophy that reflect the enduring contributions of these two philosophers to the contemporary philosophical climate on two continents.

The Search for Concreteness Darrel E. Christensen, 1986-09 Presents a methodological basis for a philosophy of concrete actuality. Also breaks new ground in its mediation between two varied traditions of speculative philosophy.

Signs, Solidarities, & Sociology Blasco José Sobrinho, 2001-07-17 Signs, Solidarities, Sociology addresses the formation and fragmentation of identity in today's postmodern world. Informed by the conceptual convergence in the theories of Durkheim, Peirce, Mead, and Lacan, this book surveys the range of twentieth-century sociology to deconstruct those favored nostrums of subjective meaning, personal power, and autonomous selfhood that comprise its semantics of agency. Revealed beneath this semantic screen is the triad of pragmatic codes: premodern affiliation, modern calibration, and postmodern globalization that govern the social construction of the self. While the ill-comprehended confluence of these three signification codes in the present world situation can indeed fragment personal identity, their formal structural linkages, as shown in this book, may inform a truly postmodern, globally applicable science of culture.

**Hegel, History, and Interpretation** Shaun Gallagher, 1997-06-30 Hegel, History, and Interpretation is a collection of essays that extends critical discussions of Hegel into contemporary debates about the nature of interpretation and theories of philosophical hermeneutics. Essays by Susan Armstrong, John D. Caputo, William Desmond, Robert Dostal, Shaun Gallagher, Philip T. Grier, H. S. Harris, Walter Lammi, George R. Lucas Jr., Michael Prosch, Thomas Rockmore, and E. Christopher Smith explore difficult issues concerning historical interpretation, the nature of hermeneutics at the end of metaphysics, the social and critical function of reason, and the inadequacy of Hegel's interpretation of the experience of otherness. In the course of these essays, Hegel is made to converse with Kierkegaard, Nietzsche, and Heidegger, as well as with contemporary theorists such as Gadamer, Habermas, Foucault, and Derrida. Thus, the contributors explore both the themes that form the common ground between Hegelian philosophy and contemporary interpretation theory and the mixed reception of Hegel's philosophy into contemporary discussions about history, deconstruction, critical theory, and alterity.

Education from a Whiteheadian Point of View Vesselin

Petrov,2019-03-28 The basic aims of contemporary thinking in education are to cultivate a proper comprehension of the meaning and purpose of education and the role of the teacher and to develop adequate theoretical and methodological frameworks that combine some of the positive sides of the leading theories while avoiding their disadvantages Toward these ends one excellent candidate for consideration is Alfred North Whitehead s 1861 1947 process relational philosophy of education as set forth in *The Aims of Education* 1929 and elsewhere The contributors to this volume analyze Whitehead s philosophy of education in a detailed and critical fashion including inquiring into the development of cycle based approaches to education like Whitehead s in intellectual history as well as its potential objective bases They also demonstrate how this relates to and can be integrated with other leading theories of education and contemporary pedagogical thinking and identify avenues for its positive practical application in schooling across the globe as well as in scientific research The book further critically evaluates current educational practices and the organization of educational institutions in this light and the effectiveness of teaching strategies that are founded upon some of its principles while also exploring the ramifications of its selection and application in education for society in general as well as for our common civilizational aspirations including humanity s addressing of global problems such as the ecological crisis In addition the volume also serves to lay some of the groundwork for its potential further development

**Intensity** Judith A. Jones, 1998. A challenging iconoclastic study that makes clear the underlying unity of Whitehead's vision of the world. This important and provocative book on the work of Alfred North Whitehead (1861-1947) explores how his avowed atomism is consistent with his equally essential commitment to a view of reality as a thoroughly interconnected sphere of relations. Judith Jones challenges Whitehead's readers to reconsider certain prevailing interpretations of his organic philosophy. To Jones, a rereading of Whitehead's overall philosophic project is essential to evaluating his contributions to metaphysics and ontology. Since Whitehead's basic worldview is holistic, a return to viewing Whitehead's work as a whole helps clarify his ontological intentions and contributions to metaphysics. For this purpose, the concept of intensity, which Jones defines as the quality and form of feeling involved in subjective experience, is basic to Whitehead's thinking about process at all naturalistic levels and is therefore particularly useful as a lens through which to view his entire system. Intensity is at once Whitehead's most basic metaphysical idea and a notion useful in deciphering the overall unity of purpose in his writings. A central aim of this book is to develop an aesthetically sensitive sense of being that demonstrates the profound and original contributions of process philosophy to realism. Jones shows that a thorough understanding of the concept of intensity yields modes of thought that help overcome knotty problems in conceiving Whitehead's distinction between the private experience of individuals and the public relations those individuals experience in relationship to other entities. Drawing frequently on poetic allusions to aid her interpretations, she focuses specifically on the status of intensity in intellectual and moral experience and develops an ethics of attention as an elaboration of Whitehead's aesthetic metaphysics. The result is a book that should be enthusiastically greeted and debated by scholars of Whitehead and by all who are interested in the field of process thought, including students of theology, literature, and feminist studies. Jones's unorthodox conclusions, backed up with scrupulous attention to both the Whitehead canon and related secondary literature, present challenges to accepted interpretations that cannot be ignored.

*Being and Dialectic* William Desmond, Joseph Grange, 2000-07-20. Diverse voices explore the possibility of doing metaphysics in light of contemporary critiques.

**Propositions in the Making** Roland Faber, Michael Halewood, Andrew M. Davis, 2019-11-13. How do we make ourselves a Whiteheadian proposition? This question exposes the multivalent connections between postmodern thought and Whitehead's philosophy, with particular attention to his understanding of propositions. Edited by

Roland Faber Michael Halewood and Andrew M Davis Propositions in the Making articulates the newest reaches of Whiteheadian propositions for a postmodern world It does so by activating interdisciplinary lures of feeling living and co creating the world anew Rather than a logical assertion Whitehead described a proposition as a lure for feeling for a collectivity to come It cannot be reduced to the verbal content of logical justifications but rather the feeling content of aesthetic valuations In creatively expressing these propositions in wide relevance to existential ethical educational theological aesthetic technological and societal concerns the contributors to this volume enact nothing short of a Whiteheadian Laboratory

Ruminations: Selected Philosophical, Historical, and Ideological Papers, Volume 1, Part 2. The Finite Eric v.d. Luft,2020-09-13 Since the 1970s I have pursued three separate but overlapping and sometimes simultaneous careers 1 philosopher writer teacher historian of the long nineteenth century 1789 1914 2 editor translator photographer publisher biographer encyclopedist 3 cataloging librarian rare books and special collections librarian historian of medicine Somehow these three vocations have garnered me some acclaim even an entry in Who's Who in America Each of them has resulted in some published or presented works Because these works have been scattered in a wide variety of venues some of which have gone out of print or have otherwise become generally unavailable and of course with the oral presentations being gone as soon as they are given I have thought it wise to select epitomize and bring them together in one place here Thus what follows in these volumes is what I consider to be the most important of my shorter works All translations are my own unless otherwise indicated

**Dictionary Of Modern American Philosophers** John R. *Marx and Whitehead* Anne Fairchild Pomeroy,2012-02-01

Marx and Whitehead boldly asks us to reconsider capitalism not merely as an economic system but as a fundamentally self destructive mode that by its very nature and operation undermines the cohesive fabric of human existence Author Anne Fairchild Pomeroy asserts that it is impossible to appreciate fully the impact of Marx s critique of capitalism without understanding the philosophical system that underlies it Alfred North Whitehead s work is used to forge a systematic link between process philosophy and dialectical materialism via the category of production Whitehead s process thought brings Marx s philosophical vision into sharper focus This union provides the grounds for Pomeroy s claim that the heart of Marx s critique of capitalism is fundamentally ontological and that therefore the necessary condition for genuine human flourishing lies in overcoming the capitalist form of social relations *The Ethics of Creativity* Brian G. Henning, 2011-12-09 Foreword by Daniel A Dombrowski A central concern of nearly every environmental ethic is its desire to extend the scope of direct moral concern beyond human beings to plants nonhuman animals and the systems of which they are a part Although nearly all environmental philosophies have long since rejected modernity s conception of individuals as isolated and independent substances few have replaced this worldview with an alternative that is adequate to the organic processive world in which we find ourselves In this context Brian G Henning argues that the often overlooked work of Alfred North Whitehead has the potential to make a significant contribution to environmental ethics Additionally inspired by classical American philosophers such as William James John Dewey and Charles Sanders Pierce and environmental philosophers such as Aldo Leopold Peter Singer Albert Schweitzer and Arne Naess Henning develops an ethical theory of which the seminal insight is called The Ethics of Creativity By systematically examining and developing a conception of individuality that is equally at home with the microscopic world of subatomic events and the macroscopic world of ecosystems The Ethics of Creativity correctly emphasizes the well being of wholes while not losing sight of the importance of the unique centers of value that constitute these wholes In this way The Ethics of Creativity has the potential to be a unique voice in contemporary moral philosophy

Perspective in Whitehead's Metaphysics Stephen David Ross, 1983-06-30 Stephen David Ross presents an extensive detailed and critical interpretation of Whitehead's mature thought emphasizing the fundamental role of perspective in Whitehead's cosmology and tracing the conflicts and difficulties therein to tensions involving perspective in relation to other central features of Whitehead's thought Ross isolates four principles as having a fundamental role in Whitehead's metaphysics perspective cosmology experience and mechanical analysis He argues that many of Whitehead's difficulties can be eliminated by raising the principle of perspective to prominence and by revising the other central features of Whitehead's theory accordingly This book addresses key Whiteheadian texts and secondary interpretations of Whitehead The discussion ranges over most of Whitehead's theory in Process and Reality and offers a number of significant and in some cases novel views on different aspects of Whitehead's theory perception prehension causation objective immortality self causation the extensive continuum natural order possibility concreteness and God Ross's concluding suggestions for modifying Whitehead's system promise to occasion much debate among process philosophers theologians and anyone concerned with Whitehead's thought
