development of intellectual property as a new type of legal property in the modern nation state system In its current form intellectual property is considered part of an infrastructure of state power that incentivizes innovation creativity and scientific development all engines of economic growth To show how this infrastructure of power emerged Laura Ford follows macro historical social theorists including Michael Mann and Max Weber back to antiquity revealing that legal instruments very similar to modern intellectual property have existed for a long time and have also been deployed for similar purposes Using comparative and historical evidence this groundbreaking work reflects on the role of intellectual property in our contemporary political communities and societies on the close relationship between law and religion and on the extent to which law's obliging force depends on ancient written traditions *The Oxford World History of Empire* Peter Fibiger Bang, C. A. Bayly, Walter Scheidel, 2020-12-02 This is the first world history of empire reaching from the third millennium BCE to the present By combining synthetic surveys thematic comparative essays and numerous chapters on specific empires its two volumes provide unparalleled coverage of imperialism throughout history and across continents from Asia to Europe and from Africa to the Americas Only a few decades ago empire was believed to be a thing of the past now it is clear that it has been and remains one of the most enduring forms of political organization and power We cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods such as the relatively short age of European colonialism The history of empire as these volumes amply demonstrate needs to be drawn on the much broader canvas of global history Volume Two *The History of Empires* tracks the protean history of political domination from the very beginnings of state formation in the Bronze Age up to the present Case studies deal with the full range of the historical experience of empire from the realms of the Achaemenids and Asoka to the empires of Mali and Songhay and from ancient Rome and China to the Mughals American settler colonialism and the Soviet Union Forty five chapters detailing the history of individual empires are tied together by a set of global synthesizing surveys that structure the world history of empire into eight chronological phases *The Cambridge World History: Volume 3, Early Cities in Comparative Perspective, 4000 BCE-1200 CE* Norman Yoffee, 2015-03-19 From the fourth millennium BCE to the early second millennium CE the world became a world of cities This volume explores this critical transformation from the appearance of the earliest cities in Mesopotamia and Egypt to the rise of cities in Asia and the Mediterranean world Africa and the Americas Through case studies and comparative accounts of key cities across the world leading scholars chart the ways in which these cities grew as nodal points of pilgrimages and ceremonies exchange storage and redistribution and centres for defence and warfare They show how in these cities along with their associated and restructured countrysides new rituals and ceremonies connected leaders with citizens and the gods new identities as citizens were created and new forms of power and sovereignty emerged They also examine how this unprecedented concentration of people led to disease violence slavery and subjugations of unprecedented kinds and scales
