Ecology Of The Nitrogen Cycle:

The Ecology of the Nitrogen Cycle Janet I. Sprent, 1987-12-10 Many people learn the rudiments of the nitrogen cycle while at school but the details of the various processes in the cycle are still not widely understood Some of them are of great current interest such as the use of nitrogen fixing crops to feed an increasing world population and the problems of pollution of groundwaters by nitrates Denitrification forming nitrogen gas as a way of getting rid of waste from human and intensively farmed animals This book describes the general processes of the nitrogen cycle then gives examples of how the cycle is modified under particular ecological and geographical conditions These examples are drawn from all the major areas of the world and the impact of man via agriculture forestry and fuel combustion is discussed Numerous references are included The book provides a background for all those whose specialist interests interact with nitrogen cycling whether they are involved in research or have responsibility for managing the environment

Nitrogen Cycle Jesus Gonzalez-Lopez, Alejandro Gonzalez-Martinez, 2021-07-22 Anthropogenic activity has clearly altered the N cycle contributing among other factors to climate change This book aims to provide new biotechnological approach representing innovative strategies to solve specific problems related to the imbalance originating in the N cycle Aspects such as new conceptions in agriculture wastewater treatment and greenhouse gas emissions are discussed in this book with a multidisciplinary vision A team of international authors with wide experience have contributed up to date reviews highlighting scientific principles and their environmental importance and integrating different biotechnological processes in environmental technology

Nitrogen Fixation in Agriculture, Forestry, Ecology, and the Environment Dietrich Werner, William E. Newton, 2006-01-20 Sustainability has a major part to play in the global challenge of continued development of regions countries and continents all around the World and biological nitrogen fixation has a key role in this process This volume begins with chapters specifically addressing crops of major global importance such as soybeans rice and sugar cane It continues with a second important focus agroforestry and describes the use and promise of both legume trees with their rhizobial symbionts and other nitrogen fixing trees with their actinorhizal colonization An over arching theme of all chapters is the interaction of the plants and trees with microbes and this theme allows other aspects of soil microbiology such as interactions with arbuscular mycorrhizal fungi and the impact of soil stress factors on biological nitrogen fixation to be addressed Furthermore a link to basic science occurs through the inclusion of chapters describing the biogeochemically important nitrogen cycle and its key relationships among nitrogen fixation nitrification and denitrification The volume then provides an up to date view of the production of microbial inocula especially those for legume crops

Soil Nitrogen Ecology Cristina Cruz, Kanchan Vishwakarma, Devendra Kumar Choudhary, Ajit Varma, 2021-05-24 This book highlights the latest discoveries about the nitrogen cycle in the soil It introduces the concept of nitrogen fixation and covers important aspects of nitrogen in soil and ecology such as its distribution and occurrence soil microflora and fauna and their role in N fixation The importance of plant growth promoting microbes for a

sustainable agriculture e g arbuscular mycorrhizae in N fixation is discussed as well as perspectives of metagenomics

Ivanovich Kuznetsov,Sergej I. Kuznecov,1983 New Perspectives on Nitrogen Cycling in the Temperate and Tropical
Americas Alan R. Townsend,2012-12-06 Inputs of nitrogen to terrestrial and aquatic ecosystems have increased several fold
over the last one hundred and fifty years with the steepest increases during the last four decades The expansion of fertilizer
manufacture and use the increase in fossil fuel combustion the intensification of animal husbandry and widespread
cultivation of N₂ fixing crops have all contributed to the dramatic increase in N inputs The increase has been most rapid in
Northern Hemisphere NH temperate ecosystems but presently subtropical and tropical regions of Asia are also experiencing
an explosive increase in N inputs to terrestrial ecosystems W Chameides pers comm Galloway et al 1996 Projected increases
in N deposition for these tropical and subtropical regions with a high natural background of N inputs exceed increases
projected for temperate and arctic regions Cleveland et al submitted Galloway et al 1994 Holland Lamarque 1997a
Compared to biological N fixation N deposition is becoming a proportionately greater source of N to terrestrial and aquatic
ecosystems worldwide Vitousek et al 1997 6 The nitrogen contained in the atmosphere as N_{3.9} 10 Tg Tg 2 12 10 g is the
largest reservoir of N in the Earth system Warneck 1988 However this paper focuses on the nitrogen emissions and
deposition that have been transformed from N₂ into reactive forms that are biologically available e g Vitousek et al 1997
