Ecology Of Tropical Food Crops:

The Ecology of Tropical Food Crops M. J. T. Norman, C. J. Pearson, P. G. E. Searle, 1995-05-18 In tropical developing countries farmers tend to grow a wide range of crops in a small area for subsistence or sale To make full use of often limited resources a good understanding of how environmental conditions affect the characteristics and performance of these crops is essential This book considers the response of tropical food crops to environmental factors such as climate soil and farming system Three types of crop are considered cereals legumes and non cereal energy crops with individual chapters on the four most important crops in each group This material is set in context by introductory chapters on tropical farming systems tropical climates and tropical soils This new updated edition retains the successful formula of the first edition while placing additional emphasis on tropical environmental conservation It will serve the needs of advanced students of tropical agriculture as well as professionals engaged in research and extension work in tropical crop production *Ecology of Tropical Food Crops* M. J. T. Norman, 1984-08-30 **The Ecology of Tropical Food Crops** M. J. T. Norman, C. J. Pearson, P. G. E. Searle, 1995-05-18 Retaining the successful formula of the first edition while placing additional emphasis on tropical environmental conservation this new updated edition considers the response of tropical food crops to environmental factors such as climate soil and farming system **The Ecology of Intercropping** John H. Vandermeer, 1992-08-20 This study shows how classical ecological principles especially those relating to competition and population ecology can be applied to growing two or more crops together and how the approach can improve agricultural yields **Ecology of Kalimantan** Kathy MacKinnon, Gusti Hatta, 2013-02-05 The Ecology of Kalimantan is a comprehensive ecological survey of one of Indonesia s largest and most diverse islands This book presents a complete summary of our current scientific knowledge about Borneo including the rainforest and riverine habitats that are endangered by logging and industrial development along with a discussion of land use patterns and current problems Kalimantan is the Indonesian portion of the huge island of Borneo Kalimantan has played a key role in Indonesia s economic development and is a major earner of foreign revenue due to the island s rich natural resources forests oil gas coal and other minerals In this book the authors argue that Kalimantan can be developed but within tight ecological constraints and with great care This book remains a standard reference for scientists anthropologists writers and anyone interested in the region *Agricultural Ecology* Joy Tivy, 2014-10-13 This book analyses the nature of the relationships between crops livestock and the bio physical environment and the extent to which man has managed and modified the products and environment to suit his her own particular needs *Innovation In African Agriculture* Arthur J. Dommen, 2019-04-10 This book looks at the input output relations of low resource agriculture in Africa and shows how the intensification process through the application of modern technologies can work successfully to raise productivity and to sustain production over the long term **Agrometeorology of Multiple Cropping in Warm Climates** C. J. Stigter, Fundamental, Ecological and Agricultural Aspects of Nitrogen Metabolism in Higher Plants J.T. Lambers, G.

Stulen, J. J. Neeteson, 2012-12-06 Rinie Hofstra has been a member of the Department of Plant Physiology University of Groningen the Netherlands for 24 years The nearer we came to 31 March 1985 her 65th birthday the more we all realized how we would miss her not only scientifically but also socially She left her mark on both research and teaching always with an open mind and willing to change After her PhD Thesis on Nitrogen Metabolism in Tomato Plants she first continued working in that field but soon started a joint project with the Department of Plant Ecology on hemiparasites She then became involved in carbon metabolism which resulted in her giving a Biotrop Course on C C metabolism in 3 4 Indonesia Her own research group originally working on Nitrogen Metabolism soon embraced Energy and Nitrogen Metabolism as the research on respiration became more and more important In running her group she showed all sides of her person She used to stimulate and encourage everyone around her and to integrate the various lines of research At the same time she always had an open mind for the opinion of all members of her group And together they regularly criticized and evaluated the various projects and decided how to continue

Crop Adaptation to

Climate Change Shyam Singh Yadav,Robert J. Redden,Jerry L. Hatfield,Hermann Lotze-Campen,Anthony E. Hall,2011-08-02

A major task of our time is to ensure adequate food supplies for the world s current population now nearing 7 billion in a sustainable way while protecting the vital functions and biological diversity of the global environment The task of providing for a growing population is likely to be even more difficult in view of actual and potential changes in climatic conditions due to global warming and as the population continues to grow Current projections suggest that the world s temperatures will rise 1 8 4 0 by 2100 and population may reach 8 billion by the year 2025 and some 9 billion by mid century after which it may stabilize This book addresses these critical issues by presenting the science needed not only to understand climate change effects on crops but also to adapt current agricultural systems particularly in regard to genetics to the changing conditions Crop Adaptation to Climate Change covers a spectrum of issues related to both crops and climatic conditions The first two sections provide a foundation on the factors involved in climate stress assessing current climate change by region and covering crop physiological responses to these changes The third and final section contains chapters focused on specific crops and the current research to improve their genetic adaptation to climate change Written by an international team of authors Crop Adaptation to Climate Change is a timely look at the potentially serious consequences of climate change for our global food supply and is an essential resource for academics researchers and professionals in the fields of crop science agronomy plant physiology and molecular biology crop consultants and breeders as well as climate and food scientists

Agricultural Plants R. H. M. Langer, G. D. Hill, 1991-11-14 The future of mankind depends on ever increasing agricultural production to provide food fibre fuel and other essential commodities This can only be achieved through a sound knowledge of the plants which feature prominently in agriculture This book describes these plants in detail together with the products which are obtained from them The opening chapter on world population and food supply is followed by a general introduction to plant structure The major part of the book then considers economically important field crops and pasture plants of temperate and subtropical regions on a family by family basis Fruit crops flowers and trees are not considered The book concludes with a discussion of physiological principles of crop growth and yield This is an introductory text suitable for the teaching of agricultural botany to undergraduate students and is intended to bridge the gap between classical botany and agronomy

The Future of Amazonia A. Hall, D. Goodman, 1991-01-12 The future of Brazilian Amazonia the world's largest remaining tropical rainforest hangs in the balance Two decades of destructive development have provoked violent struggles for control over the region's resources with disastrous social and environmental consequences This multi disciplinary collection reviews past experience but focusses on the latest phase of Amazonian settlement Chapters by leading authorities examine such issues as colonisation in the most recent frontier areas multinational mining projects hydro electric schemes and the military occupation of Brazil's borders After demonstrating how new government and business activities have exacerbated social tensions and ecological destruction the volume considers alternative more sustainable strategies
