Economic Social Progreb In Latin Am:

Social Change and Social Development Policy in Latin America United Nations. Economic Commission for Latin America,1970 Slovenia Cathie Carmichael,1996 **Dictionary Catalog of the Research Libraries of the New York Public Library, 1911-1971** New York Public Library. Research Libraries,1979 **Living and Working in Poverty in Latin America** María Eugenia Rausky,Mariana Chaves,2018-12-07 This edited volume studies the complex interrelation of poverty work and different stages in the life course and how it contributes to the permanent existence of poverty and inequality in vulnerable groups in society Mechanisms of productions and reproduction of these relationships are identified through empirical research carried out in four Latin American countries Mexico Argentina Brazil and Cuba This book centers on the experiences of individuals in those less favored social groups who may have suffered structural poverty for decades or who may have been simply deprived of a basic income to cover their most essential needs Social Equity and Changing Production Patterns United Nations. Economic Commission for Latin America and the Carribbean,1992 Economic and Social Progress in Latin America Inter-American Development Bank,2007 *Towards Universal Social Protection* Simone Cecchini,Fernando Filgueira,2015 **Ageing, Solidarity and Social Protection in Latin America and the Caribbean** Sandra Huenchuan Navarro,2013 This publication aims to contribute to the research analysis and design of proposals for the social protection of older persons It develops a new conceptual approach and uses various indicators for its assessment in the areas of social security health and social services All human beings must be able to avail themselves of equal rights without discrimination and these rights must be enforced through serious strategic and sustainable commitments which accommodate both present and long term challenges Only then will it be possible to develop an approach which includes each and every citizen and contributes to their well being and security so that they can make full use of their capacities regardless of their age or economic activity Social Prerequisites to Economic Growth in Latin America and South East Asia Manning Nash,1963 **Social Programmes, Poverty Eradication and Labour Inclusion** Laís Wendel Abramo,Simone Cecchini,Beatriz Morales,2019 Diverse social programmes including conditional cash transfer programmes labour and production inclusion programmes and social pensions are being implemented in Latin American and Caribbean countries with the aim of ending poverty and reducing inequalities throughout the life cycle This book offers an up to date analysis of these programmes and the way they relate to labour inclusion and analyses ongoing debates regarding the possible incentives and disincentives they create in terms of the labour supply formalization and child labour among the target population Considering that poverty is a structural problem of highly unequal societies the thesis that poverty is due to a lack of effort on the part of the poor is argued to be an expression of the strong prejudice against those living in poverty the great majority of whom work or are actively seeking employment but are hampered by the large decent work deficits existing in the region From an integrated and rights based perspective public policies should simultaneously address the twofold

challenge of social and labour inclusion in order to achieve basic thresholds of well being by ensuring income universal access to good quality social services and opportunities for decent work

From Social Policy to an Open-Economy Social Contract in Latin America Nancy Birdsall, 2008 After a decade of economic and political reforms that dramatically altered the structure of economies in Latin America poverty and high inequality remain deeply entrenched Integration into the global economy in the 1990s brought increased prosperity only to a small minority of households in most countries primarily those in which adults had some university education The reforms in themselves did not hurt the poor but they left behind both the poor using the international definition of those living on less than 2 a day but the great majority of middle income households who are as I show surprisingly poor by Western middle class standards What does this imply for future social policy in the region I suggest in this paper the logic of going beyond the standard poverty targeted elements of good social policy to a modern social contract adapted to the demands and the constraints of an open economy A modern open economy social contract would extend current social policy in two ways First it would be explicitly based on broad job based growth Second it would be politically and economically directed not only at the currently poor but at the near poor and economically insecure middle income strata I discuss critical elements of an open economy social contract These include unusually good fiscal policy increasing effective taxation of the rich making job mobility an explicit public policy goal and a regional strategy for better access to rich country markets

Crafting Sustainable Social Contracts in Latin America Carol Graham, Center on Social and Economic Dynamics, Brookings Institution, Johns Hopkins University, 2002

Social Consequences of Economic Development Everett W. Reimer, 1963 *Mexico's Progreso-Oportunidades and the Emergence of Social Assistance in Latin America* Miguel Niño-Zarazúa, 2010 The Crisis of Social Development, 1987 *The Social Inequality Matrix in Latin America*, 2016

Social inequality is at the heart of the 2030 Agenda for Sustainable Development For Latin America the world's most unequal region social inequality also represents a structural feature and therefore a fundamental challenge In response to the mandate conferred upon the Economic Commission for Latin America and the Caribbean ECLAC by the countries at the Regional Conference on Social Development in Latin America and the Caribbean held in Lima in November 2015 this document pursues the analysis of the social inequality matrix in the region The analysis focuses on some of the main axes that serve to structure social inequality gender ethnicity race age or stage of the life cycle and territory in order to illustrate how they influence the depth of the equality gaps their persistence over time and their reproduction Often the multiple dimensions of inequality concatenate intersect and exacerbate one other hitting certain population groups harder than others The analysis of the multiple dimensions must be taken on board and developed further if the countries are to advance along the path towards sustainable development On the basis of this analysis the document concludes with several policy recommendations which include the need to build linkages between economic production labour social and environmental policies apply a comprehensive rights based approach to policies on combating

inequality strengthen institutions and forge social compacts as the foundation of good quality social policies protect social spending and tax revenues allocated to social development and increase statistical capabilities to give visibility to the different dimensions of inequality and advance their understanding Lastly the culture of privilege must give way to a culture of equality which calls for policies oriented towards a universality that is sensitive to differences Cubierta trasera
