Economic Survey Of Latin America And The Caribbean 20022003:

Economic Survey of Latin America and the Caribbean 2009-2010 United Nations. Economic Commission for Latin America and the Caribbean, United Nations, 2011 In 2009 the countries of Latin America and the Caribbean experienced the brunt of the global financial crisis on their levels of activity so that the region experienced a decline of 1.9% of GDP. However, since the second half of the year, most countries in the region have begun a vigorous recovery that should strengthen in 2010 with a regional GDP expansion of approx. 5.2%. This region together with the emerging countries of Asia were among the most dynamic in the world prior to the global financial crisis. The factors though behind a more positive performance are both external and internal in nature. Amongst the former can be included the continued dynamism of some key Asian economies whose sustained demand for products from this region has created important conditions for a recovery in exports, especially in the case of South America. Similarly, the recovery of the U.S. economy though gradual contributes to a better scenario for Mexico, Central America, and to the extent that raises the demand for tourism, possibly also for the Caribbean. For the latter, some recovery is projected in remittances from that country by migrant workers in the region. *Economic Survey of Latin America and the Caribbean*, 2004

From the Farm to the Table Gary Holthaus,2014-04-23 As with other areas of human industry it has been assumed that technological progress would improve all aspects of agriculture Technology would increase both efficiency and yield or so we thought The directions taken by technology may have worked for a while but the same technologies that give us an advantage also create disadvantages It s now a common story in rural America pesticides fertilizers big iron combines and other costly advancements may increase speed but also reduce efficiency while farmers endure debt dangerous working conditions and long hours to pay for the technology Land livelihood and lives are lost in an effort to keep up and break even There is more to this story that affects both the food we eat and our provisions for the future Too many Americans eat the food on their plates with little thought to its origin and in blind faith that government regulations will protect them from danger While many Americans might have grown up in farming families there are fewer family owned farms with each passing generation Americans are becoming disconnected from understanding the sources and content of their food The farmers interviewed in *From the Farm to the Table* can help reestablish that connection Gary Holthaus illuminates the state of American agriculture today particularly the impact of globalization through the stories of farmers who balance traditional practices with innovative methods to meet market demands Holthaus demonstrates how the vitality of America s communities is bound to the successes and failures of its farmers In *From the Farm to the Table* farmers explain how their lives and communities have changed as they work to create healthy soil healthy animals and healthy food in a context of often inappropriate federal policy growing competition from abroad public misconceptions regarding government subsidies the dangers of environmental damage and genetically modified crops and the myths of modern economics Rather than predicting doom and despair for small American growers Holthaus shows their
