Economic Transition in Hungary and East Germany Johannes Stephan, 1999

Banking in Transition

G. Robins, 2000-02-17 The book asks whether transplanting banks can solve the problems involved in creating a well functioning market economy from outside looking especially at the virtually complete takeover of East German banks by their Western counterparts after unification Drawing on a wide range of English and German sources and fieldwork interviews across Germany it argues that there are no quick fix solutions to transition to a market Implications are discussed for East Germany and for other previously centrally planned economies and the global implications of foreign ownership in banking are considered

Decentralization and Transition in the Visegrad E. Kirchner, 1999-05-17 The book assesses the democratization and marketization in the Visegrad states It analyses the effectiveness of these emerging government structures at a regional and local level in terms of competencies and resources makes comparisons with West European experiences at this level and examines the role of external factors especially the EU and international financial organisations in the development of sub national authorities in these countries

Critical Management Research in Eastern Europe

M. Kelemen, M. Kostera, 2002-10-23 The process of transition in Eastern European countries is one in which ideas of the past and present both local and Western meet and conflict Presenting a wealth of new ethnographic and interview based research Critical Management Research in Eastern Europe argues that the reform process in Central and Eastern Europe has been dominated by the traditional Western view of management practice However this approach overlooks the fact that certain managerial and organizational practices developed in Central and Eastern Europe may still be appropriate and indeed effective within this particular setting The book brings together authors from both East and West Europe to evaluate how the two systems can best be harmonized which is particularly important in the context of EU enlargement

Privatisation and Its Limits in Central and Eastern Europe H. Engerer, 2001-06-18 Hella Engerer analyses the emergence evolution and theory of property rights and establishes the limits for privatization of state owned enterprises in the transitional economies of Eastern Europe She counters the assumption that reduction of the state sector helps to create the basis for a private property system showing that privatization actually presupposes a stable framework including property order She makes use of an outstanding methodological approach reaching well beyond the limits of pure economic observation This is a major

Signorelli, 2010-01-20 This book examines theoretically and empirically the key aspects and differences of economic growth It provides a comprehensive investigation of the numerous features of development in transition countries covering the last two decades from the fall of the Berlin Wall in 1989 to the current financial crisis **Welfare States in Transition** I. Collier, H. Roggemann, O. Scholz, H. Tomann, 2016-01-18 Social policy in East and West finds itself today in the middle of a fundamental transition The former communist countries of Central and Eastern Europe and the successor states to the former Soviet Union are attempting to create the institutions needed for a modern market economy and a modern democratic welfare state At the same time the mature welfare states of Europe are struggling to solve the contemporary financial crisis of their systems of social entitlements Because of fundamental economic and demographic trends these systems will become increasingly difficult to sustain over the coming decades The contributors overwhelmingly agree that it would be mistaken policy to simply copy the institutions of Western welfare states to the Eastern economies in transition Instead one can learn much from the experience gathered over the past half century in Western welfare states Privatization, Corporate Governance and the Emergence of Markets E. Rosenbaum, F. Bönker, H. Wagener, 2000-03-23 The volume focuses on privatisation in transition countries addressing issues ranging from corporate governance to the relationship between privatisation and the emergence of markets from a multi disciplinary perspective The contributors investigate both the theoretical groundwork of privatisation and enterprise restructuring as well as recent empirical evidence The contributions show that changes in ownership titles are but one part of the story being closely interwoven as they are with the transformation of corporate governance enterprise restructuring network transformation and the emergence of markets **EU Enlargement and its Macroeconomic Effects in Eastern Europe** H. Gabrisch, R. Pohl, 1999-01-29 What will joining the EU mean for the new Eastern member states and their economies This book offers a detailed study of the macroeconomic and structural adjustment burden It envisages a real currency appreciation stemming from price convergence capital inflows and weak structural change The widespread belief that an Eastern enlargement of the Union would be overwhelmingly to the detriment of the present EU budgetary costs locational decisions trade deficits is rejected The authors discuss the lack of competitiveness of Eastern countries and their need for structural adjustments in the financial sector in agriculture and in manufacturing in order for them to survive and thrive in their new economic environment *Monetary Integration in Europe* H. Tomann, 2016-02-05 Can the European Economic and Monetary Union survive as an institution providing the highest degree of monetary integration Can it withstand crises in international markets and contribute to the stability of the global financial system This book addresses these questions emphasising the need for new forms of economic policy coordination Economic Transition in Central Europe and the Commonwealth of Independent States T.
