Ecological Research to Promote Social Change Tracey A. Revenson, Anthony R. D'Augelli, Sabine E. French, Diane Hughes, David E. Livert, Edward Seidman, Marybeth Shinn, Hirokazu Yoshikawa, 2012-12-06 During the past quarter century community psychologists have worked to make relevant contributions to human welfare in community settings and to effect social change Working with and in schools neighborhood organizations religious institutions social programs and government agencies the community psychologist has come to understand how social settings and social policy influence behavior and foster change that promotes individual health and well being Using a social ecological paradigm as their guiding framework they focus on the interactions between persons and their environments cultural diversity and local empowerment for understanding organizational community and social change Community psychologists have relied on multiple methods of obtaining data but more often they have had to develop new methodologies or adapt existing ones These innovative methods have been recorded in the American Journal of Community Psychology throughout the years of its history and have changed the way that researchers in the field have gathered data

Reauthorization of the Head Start Program United States. Congress. Senate. Committee on Labor and Human Resources. Subcommittee on Children, Family, Drugs and Alcoholism, 1986

Children Today, 1983

Understanding Child Development Sara Meadows, 2006-11-22 This highly readable text provides an exceptionally clear overview of the whole field of child development from birth to adolescence the 2 12 age range is strongly emphasised All the main areas of child development are fully covered perception and understanding cognitive skills play and language personality social relationships The author draws upon the studies from a wide range of disciplines

and shows how these contribute to our understanding of child development clearly demonstrating how the information can be applied at home and school

Native Hawaiian Education Act United States. Congress. House. Committee on Education and Labor. Subcommittee on Elementary, Secondary, and Vocational Education, 1980

Changing Families Irving E. Sigel, 2012-12-06

In a previous volume *Families as Learning Environments for Children* we presented a series of chapters that dealt with research programs on the role of families as learning environments for children. Those studies were based on empirical data and sought answers to basic research questions with no explicit concern for the application of the results to practical problems. Rather, their purpose was to contribute primarily to conceptualization, research methodology, and psychological theory. Now in this volume we turn our attention to intervention efforts to modify the way a family develops. As in our previous conference, the participants of the working conference on which the present volume is based are research scientists and scholars interested in application. This group is distinct from practitioners, however, whose primary focus is service. Participants in this conference have as their primary interest research into the problems of processes of application. Applied professional issues concerning the lives of families come from many varied sources, from some that are distant and impersonal, e.g., the law, to direct face-to-face efforts: educators, therapists. The variety of sources and types of applications are eloquent testimony to the degree to which families are subject to a host of societal forces whose implicit or explicit aim is to modify family functioning. For example, some educators may wish to alter family child-rearing patterns to enhance child development; the clinician seeks to help families come to terms and to cope with a schizophrenic child. The list can be extended.

Resources in Education, 1978

Evaluating Family Programs Francine H. Jacobs, 2017-10-24

The diverse composition of American families and changing ways of raising our children have become subjects of intense scrutiny by researchers and policymakers in recent years. Shifting demographics and work patterns, growing numbers of women in the work force, teenage pregnancy, single-parent families, and the deinstitutionalization of the elderly, disabled, and mentally ill—all these trends have significantly affected family life. *Evaluating Family Programs* effectively bridges the gap between researchers and practitioners in order to bring practical, understandable advice to providers of family programs and to program funders and policymakers. Heather B. Weiss and Francine H. Jacobs have collected in this volume works which move outside the traditional approaches of their disciplines to create new models for delivering and evaluating services. This sets a mood of genuine inquiry and excitement about successful aspects of programs while maintaining openness about the limitations of both research and practice. By expanding the research model, this work is an attempt to understand reciprocal influences of extended family, culture, community, and social institutions. It urges those who advocate program accountability to understand that not all types of evaluations are appropriate for all programs and it notes that limitations in current evaluation technologies make it difficult to evaluate outcomes. *Evaluating Family Programs* reminds the reader that in order to develop sound family policy we must look at children and families in context. Because policymakers program

administrators and informed citizens have come to rely more upon the results of evaluation research we must improve our methods while not losing sight of its limitations It is a thought provoking contribution to the efforts of those who seek to support the American family with compassion understanding and realism The Child as Thinker Sara Meadows,2012-09-10 This second edition of The Child as Thinker has been thoroughly revised and updated to provide an informed and accessible overview of the varied and extensive literature on children s cognition Both theory and research data are critically examined and educational implications are discussed After a brief discussion of the nature and subject of cognition Sara Meadows reviews children s thinking in detail She discusses the ways children remember and organise information in general the acquisition of skills such as reading writing and arithmetic and the development of more complex reasoning as children grow to maturity As well as studies that typically describe a generalised child the book also reviews some of the main areas relevant to individual differences in normal cognitive development and critically examines three major models of cognitive development In outlining the work of Piaget information processing accounts and neo Vygotskian theories she also evaluates their different explanations of cognitive development and their implications for education Finally the book examines biological and social factors that may be involved in normal and suboptimal cognitive development Sara Meadows provides an important review of the crucial issues involved in understanding cognitive development and of the new data and models that have emerged in the last few years This book brings together areas and approaches that have hitherto been independent and examines their strengths and weaknesses The Child as Thinker is essential reading for all students of cognitive development **Offender Rehabilitation and Treatment** James McGuire,2003-04-11 Criminal behaviour continues to be a matter of major public concern How society should respond to it and what should be done with those who repeatedly offend remain hotly disputed topics of conversation Offender Rehabilitation and Treatment draws together internationally renowned experts from the United Kingdom Europe North America and Australia Chapters summarise some of the most recent and exciting developments in this field and offer a systematic knowledge based approach to the effective reduction of criminal behaviour Offers coverage of a wide range of key topics in this area Links theory research and practice in a coherent and accessible style International focus with examples and authors from a number of countries The Evaluation of Cultural Action Howard Richards,1984-11-10 **Ellis' Handbook of Mental Deficiency, Psychological Theory and Research** William E. MacLean Jr.,2012-12-06 In the 16 years since the publication of the second edition of this volume psychological theory and research in mental retardation has continued to expand and extend scientific theoretical and clinical understanding of this most complex and challenging human condition Explicit effort has been made to translate theory and research into useful and efficacious assessment intervention prevention and policy actions This third edition provides an opportunity to critique major conceptual developments and empirical research in an effort to stimulate further behavioral research of practical social importance The Handbook presents work by prominent contributors to a major scientific

endeavor that has grown dramatically during the last three decades The challenge for each author was to identify important theoretical and empirical issues provide a critical selective review of exemplary research and discuss the questions that remain unanswered in each area In short the goal for this third edition was to consolidate the knowledge gained during the past 30 years and to present a blueprint for future research in mental retardation the broader field of learning disabilities and other developmental disorders such as autism Providing totally different coverage and direction from the previous edition this text fills a crucial instructional need in graduate courses related to the psychology of mental retardation With its emphasis on psychological research and theory it offers an important alternative to many available texts that primarily emphasize the application of research

Your Organization: What Is It For? John Argenti, 2018-04-17 This book first published in 1993 challenges the accepted and practised methods organizations use to set standards of performance and quantify their achievements Using in depth case studies John Argenti compares the performance of companies with that of non profit making organizations to reveal remarkable insights into corporate culture He notes how companies meticulously evaluate their performance yet behave poorly in society while in stark contrast these actions are reversed in non profit making organizations Your Organization What Is It For is essential reading for everyone who exercises the role of governance and is responsible for the overall performance and conduct of their organization

Within Our Reach Lisbeth Schorr, 2011-03-23 In this solidly researched book the authors demonstrate that the knowledge and techniques exist to decrease the incidence of welfare dependency poor single parent families and alienated uneducated youth In addition to providing a detailed account of the problem they describe twenty four programs that have proved successful in changing the lives of seriously disadvantaged children

Learning from Experience Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Panel on Outcome Measurement in Early Childhood Demonstration Programs, 1982-02-01 Prepared by the Panel on Outcome Measurement in Early Childhood Demonstration Programs this report attempts 1 to characterize recent developments in programs and policies for children and families that challenge traditional approaches to evaluation and 2 to trace the implications of these developments for outcome measurement and for the broader conduct of evaluation studies The report is divided into two parts Part I begins by tracing the historical evolution of demonstration programs and their evaluations from 1960 to the mid 1970s Next the policy issues and programs that have evolved in recent years and that appear to be salient for the 1980s are examined in detail Some important implications of these programs and policy developments for outcome measurement and evaluation design are then identified Finally implications of the evaluation process for the dissemination and utilization of results for the organization and conduct of applied research and for the articulation between applied research and basic social science are pointed out Part II includes six background papers which were prepared by the panel members together with outside consultants to facilitate the panel s discussion of the evaluation of children s programs Each paper covers a specific type of program health

day care family service preschool compensatory education programs and programs for the handicapped In addition a paper on the communication and dissemination of the results of evaluations is included MP *American Children in Chronic Poverty* Cynthia E. Lamy, 2013 Why is it so difficult for some people to escape poverty Cynthia Esposito Lamy answers that question in *American Children in Chronic Poverty* Complex Risks Benefit Cost Analyses and Untangling the Knot by describing the complex and interacting knot of problems that children face as they grow up in poverty Through a vast store of research on topics related to children families and poverty and methods to estimate social return on investment Lamy determines which programs and policies produce benefits that exceed costs providing evidence for an efficient fight against poverty Specific expert policy recommendations for keeping poverty from ruining children s potential are described within three broad themes bringing equity to our educational system supporting families as they transition through difficulties and making work pay Lamy concludes with foundational concepts for building an overarching model of poverty fighting to bring separate narrowly defined programs and policies together Benefit cost analysis confirms what the great religions have been trying to tell us for millennia when we respect and care for the most vulnerable members of our society we create a strong successful society in which everyone prospers *Applications of interactionist Psychology* Steven G. Cole, Robert Demaree, William Curtis, 2014-02-25 This work honoring Saul B Sells adds to the understanding of the science of psychology and the application of that knowledge to meaningful human endeavors Covers topics including the interactionist approach and the importance of multivariate design accuracy of measurement in order to move toward the understanding of human behavior and the necessity of understanding personality characteristics and environmental affect Important reading for researchers students and professionals in all subdisciplines of psychology including personality development social psychology research methods evaluation and measurement
