Economic Methodology And Freedom To Choose:

Economic Methodology and Freedom to Choose Patrick J. O'Sullivan, 1987 Economic Methodology and Freedom to Choose Patrick O'Sullivan, 2012-03-22 First published in 1987 Professor O'Sullivan's work provides an in depth philosophical examination of the foundations of method in Economics and other human sciences The argument is unabashedly dialectical in the great Socratic Platonic tradition and the reissue will be very welcome to all students of methodology in particular those students of economic methodology seeking a refreshing alternative to yet more mathematical game playing In an age dominated and perhaps to an extent perplexed by an ultimately non committal postmodernism the book provides a root and branch critique of the epistemological relativism which must lie at the root of the whole post modernist approach and in reasserting the fundamental importance not only for the methods of science but also for European civilisation of the pursuit of truth it takes a stance which is very much against the tide of the times A heterodox perspective is also provided and defended in detail regarding the real nature of economic methodology whereby it is shown that Economics epitomises a teleological mode of explanation which is significantly different from the efficient causal modes of explanation of the natural sciences In fact Economics is the ultimate subjectivist interpretative discipline in the methodological sense of Max Weber and Alfred Schutz a fact which has only been recognised and welcomed in the Austrian school of Economics The Methodology of Economics Mark Blaug, 1992-07-31 This book is an examination of the nature of economic explanation The opening chapters introduce current thinking in the philosophy of science and review the literature on methodology Professor Blaug then turns to the troublesome question of the logical status of welfare economics giving the reader an understanding of the outstanding issues in the methodology of economics This is followed by a series of case studies of leading economic controversies which shows how controversies in economics may be illuminated by paying attention to questions of methodology A final chapter draws the strands together and gives the author's view of what is wrong with modern economics This book is a revised and updated edition of a classic work on the methodology of economics in which Professor Blaug develops his discussion of the latest developments in macroeconomics general equilibrium theory and international trade theory A new section on the rationality postulate is also added *The Elgar Companion to Recent Economic Methodology* J. B. Davis, 2011-01-01 Economic methodology has traditionally been associated with logical positivism in the vein of Milton Friedman Karl Popper Imre Lakatos and Thomas Kuhn However the emergence and proliferation of new research programs in economics have stimulated many novel developments in economic methodology This impressive Companion critically examines these advances in methodological thinking particularly those that are associated with the new research programs which challenge standard economic methodology Bringing together a collection of leading contributors to this new methodological thinking the authors explain how it differs from the past and point towards further concerns and future issues The recent research programs explored include behavioral and experimental economics

neuroeconomics new welfare theory happiness and subjective well being research geographical economics complexity and computational economics agent based modeling evolutionary thinking macroeconomics and Keynesianism after the crisis and new thinking about the status of the economics profession and the role of the media in economics This important compendium will prove invaluable for researchers and postgraduate students of economic methodology and the philosophy of economics Practitioners in the vanguard of new economic thinking will also find plenty of useful information in this path breaking book

Business Ethics Patrick O'Sullivan, Mark Smith, Mark Esposito, 2012 Events such as Trafigura's illegal dumping of toxic waste in Cote d'Ivoire and BP's environmentally disastrous oil spill in the Gulf of Mexico have highlighted ethical issues in international business at a time when business leaders academics and business schools were reflecting on their own responsibilities following the global financial crisis The scope and scale of the global operations of multinational businesses means that decisions taken in different parts of the world have far reaching consequences beyond the national settings where employees are located or where firms are registered and as such an awareness of these responsibilities needs to be integrated into all levels and all subjects Using four guiding principles a critical multi level approach rooted in the tradition of European social theory a comparative and international perspective a global rather than just a European or American stand point and engaging with subject specific issues this book aims to mainstream business ethics into the work of teachers and students in business schools This comprehensive volume brings together contributions from a range of experts in different areas of business studies thereby facilitating and encouraging a move away from business ethics being a box to be ticked to being an integrated consideration across the business disciplines This impressive book brings ethical considerations back to the heart of the business curriculum and in doing so provides a companion for the progressive business student throughout their university career

The Political Economy of Economic Freedom Alan T. Peacock, 1997-01-01 The captivating nature of these contributions to political economy which were all published between 1976 and 1996 but mostly in the last decade is a clear reflection of Sir Alan's authoritative standing both as an academic economist and a government economic advisor the book addresses a wide range of philosophical questions and practical policy issues thus offering plenty of stimulating material for both the theoretical and applied economist as well as other social scientists M Teresa Lunati The Economic Journal many of the papers are worth reading and each paper has a useful introduction explaining the context in which it was written The best part of the book is the selection of papers in the last part especially his Alan Peacock's discussions of the regulation of broadcasting There is much for an economist to learn from these papers the role economists can play in public policy debates the inner workings of committees the role of information control in policy decisions William Sjostrom Kyklos The Political Economy of Economic Freedom brings together a timely selection of Sir Alan Peacock's views on economic freedom its philosophy its influence on the critique of economic policy and the problems encountered in expanding it

Human Nature and the Discipline of Economics Patricia

Donohue-White,2002-01-01 Foundations of Economic Personalism is a series of three book length monographs each closely examining a significant dimension of the Center for Economic Personalism s unique synthesis of Christian personalism and free economic market theory In the aftermath of the momentous geo political and economic changes of the late 1980s a small group of Christian social ethicists began to converse with free market economists over the morality of market activity This interdisciplinary exchange eventually led to the founding of a new academic subdiscipline under the rubric of economic personalism These scholars attempt to integrate economic theory history and methodology with Christian personalism s stress upon human dignity humane social structures and social justice This second volume in the series surveys the anthropological foundations to the disciplines of economics and moral theology The first part of the book presents an overview of the German French and Polish branches of personalist thought Particular attention is given to theological anthropology especially as it is developed by such thinkers as Emmanuel Mounier Max Scheler Gabriel Marcel Karol Wojtyla and Emil Brunner Part two surveys models of human nature that have been espoused by various schools of free market thought including mainstream neoclassical economics In conclusion the authors demonstrate how an expanded understanding of human nature can augment the ability of economic science to model and predict human behavior

Choice ,2000 **Recent Developments in Economic Methodology** John Bryan Davis,2006 Case Method and Pluralist Economics Kavous Ardalan,2017-12-09 This book discusses the relationship between pluralist economics and the case study method of teaching advocating the complimentary use of both to advance economics education Using a multi paradigmatic philosophical frame of analysis the book discusses the philosophical methodological and practical aspects of the case study method while drawing comparisons with those of the more commonly used lecture method The book also discusses pluralist economics through the exposition of the philosophical foundations of the extant economics schools of thought which is the focal point of the attention and admiration of pluralist economics More specifically the book discusses the major extant schools of thought in economics Neo Classical Economics New Institutional Economics Behavioral Economics Austrian Economics Post Keynesian Economics Institutional Economics Radical Economics and Marxist Economics and emphasizes that these schools of thought in economics are equally scientific and informative that they look at economic phenomena from their certain paradigmatic viewpoint and that together they provide a more balanced understanding of the economic phenomenon under consideration Emphasizing paradigmatic diversity as the cornerstone of both the case method and pluralist economics the book draws the two together and makes an effective case for their combined use A rigorous multi faceted analysis of the philosophy methodology and practice of economics education this book is important for academicians and students interested in heterodox economics philosophy and education The Measurement and Analysis of Housing Preference and Choice Sylvia J.T. Jansen,Henny C.C.H. Coolen,Roland W. Goetgeluk,2011-05-12 What are the current trends in housing Is my planned project commercially viable What should be my

marketing and advertisement strategies These are just some of the questions real estate agents landlords and developers ask researchers to answer But to find the answers researchers are faced with a wide variety of methods that measure housing preferences and choices To select and value a valid research method one needs a well structured overview of the methods that are used in housing preference and housing choice research This comprehensive introduction to this field offers just such an overview It discusses and compares numerous methods detailing the potential limitation of each one and it reaches beyond methodology illustrating how thoughtful consideration of methods and techniques in research can help researchers and other professionals to deliver products and services that are more in line with residents needs

Handbook of Behavioural Economics and Smart Decision-Making Morris Altman, 2017-05-26 This Handbook is a unique and original contribution of over thirty chapters on behavioural economics examining and addressing an important stream of research where the starting assumption is that decision makers are for the most part relatively smart or rational This particular approach is in contrast to a theme running through much contemporary work where individuals behaviour is deemed irrational biased and error prone often due to how people are hardwired In the smart people approach where errors or biases occur and when social dilemmas arise more often than not improving the decision making environment can repair these problems without hijacking or manipulating the preferences of decision makers This book covers a wide range of themes from micro to macro including various sub disciplines within economics such as economic psychology heuristics fast and slow thinking neuroeconomics experiments the capabilities approach institutional economics methodology nudging ethics and public policy

Economic Theories, True Or False? Mark Blaug, 1990 In sum this is a

well written and informed collection of essays on a wide range of topics in economic theory and the history of economic thought the essays are thoughtful and well researched D Wade Hands *Journal of Economic History* **Economics of Sustainable Agriculture** Koichi Kuriyama, 2025-03-28 Fertilizers are indispensable for agricultural production Chemical fertilizers have significantly improved agricultural productivity However the excessive use of fertilizers has caused serious nitrogen pollution What is the reason of a lack of progress in addressing nitrogen pollution What is necessary to achieve sustainable nitrogen use in agriculture This book provides a new perspective from an economic standpoint on these questions Firstly we propose the non market valuation methods to evaluate the social costs of nitrogen Because nitrogen control requires considerable effort and cost evaluating the costs and benefits of nitrogen measures in monetary terms allows for a comparison of the expenses and benefits of nitrogen control despite the delays in implementing such measures in the agricultural sector Secondly we analyze the behavioral changes of producers and consumers regarding nitrogen to indicate the direction of agricultural environmental policies for sustainable nitrogen use in the future To achieve sustainable nitrogen use farmers and consumers need to adopt production and consumption behaviors that consider nitrogen By analyzing the effects of visualizing the nitrogen footprint on the behavioral changes of farmers and consumers this book not only highlights the limitations of conventional agricultural policies but also provides recommendations for future agricultural environmental policies *ANZJS*, 1989 **Party Autonomy and the Role of Information in the Internal Market** Stefan

Grundmann, Wolfgang Kerber, Stephen Weatherill, 2001 Examination of Party Autonomy and its limits has always raised fundamental questions in national contract and private law The concentration on information solutions which enhance and leave more space to party autonomy is a fundamentally new approach to this core issue and is typical of Community legislation The complexity of the question made it advisable to have the different aspects treated and discussed by specialists in different areas by legal scholars and economists by EC law and by contract law specialists by scholars from different jurisdictions with different regulatory approaches and backgrounds The four parts deal with 1 the economic and constitutionell foundations of the question with 2 the framework to be found in EC treaty law with 3 the fundamental and more general aspects relating to substantive EC contract law legislation and with 4 the most important individual legal measures The book covers both general contract law with consumer contracts and labour contract law **Economic history pamphlets**, 1914 *Homo Biologicus* Charles Elworthy, 1993 Revised and extended version of doctoral dissertation

The Anxiety of the Jurist Claudio Michelson, 2016-04-01 The contributions in this volume pay homage to Zenon Ba kowski with a focus on problems concerning law s normalization and the revitalizing force of anxiety Ranging from political critique to methodological issues and from the role of human rights in development to the role of parables and analogy in legal reasoning the contributions themselves are testament to the richness of Ba kowski s scholarship as well as to the applicability of his core ideas to a wide range of issues Divided into five parts the book focuses on the role and methods of the jurist

conceptions of legality and the experience of living under rules jurisprudential issues affecting exchange and the market and the burden and methods of legal judgement It also includes Ba kowski s 2011 valedictory lecture and a bibliography of his work Comprising all original contributions the contributors represent a balance of established leading figures and younger emerging scholars in the field of legal and social theory
