Economics And Politics Of Industrial Policy The United States And Western Europe

Fred H. Lawson

Economics And Politics Of Industrial Policy The United States And Western Europe:

Economics And Politics Of Industrial Policy Steven A. Shull, 2019-03-08 Industrial policy is a good example of the growing economic and political interdependency between Europe and the United States The contributors to this volume which compiles the proceedings of the seventh conference sponsored by the Institute for the Comparative Study of Public Policy examine the ways in which national and supranational in the case of the European Community industrial policies are implemented It is thought that diversity within the country is the primary reason why the United States does not have a comprehensive national policy There is a consensus among the authors that the U S economy is less subject or amenable to central government planning than the economies of Europe In Europe there is more interest in coordinating industrial policy throughout the European Community but here too the failure to adopt a comprehensive policy reveals the enormous diversity and parochialism that conflict with supranational goals The contributors conclude that while a centrally planned and implemented industrial policy may be desirable we do not have the means to achieve it Acknowledging the major industrial and trade problems facing the United States and Western Europe the authors feel that it is not clear whether these problems can be resolved by government intervention

Routledge Revivals: Industrial Dislocation (1991) Daniel Todd, 2018-05-08 First published in 1991 this book offers a thorough examination of the decline of heavy industry in industrialised countries in the West which focuses on problems in the shipbuilding industry Todd argues that three points are central to its demise industrial life cycles the international division of labour and the energy crises of 1973 His work begins with despondency in western shipbuilding going back as early as 1956 when Japan usurped Britain as the pre eminent ship producer The book goes on to explore international trade and industry in the second half of the 20th century with analysis on industrial reorganisation and East Asian conglomerates diversification with the marine industries and shipbuilding in Brazil India and China

Government and Business: American Political Economy in Comparative Perspective Richard Lehne, 2012-03-23 In this thoroughly updated edition Lehne takes a comparative approach evaluating the U S political economy with respect to those of Great Britain Germany Japan and the EU The book provides detailed historical context for and a conceptual understanding of the business government environment and then clarifies the roles of the major actors and outlines the regulatory and policy frameworks Along the way Lehne probes some of the most crucial dilemmas facing government and business today

Comparative Politics: Western Europe and the United States: foundations of comparative politics, 2005 **Industry and Politics in West Germany** Peter J. Katzenstein, 1989 Under the editorship of Peter J Katzenstein thirteen distinguished scholars from both sides of the Atlantic here provide an original interpretation of the political economy of the Bonn Republic during the forty years since its founding and explore in particular its extraordinary capacity for accommodating change

Domestic Structures and International Trade Candido Garcia Molyneux, 2001-02-09 This book places international trade law within an economic political and sociological context

contending that globalisation is characterised by both homogeneity and diversity. However, while implying changes within contracting parties, globalisation only results in a thin homogeneity. Furthermore, globalisation is the result of the interaction of negotiations and policies between states. From this perspective, the book attempts to explain trade policy as resulting from domestic factors. Thus, if globalisation is characterised by diversity, how do such differences affect the trade policy of states in an era where nearly everything is subject to commerce? The book focuses on the US and the EC, analysing different institutional and substantive aspects of unfair trade instruments such as anti-dumping and countervailing measures and market access instruments. Domestically, it focuses on both constitutional and socio-economic constraints. The book considers political action prescribed by formal constitutions in a wider socio-economic context, rejecting the historically and structurally blind normative idea of free trade.

Do Institutions Matter? R. Kent Weaver, Bert A. Rockman, 2010-12-01

As a stunning tide of democratization sweeps across much of the world, countries must cope with increasing problems of economic development, political and social integration, and greater public demand for scarce resources. That ability to respond effectively to these issues depends largely on the institutional choices of each of these newly democratizing countries. With critics of national political institutions in the United States arguing that the American separation of powers system promotes ineffectiveness and policy deadlock, many question whether these countries should emulate American institutions or choose parliamentary institutions instead. The essays in this book fully examine whether parliamentary government is superior to the separation of powers system through a direct comparison of the two. In addressing specific policy areas such as innovation and implementation of energy policies after the oil shocks of 1970, management of societal cleavages, setting of government priorities in budgeting, representation of diffuse interest in environmental policy, and management of defense forces, the authors define capabilities that allow governments to respond to policy problems. Do Institutions Matter includes case studies that bear important evidence on when and how institutions influence government effectiveness. The authors discover a widespread variation among parliamentary systems both in institutional arrangements and in governmental capabilities, and find that many of the failings of policy performance commonly attributed to American political institutions are in fact widely shared among western industrial countries. Moreover, they show how American political institutions inhibit some government capabilities while enhancing others. Changing American institutions to improve some aspects of governmental performance could hurt other widely valued capabilities. The authors draw important guidelines for institutional reformers while emphasizing that institutions do have predictable risks and opportunities. They caution that a balance between such risks and opportunities must first be reached before policy reformers try to change political institutions.

Trade and Transitions Marsha Chandler, Robert Howse, Michael Trebilcock, 2004-01-14

Faced with increased levels of international competition and mounting budget deficits, some developed Western economies have responded by introducing trade restrictions. This book uses a comparative analysis of eight leading industrial nations, including Japan, the United States, West Germany, and Britain.

to demonstrate that such policies are mistaken Alternatives to trade restrictions including subsidies for industries and labour market policy instruments are also shown to have their drawbacks and the book emphasises the need for countries to find and exploit policies which fulfil their own political and social needs but which are least injurious to their trading partners

European Power and The Japanese Challenge William R. Nester, 1993-06-18 Analyzing relations amidst the European Community's growing unity and Japan's ever more dynamic economy this book compares the processes means ends successes and failures of European and Japanese industrial trade and foreign policies Nester has also written *Japan and the Third World*

Business and the State in Developing Countries Sylvia Maxfield, Ben Ross Schneider, 2018-09-05 Much of the debate about development in the past decade pitted proponents of unfettered markets against advocates of developmental states Yet in many developing countries what best explains variations in economic performance is not markets or states but rather the character of relations between business and government The studies in *Business and the State in Developing Countries* identify a range of close collaborative relations between bureaucrats and capitalists that enhance elements of economic performance and defy conventional expectations that such relations lead ineluctably to rent seeking corruption and collusion All based on extensive field research the essays contrast collaborative and collusive relations in a wide range of developing countries mostly in Latin America and Asia and isolate the conditions under which collaboration is most likely to emerge and survive The contributors highlight the crucial roles played by capable bureaucracies and strong business associations

Industrial Policy in Europe after 1945 C. Grabas, A. Nützenadel, 2014-03-31 Bringing together renowned scholars in the field with younger researchers this interdisciplinary study of the history of post war industrial policy in Europe investigates transfers across borders and locates industrial policy in the context of the Cold War from a global perspective

Democracy and Markets John R. Freeman, 2018-08-06 Events of the 1970s and 1980s have provoked intense controversy about the desirability of existing political and economic institutions On the basis of an analysis of social welfare in varying types of market systems and in certain democratic political systems *Democracy and Markets* illuminates alternative directions for institutional reform Examining in detail the experiences of several democratic European countries John R Freeman considers whether a mixed ownership structure is preferable to a private ownership structure and whether a pluralist type of democratic politics is preferable to a corporatist type Freeman compares the benefits of the two economic and two political systems separately and then analyzes the workings of four basic political economies This analysis yields a welfare taxonomy for alternative forms of democratic capitalism and more specifically a characterization of the blends of collective gain and distributional equity that can be achieved in the four systems Freeman demonstrates the validity of this taxonomy through an empirical investigation of the political economies of Britain Austria Sweden and Italy Under current conditions he concludes the corporatist mixed system produces the most desirable blend of welfare outcomes

The Handbook of European Defence Policies and Armed Forces Hugo Meijer, Marco Wyss, 2018-06-22 The armed forces of Europe

have undergone a dramatic transformation since the collapse of the Soviet Union The Handbook of European Defence Policies and Armed Forces provides the first comprehensive analysis of national security and defence policies strategies doctrines capabilities and military operations as well as the alliances and partnerships of European armed forces in response to the security challenges Europe has faced since the end of the cold war A truly cross European comparison of the evolution of national defence policies and armed forces remains a notable blind spot in the existing literature The Handbook of European Defence Policies and Armed Forces aims to fill this gap with fifty one contributions on European defence and international security from around the world The six parts focus on country based assessments of the evolution of the national defence policies of Europe s major medium and lesser powers since the end of the cold war the alliances and security partnerships developed by European states to cooperate in the provision of national security the security challenges faced by European states and their armed forces ranging from interstate through intra state and transnational the national security strategies and doctrines developed in response to these challenges the military capabilities and the underlying defence and technological industrial base brought to bear to support national strategies and doctrines and finally the national or multilateral military operations by European armed forces The contributions to The Handbook collectively demonstrate the fruitfulness of giving analytical precedence back to the comparative study of national defence policies and armed forces across Europe

Models of Capitalism David Coates, 2014-12-01 The contemporary debate on economic policy is dominated by the issue of which model of capitalism works best

Competitiveness and American Society Steven L. Goldman, 1993 The claim that U S industry is in a crisis that it stands at a turning point in its competitiveness with foreign rivals seems on the face of it an objective description of the prevailing state of affairs But what does competitiveness mean when it is used to describe an entire industry an economy a nation What is the relationship between industrial competitiveness and the personal and social value placed on competition What are the social roots of competition that have made it an enduring American value How does the current competitiveness debate serve special interests seeking to preserve or extend their social power The essays presented in Competitiveness and American Society all written especially for this volume address these and related questions The answers they offer reveal the political character of the competitiveness debate as well as the complexity and ambiguity of the value judgments with which competitiveness issues are entangled The perspectives taken by the authors range from the austere economic through the political and managerial to the richly sociological The opening essay rejects the possibility let alone the factuality of a national competitiveness crisis the closing essay explicitly identifies the root causes of the crisis as national Other essays look to relationships among culture society and industry in the U S and Japan as factors shaping America s competitiveness crisis and the Western European response to that crisis One essay explores mechanisms that would allow the public to play a constructive role in managerial decision making another explores the complications that have followed from mandating the management of resources in

accordance with social values The common denominator of all of the essays is an engagement with the role that social value judgments play in determining the competitiveness of individual firms For some this role is broad and definitive for others it is narrowly circumscribed Taken together the essays in Competitiveness and American Society establish the need for wider participation in the debate over the competitiveness of U S industry than has been held so far What is needed is a debate that addresses the quality of American life and the health of the industrial sector of the economy a debate that opens for public deliberation the changes in personal and social values and institutions that will be required to shape that interdependence

War Fred H. Lawson, 2018-09-05 Rejecting conventional explanations for Syrian foreign policy which emphasize the personalities and attitudes of leaders cultural factors peculiar to Arab societies or the machinations of the great powers Fred H Lawson describes key shifts in Damascus s response to regional adversaries in terms of changes in the intensity of political struggles at home Periodic eruptions of domestic conflict have inspired Syria s ruling coalition to adopt a wide range of programs designed to buy off domestic rivals and perpetuate the predominance of individual coalition members These programs have undermined the unity of the Ba thi regime increasing the chances that opponents will overturn the established order Challenges to the Ba thi regime become most threatening whenever crises of accumulation shake the domestic political economy Lawson contends Opposition forces gain strength when the state cannot sustain new investment or when competition increases between public and private enterprises Political and economic trends inside Syria have determined why Damascus has since 1963 alternately escalated tensions with regional rivals and adopted more accommodating postures Lawson traces this dynamic through five major episodes the 1967 war with Israel limited intervention in Jordan in 1970 the widening conflict in Lebanon in 1976 the defusing of conflict with Iraq in 1982 and the rapprochement with Turkey over Kurdish separatism in 1994 These patterns Lawson suggests may be characteristic of nations changing from one domestic economic system to a radically different one as Syria has in the transition from state socialism to a privatized political economy *National Diversity and Global Capitalism* Suzanne Berger, Ronald

Dore, 2018-10-18 How does globalization change national economies and politics Are rising levels of trade capital flows new communication technologies and deregulation forcing all societies to converge toward the same structures of production and distribution Suzanne Berger and Ronald Dore have brought together a distinguished group of experts to consider how the international economy shapes and transforms domestic structures Drawing from experience in the United States Europe and Asia the contributors ask whether competition imitation diffusion of best practice trade and financial flows are reducing national diversities The authors seek to understand whether the sources of national political autonomy are undermined by changes in the international system Can distinctive varieties of capitalism that incorporate unique and valued institutions for achieving social welfare survive in a global economy The contributions to the volume present a challenge to conventional

views on the extent and scope of globalization as well as to predictions of the imminent disappearance of the nation state's leverage over the economy

Governing Ideas J. Nicholas Ziegler, 2019-05-15 Despite increasingly open markets and a pervasive move toward international production methods national governments continue to pursue remarkably distinctive policies for promoting innovation in industry J Nicholas Ziegler analyzes this apparent paradox by comparing government efforts to promote technological advance in Germany and France His findings reveal a great deal about the roots and limits of public strategies for economic growth Through close comparison of three technologies digital telephone exchanges computer controlled machine tools and semiconductors Ziegler shows how each country displays predictable strengths and weaknesses in promoting innovation These distinctive capacities depend more upon the links among different skill and knowledge bearing elites than on the structure of the state or the industrial sector in question As business outcomes hinge less on economies of scale and more on knowledge based competition the politics of contending interest groups steadily gives way to a competition for status and jurisdiction among more specialized professional groups As a result Germany's strengths stem directly from what Ziegler calls an ethos of competence whereas France's strengths stem from an order of state created elites More generally Ziegler contends neo institutional approaches to public policy need to pay far more attention to the professional identities of different occupational groups
