American Learned Men and Women with Czechoslovak Roots Mila Rechcigl, 2020-11-18 Apart from a few articles no comprehensive study has been written about the learned men and women in America with Czechoslovak roots That's what this compendium is all about with the focus on immigration from the period of mass migration and beyond irrespective whether they were born in their European ancestral homes or whether they have descended from them Czech and Slovak immigrants including Bohemian Jews have brought to the New World their talents their ingenuity their technical skills their scientific knowhow and their humanistic and spiritual upbringing reflecting upon the richness of their culture and traditions developed throughout centuries in their ancestral home This accounts for the remarkable success and achievements of these settlers in their new home transcending through their descendants as this monograph demonstrates The monograph has been organized into sections by subject areas i.e. Scholars Social Scientists Biological Scientists and Physical Scientists Each individual entry is usually accompanied with literature and additional biographical sources for readers who wish to pursue a deeper study The selection of individuals has been strictly based on geographical ground without regards to their native language or ethnic background This was because under the Habsburg rule the official language was German and any nationalistic aspirations were not tolerated Consequently it would be virtually impossible to

determine their innate ethnic roots or how the respective individuals felt Doing it in any other way would be a mere guessing and thus less objective

**Foreign Direct Investment and Regional Development in East Central Europe and the Former Soviet Union** David Turnock, 2017-11-28

With the achievement of further EU and NATO enlargement a critical political and economic lens is now focused on East Central Europe and to a lesser extent the other former communist states Economic growth in each transition state and more broadly the region pivots around the prospects for foreign direct investment FDI with decisions on where foreign investors will locate their projects now vitally important This book the first one devoted to a geographical survey concentrating specifically on FDI in the region brings together a wide range of prominent authors from the US and Europe including the late Frank Carter to provide a timely and critical examination of the importance of foreign investment It presents a detailed analysis of location patterns and their significance for regional development with particular emphasis given to the important socioeconomic and political consequences of uneven distribution of FDI across the region and its constituent countries Divided into two parts the book first deals with general overarching themes and issues before applying these to more specific country case studies The second part deals with regional studies focusing broadly on the Western Balkans and Bulgaria before looking at specific economic sectors in individual countries
