Transforming a University Angela Brew, Judyth Sachs, 2007 This unique collection shows what happens when one university takes on the challenge of developing the scholarship of teaching and learning with a view to enhancing students learning experiences Authors from the sciences engineering humanities and social sciences and from the health sciences demonstrate the research they have done to investigate their students learning The editors Angela Brew and Judyth Sachs have captured the intricacies of teaching and learning in different academic domains in this rich and varied collection The book explores students responses to contemporary art to multicultural music and to architecture for the poor and dispossessed It explores students ability to transfer mathematical knowledge from one subject to another how students

learn to talk like a pharmacist or understand basic concepts in physics how students are prepared for university study in first year classes or in the operating theatre how they learn to write like a scientist how they learn in online discussions and how they understand group work and group assessment Each chapter is grounded in rigorous research and scholarship and indicates actions that have been taken to improve teaching and students learning This book is a remarkable demonstration of scholarly teaching practice from a single institution It should be read by all teachers and managers in higher and tertiary education institutions interested in developing teaching and learning Oxford Textbook of Palliative Medicine Geoffrey W. C. Hanks, 2011-07-21 Emphasising the multi disciplinary nature of palliative care the fourth edition of this text also looks at the individual professional roles that contribute to the best quality palliative care **Professional Identity in the Caring Professions** Roger Ellis, Elaine Hogard, 2020-12-29 Professional identity is a central topic in all courses of professional training and educators must decide what kind of identity they hope their students will develop as well as think about how they can recruit for facilitate and assess this development This unique book explores professional identity in a group of caring professions looking at definition assessment and teaching and learning Professional Identity in the Caring Professions includes overviews of professional identity in nursing medicine social work teaching and lecturing along with a further chapter on identity in emergent professions in healthcare Additional chapters look at innovative approaches to selection competency development professional values leadership potential and reflection as a key element in professional and interprofessional identity The book ends with guidance for curriculum development in professional education and training and the assessment of professional identity This international collection is essential reading for those who plan deliver and evaluate programs of professional training as well as scholars and advanced students researching identity in the caring professions including medicine nursing allied health social work and teaching *Beyond Reflective Practice* Helen Bradbury, Nick Frost, Sue Kilminster, Miriam Zukas, 2012-09-11 Reflective practice has moved from the margins to the mainstream of professional education However in this process its radical potential has been subsumed by individualistic rather than situated understandings of practice Presenting critical perspectives that challenge the current paradigm this book aims to move beyond reflective practice It proposes new conceptualisations and offers fresh approaches relevant across professions Contributors include both academics and practitioners concerned with the training and development of professionals Definitions of reflection which are often implicit often focus on the individual s internal thought processes and responsibility for their actions The individual what they did thought felt is emphasised with little recognition of context power dynamics or ideological challenge This book presents the work of practitioners educators academics and researchers who see this as problematic and are moving towards a more critical approach to reflective practice With an overview from the editors and fourteen chapters considering new conceptualisations professional perspectives and new practices *Beyond Reflective Practice* examines what new forms of professional reflective practice are emerging It examines in particular the relationships

between reflective practitioners and those upon whom they practise It looks at the ways in which the world of professional work has changed and the ways in which professional practice needs to change to meet the needs of this new world It will be relevant for those concerned with initial and ongoing professional learning both in work and in educational contexts

Understanding Undergraduates Celia Popovic, David A. Green, 2012-08-06 Most university teachers have ideas about the typical good or not so good student in their classes but rarely do they share these thoughts with others By keeping quiet about the preconceptions or stereotypes they harbour teachers put themselves at risk of missing key evidence to help them revise their beliefs more importantly they may fail to notice students in real need of their support and encouragement In this unique work the authors explore UK and US university teachers beliefs about their students performance and reveal which beliefs are well founded which are mistaken which mask other underlying factors and what they can do about them So is it true for instance that British Asian students find medicine more difficult than their white counterparts or that American students with sports scholarships take their studies less seriously Is it the case that students who sit at the front of the lecture hall get better grades than those who sit at the back By comparing students demographic data and their actual performance with their teachers expectations the authors expose a complex picture of multiple factors affecting performance They also contrast students comments about their own study habits with their views on what makes a good learner For each preconception they offer clear advice on how university teachers can redesign their courses introduce new activities and assignments and communicate effective learning strategies that students will be able to put into practice Finally the authors explore the ramifications of teachers beliefs and suggest actions that can be taken at the level of the institution department or programme and in educational development events designed to level the playing field so that students have a more equitable chance of success Ideal for both educational developers and university teachers this book reveals general tendencies and findings that will inform developers own work with university teachers provides practical guidance and solutions for university teachers to be able to identify and address students actual rather than assumed needs explores means of addressing and challenging people s natural tendency to rely on preconceived ideas and stereotypes and explains an action research method that educational developers can use on their own campuses to unravel some of the local preconceptions that may be hampering student success

Practical Teaching in Emergency Medicine Robert L. Rogers, Amal Mattu, Michael E. Winters, Joseph P. Martinez, Terrence Mulligan, 2012-12-03 Emergency medicine attendings who wish to hone their teaching skills can find a number of books on educational strategies written by physicians from other disciplines However until the publication of the

first edition of this book they did not have access to a text written by emergency medicine physicians on methods of teaching that are directly applicable to teaching EM This book was compiled to meet that need Following the introductory section which provides important background information the book's contents are organized into 4 sections that correspond to the core needs and interests of EM educators Section 2 focuses on practical and ethical considerations of teaching in the ED Section 3 provides strategies for teaching specific groups of learners Section 4 looks at the skills that are characteristic of the best EM educators and Section 5 looks indepthly at specific teaching techniques and strategies Now more than ever this book addresses the needs of physician educators from all over the world New chapters discuss lecturing to an international audience using simulation as a teaching tool how to make journal club work for you and other topics that are of broad interest to medical educators in this field In general each chapter has been updated and reviewed to make sure the content was something that emergency physician educators could use in any country The chapter contributors are widely regarded as leaders in the field of emergency medicine education and faculty development Authors were given free rein to develop their chapters and write in their own style They were asked to present their personal views on how to successfully teach the art of emergency medicine rather than review evidence based guidelines regarding medical education As a result most of the chapters have few references This first person approach to a multi authored textbook yields a compilation that varies in style from chapter to chapter and exposes the reader to a variety of communication techniques
