by authorities in the field with chapter contributions from specialists *A History of Nerve Functions* Sidney Ochs, 2004-04-19 Recent developments have extended our knowledge of the basic functions of nerves notably the demonstration of the mechanism within nerve fibers which transports a wide range of essential materials In order to understand how this discovery occurred it is necessary to examine its history The story begins in ancient Greece when nerves were conceived of as channels through which animal spirits carried sensory impressions to the brain As science developed the discoveries of various physical and chemical agents supplanted the agency of animal spirits until the molecular machinery of transport was recognized In this fascinating and complete history Sidney Ochs begins with a chronological look at this path of discovery followed in the second half by a thematic approach wherein the author describes the electrical nature of the nerve impulse fiber form and its changes in degeneration and regeneration reflexes learning memory and other higher functions in which transport participates **Reworking the Bench** F.L. Holmes, J. Renn, Hans-Jörg Rheinberger, 2006-04-11 Research records composed of notes and protocols have long played a role in the efforts to understand the origins of what have come to be seen as the established milestones in the development of modern science The use of research records to probe the nature of scientific investigation itself however is a recent development in the history of science With Eduard Dijksterhuis we could address them as a veritable epistemological laboratory The purpose of a workshop entitled Reworking the Bench Laboratory Notebooks in the History of Science held at the Max Planck Institute for the History of Science in Berlin was to bring together historians who have been exploiting such resources to compare the similarities and differences in the materials they had used and to measure the potential and scope for future explorations of science in the making based on such forms of documentation The contributions which form this volume are based on papers presented at this workshop or written afterward by participants in the discussions This is the first book that addresses the issue of research notes for writing history of science in a comprehensive manner Its case studies range from the early modern period to present and cover a broad range of different disciplines *The History of Electromagnetism* Wasiful Alam, 2024-07-10 This book contains the entire development and human history regarding electromagnetism The timeline starts at ancient observations and provides the reader a complete historical tour till modern developments It is organized according to the progression of the timeline and the individuals who performed the experiments or came up with the theories The reader will gradually gain understanding and will be able to figure out of how each improvement lead to the next discovery This book is influential for the next generation of inventors **Encyclopedia of the Neurological Sciences**, 2014-04-29 The Encyclopedia of the Neurological Sciences Second Edition Four Volume Set develops from the first edition covering all areas of neurological sciences through over 1000 entries focused on a wide variety of topics in neurology neurosurgery psychiatry and other related areas of neuroscience The contributing authors represent all aspects of neurology from many viewpoints and disciplines to provide a complete overview of the field Entries are designed to be understandable

without detailed background knowledge in the subject matter and cross referencing and suggested further reading lead the reader from a basic knowledge of the subject to more advanced understanding The easy to use encyclopedic dictionary format of the Encyclopedia of the Neurological Sciences Second Edition features alphabetic entries extensive cross referencing and a thorough index for quick reference The wealth of information provided by these four volumes makes this reference work a trusted source of valuable information for a wide range of researchers from undergraduate students to academic researchers Provides comprehensive coverage of the field of neurological science in over 1 000 entries in 4 volumes Encyclopedic dictionary format provides for concise readable entries and easy searching Presents complete up to date information on 32 separate areas of neurology Entries are supplemented with extensive cross referencing useful references to primary research articles and an extensive index
