## Hearing Loss From Noise Exposure

- Hearing loss from noise exposure is often not noticed at first because it is so gradual.
- Usually a person loses the ability to hear higher pitches first.
- Often the first noticeable effect is difficulty in hearing speech.

## Effects Of Noise On Hearing:

*Noise-Induced Hearing Loss* Colleen G. Le Prell, Donald Henderson, Richard R. Fay, Arthur N. Popper, 2011-10-30  
Exposure to loud noise continues to be the largest cause of hearing loss in the adult population. The problem of NIHL impacts a number of disciplines. US standards for permissible noise exposure were originally published in 1968 and remain largely unchanged today. Indeed, permissible noise exposure for US personnel is significantly greater than that allowed in numerous other countries, including for example Canada, China, Brazil, Mexico, and the European Union. However, there have been a number of discoveries and advances that have increased our understanding of the mechanisms of NIHL. These advances have the potential to impact how NIHL can be prevented and how our noise standards can be made more appropriate. Effects of Noise on Hearing Donald Henderson, 1976 *Turn it Down* United States. Congress. House. Select Committee on Children, Youth, and Families, 1991. A Congressional hearing on noise-induced hearing loss, an often overlooked health issue, was held to determine the extent of the problem in children and youth. Congresswoman Patricia Schroeder, who presided, cited the effects of repeated exposure to loud sounds over a period of time, including the role that personal stereos and some common household items can play in hearing loss. The electronics industry was invited to participate in the hearing but was not represented. A fact sheet prepared for the record gives statistics on the number of Americans who are hearing impaired and summarizes research on the exposure of children and youth, the special hazards of personal stereo use, prevention measures, and the effects of exercise, alcohol, and smoking on hearing. Included are prepared statements and testimony from congressmen from Illinois and Missouri and from witnesses representing such groups as the record industry, the Central Institute for the Deaf, the University of Michigan Medical Center, the National Institutes of Health, Self Help for Hard of Hearing People, Hearing Education and Awareness for Rockers, the Car Audio Specialists Association, and the American Speech Language Hearing Association. Statements on exposure to firecrackers and the times when a child's hearing should be tested are also included. LB The Handbook of Hearing and the Effects of Noise Karl D. Kryter, 2023-12-11. Contains information on the fundamentals of hearing and sound physics. This book offers a review of research findings and concepts on the effects of noise on people. It focuses on the psychological and physiological effects of noise on hearing and performance. It explains the interrelations of various factors involved in making noise a problem. **The Effects of Noise on Aquatic Life** Arthur N. Popper, Anthony Hawkins, 2012-01-26. The Second International Conference on the Effects of Noise on Aquatic Life will take place in Ireland, August 15-20, 2010. The main emphasis of the conference will be on defining the current state of knowledge. However, we will also assess progress in the three years since the First conference. The Second conference will place strong emphasis on recent research results, the sharing of ideas, discussion of experimental approaches, and analysis of regulatory issues. *The Effects of Noise on Man* Karl D. Kryter, 2013-09-03. The Effects of Noise on Man covers the techniques for the evaluation of environmental noise in terms of its effects on human. The book provides the fundamental

definitions of sound its measurement and concepts of the basic functioning and the attributes of the auditory system The text also presents along with their experimental basis procedures for estimating from physical measures of noise its effects on man s auditory system and speech communications The last part of the book is devoted to man s nonauditory system responses and includes information about the effects of noise on work performance sleep feelings of pain vision and blood circulation
