It presents a radically nominalist and individualist critique of, on the one hand, Christianity, nationalism, and traditional morality, and on the other, humanism, utilitarianism, liberalism, and much of the then-burgeoning socialist movement, advocating instead an amoral, although importantly not inherently immoral or antisocial, egoism. Stirner believed that there was no objective social reality independent of the individual; social classes, the state, the masses, and humanity are abstractions and therefore need not be considered seriously. He wrote of a finite empirical ego, which he saw as the motive force of every human action. Writing chiefly for working-class readers, he taught that all persons are capable of the self-awareness that would make them egoists or true individuals. Max Stirner, in his book *The Ego and His Own* (1845), recommended instead of social reform a ruthless individualism that should seek satisfaction by any means and at whatever risk. Karl Marx was only one of many contemporaries provoked into a lengthy rebuttal of Stirner's argument. Stirner has been portrayed variously as a precursor of Nietzsche, both stylistically and substantively, a forerunner of existentialism, and as an individualist anarchist. This edition of his work comprises a revised version of Steven Byington's much-praised translation together with an
