Society     *Stone Vessels in the Levant* RachaelThyrza Sparks,2017-07-05 Examining stone vessels in the Levant during the 2nd millennium BC the author explores the links between material culture and society through a comprehensive study of production and distribution Extensively illustrated with 100 drawings maps and charts this volume includes a full object catalogue This study represents the first comprehensive overview of the stone vessel assemblagesof the Levant in this period a time which fed by an increase of wealth and interregional trade saw a growth in the popularity and variety of such vessels Previously our understanding of the varied functions and forms of these diverse vessels has been relatively underdeveloped In this volume the author attempts to address this problem by creating a typological framework though which we can analyse variability and define essential characteristics of local stone vessel workshops Only once this has been achieved is it possible to look at stone vessel production in its wider cultural context Subsequent chapters explore broader themes beginning within the workshops themselves examining the links between craftsmen their sources of raw materials and the authorities that controlled and distributed their output Considerations of the geographical and chronological distribution of such goods are then used to provide a regional perspective for the operation of these workshops connections between them and further insights into the nature of local and international trade Finally the objects themselves can be used to assess the impact of trends such as the growing Egyptianization of the ruling classes of the Levant at this time     The Message of the Sphinx Graham Hancock,Robert Bauval,2009-06-10 NATIONAL BESTSELLER Two Egypt experts posit a revolutionary theory The Sphinx and other great Egyptian monuments are older than common history books tell us and are arranged in such a way as to send us a message from the silent past Graham Hancock is featured in Ancient Apocalypse a Netflix original docuseries Guardian of the ancient mysteries the keeper of secrets For thousands of years the Great Sphinx of Egypt has gazed toward the east its eyes focused on eternity reading a message in the stars that mankind has long forgotten And today as our civilization stands poised at the end of a great cycle it is a message that beckons insistently to be understood All the clues are in place Geology and archeo astronomy have already indicated that the lion bodied Sphinx may be vastly older than Egyptologists currently believe dating not from 2500 B C but from 10 500 B C the beginning of the astrological Age of Leo And we now know that the three pyramids of Giza standing on high ground half a mile to the west of the Sphinx are in fact a precise map of the three stars of Orion s belt formed in fifteen million tons of solid stone Are these monuments trying to tell us something And if so what In The Message of the Sphinx Robert Bauval and Graham Hancock present a tour de force of historical and scientific detective work that unravels the millennial code embodied in these structures Using sophisticated computer simulations of ancient skies they unravel the riddle of the Sphinx and they present a startling new theory concerning the enigmatic Pyramid Texts and other archaic Egyptian scriptures Their discoveries lead the authors to this question Does mankind have a rendezvous with destiny a rendezvous not in the future but in the distant past at a precise place and time The secrets can be kept no longer The Message of the Sphinx brings them to light     Working in the Suburbs

Anna K. Hodgkinson, 2025-04-01 A century ago Charles Leonard Woolley directed the first excavations at Amarna site M50 14 16 identifying it as a workshop for glass and faience However the archaeological record and its publication in *The City of Akhenaten I* were somewhat superficial New excavations conducted by the Amarna Project in 2014 and 2017 yielded extensive evidence of glass faience stone and metalworking reaffirming the site's role as a workshop These investigations also illuminated its domestic character uncovering valuable data on houses and other structural remains This volume presents a near complete record of the site offering a comprehensive archaeological and architectural evaluation alongside in depth analyses of material culture including archaeobotany charcoal animal bones ceramics and other artefacts The individual chapters reconstruct the chaînes opératoires of various craft production activities Additionally the organisation of production and the concept of cross craft interaction are explored as the site is situated within the broader industrial network of Amarna This volume furthermore provides an in depth examination of the inhabitants' roles and daily lives enriching our understanding of this significant site

*The Politics of Trade* Jane Roy, 2011-02-07 Until recently much of the discussion regarding the A Group has emphasised the influence of Egypt in the region Egyptian material found in A Group contexts has pointed to some type of exchange system between the two regions but the lack of A Group manufactured objects in Egyptian contexts has led to the argument that the relationship was somewhat one sided Yet was it and how different were Egyptians and Lower Nubians during the 4th millennium BC Re-examining the material evidence from three major archaeological salvage campaigns and using anthropological and economic theories this book takes a fresh look at exchange patterns between Egypt and Lower Nubia The changes and developments in these relationships potentially impacted the development towards the Egyptian state and the fate of the A Group

Art, Architecture, and Temples in Ancient Egypt Ezra Ivanov, 2022-07-25 Ancient Egyptian

art and architecture are fascinating beautiful and complex I've always been fascinated by the pyramids of Egypt and how they were built They are incredible feats of engineering but also religious centers where worshipers would go to pray and make offerings to their gods In addition to temples there were also tombs for royalty known as mastabas and commoners known as shaft tombs which were all made with an eye toward eternal life Ancient Egyptian gods and goddesses were important in Egyptian culture They were often represented in art or architecture and played an integral role in daily life Though the god Osiris was known to be king of the dead he did not hold the same power as other gods such as Ra or Hathor a cow headed goddess The priesthoods of these deities generally ruled over specific cities or professions for example priests at a temple dedicated to Amun would preside over all matters related to agriculture Such temples were built throughout Egypt's history one example is Deir el Bahari meaning monastery of the northern valley which served as both a royal mortuary temple and monastery for Nefertari during her lifetime Many structures built during this period reflect traditional architectural practices thick columns made from stone support large roof beams made from wood outer walls are covered with painted plaster decorated with scenes depicting daily life for example artists working on wall paintings inside temples such as this one often described themselves taking part in those very activities You may have heard that pyramids were built as tombs for pharaohs but there's more to it The pharaohs were buried in the Valley of the Kings part of the Great Pyramids complex The pyramids are made up of stone blocks of limestone built with ramps rather than cranes or scaffolding so that workers could move them into place In terms of shape they're somewhere between a cube and a cone this helps keep them stable during construction and makes them look good from afar Temples were the most important buildings in ancient Egypt They were places of worship and learning government and justice The temple was the most important place for any Egyptian because it was where people could connect with their gods and get guidance on how to lead a good life
