Women, Work And Sexual Politics In Eighteenth-Century

England Bridget Hill, 2005-08-04 The author offers a reassessment of how women's experience of work in 18th century England was affected by industrialization and other elements of economic, social and technological change. This study focuses on the household, the most important unit of production in the 18th century. Hill examines the work done by the women of the household, not only in housework but also in agriculture and manufacturing, and explains what women lost as the household's independence as a unit of economic production was undermined. Considering the whole range of activities in which women were involved, including many occupations unrecorded in censuses which have therefore been largely ignored by historians, Hill charts the increasing sexual division of labour and highlights its implications. She also discusses the role of service in husbandry and apprenticeship as sources of training for women and the consequences of their decline. The final part of the book considers how the changing nature of women's work influenced courtship, marriage and relations between the sexes. Among the topics discussed are the importance of the women's contribution to setting up and maintaining a household, labouring women's attitudes to marriage and divorce and the customary alternatives to them, and the role of spinsters and widows. The author concludes by asking to what extent the industrial revolution improved the overall position of women and the opportunities open to them. This series aims to re-establish women's history and to challenge the assumptions of much mainstream history. Focusing on the modern period and encouraging perspectives from other disciplines, it seeks to concentrate upon areas of focal importance in the history of Britain and continental Europe. Bridget Hill is the author of *Eighteenth Century Women: An Anthology* and *The First English Feminist*. [Eighteenth-century Women](#), 1984. *Women's Utopias of the Eighteenth Century*. Alessa Johns, 2003. No human society has ever been perfect, a fact that has led thinkers as far back as Plato and St Augustine to conceive of utopias both as a fanciful means of escape from an imperfect reality and as a useful tool with which to design improvements upon it. The most studied utopias have been proposed by men, but during the eighteenth century a group of reform-oriented female novelists put forth a series of work that expressed their views of and their reservations about ideal societies. In *Women's Utopias of the Eighteenth Century*, Alessa Johns examines the utopian communities envisaged by Mary Astell, Sarah Fielding, Mary Hamilton, Sarah Scott and other writers from Britain and continental Europe, uncovering the ways in which they resembled and departed from traditional utopias. Johns demonstrates that while traditional visions tended to look back to absolutist models, women's utopias quickly incorporated emerging liberal ideas that allowed far more room for personal initiative and gave agency to groups that were not culturally dominant, such as the female writers themselves. Women's utopias, Johns argues, were reproductive in nature. They had the potential to reimagine and perpetuate themselves. **Woman in France During the Eighteenth Century**, Julia Kavanagh, 1950. **The Position of the Eighteenth Century Woman in the World of Men**, Leila Scofield Wagner, 1947.
