**Baltic Iron in the Atlantic World in the Eighteenth Century** Chris Evans, Göran Rydén, 2007-08-31 The eighteenth century is often viewed as the heroic age of the British iron industry a time of triumphant technological progress In fact it was an age of thwarted ambition when the take up of new technologies proved frustratingly slow The eighteenth century was

more accurately the age of Baltic iron Swedish and Russian iron surged onto the British market meeting the demand that British ironmasters could not satisfy This was of epochal importance Swedish iron allowed British steel makers and hardware manufacturers to dominate Atlantic markets In turn the rhythms of Atlantic commerce resounded through peasant communities in Sweden Baltic iron in the Atlantic world captures this moment In doing so it internationalises Swedish history in a radical way and presses an oceanic perspective on the traditionally insular view of the rise of heavy industry in Britain

possible to the great south land sighted years before by Captain James Cook Out of the embers of the African debacle came the modern nation of Australia The extraordinary tale is now being told for the first time how a small band of good for nothing members of the British Empire spanned the world from America to Africa and on to Australia profoundly if utterly unwittingly changing history

**Wicked Ladies** Gregory J. Durston, 2014-08-11 In recent years, much has been published on women, crime, and justice in English history. However, for a variety of reasons, particularly the ready availability of source material for the capital, such research has tended to have an overwhelmingly Metropolitan focus. This book aims to redress the balance for the long eighteenth century by concentrating on women from outside the London area. Although vitally important to the wider country, the Metropolis always contained a small minority of the country's female offenders and defendants, albeit a significantly higher percentage of the latter than its share of the national population. The capital also had a rather different criminal justice and policing system to that found in the rest of the country at this time. The book focuses on women's experiences in provincial England as both the perpetrators of various crimes and as suspects or defendants in the country's criminal justice system. The areas considered range from the West Country to the Scottish Border, and the offences examined include all of the major crimes, such as murder and theft, as well as some more arcane forms of deviance, including arson and coining. The factors that prompted women to offend, their likelihood of exposure when they did so, and their treatment before the courts and in the penal system are all considered in detail. In particular, the book examines the gendered differences found in female crime when compared to that of their male counterparts and how women's experiences of the era's justice system differed from those of men. It also compares provincial women to those found in the Metropolis in these respects. Extensive use is made of primary sources in portraying the lives of female criminals from Kent to Cumberland, while comparison is also made with women from other parts of the British Isles and beyond, so that the respective roles of structural determinants and national culture in crime and justice can be considered.
