imagine new ways of being that respond to this imperative and immediate global issue Concurrently it is also up to critics readers and thinkers everywhere to appraise these narratives of possibility for their complexities and internal conflicts as well as for their promise as we enter this new era of rapid change and adaptation Because creative and critical thinkers must work together towards this goal the idea of the critical utopia coined by Tom Moylan in response to the fiction of the 1970s is now ingrained in the common argot and is one of the key ideas discussed in this book This development in the genre which combines self reflexivity and multiple perspectives within its dreaming represents the postmodern spirit in its most regenerative aspect This book is testament to such hopes and potential realities This book was originally published as a special issue of Green Letters

**Anarchism and utopianism** Laurence Davis,Ruth Kinna,2024-06-04 This collection of original essays examines the relationship between anarchism and utopianism exploring the intersections and overlaps between these two fields of study and providing novel perspectives for the analysis of both The book opens with an historical and philosophical survey of the subject matter and goes on to examine antecedents of the anarchist literary utopia anti capitalism and the anarchist utopian literary imagination free love as an expression of anarchist politics and utopian desire and revolutionary practice Contributors explore the creative interchange of anarchism and utopianism in both theory and modern political practice debunk some widely held myths about the inherent utopianism of anarchy uncover the anarchistic influences active in the history of utopian thought and provide fresh perspectives on contemporary academic and activist debates about ecology alternatives to capitalism revolutionary theory and practice and the politics of art gender and sexuality Scholars in both anarchist and utopian studies have for many years acknowledged a relationship between these two areas but this is the first time that the historical and philosophical dimensions of the relationship have been investigated as a primary focus for research and its political significance given full and detailed consideration

contemporary debates Literatures of Africa Australia China Latin America and the Middle East are discussed in this global cross disciplinary and comprehensive volume *Urban Utopias* Malcolm Miles,2007-11-21 Utopia tends to generate a bad press regarded as impracticable perhaps nostalgic or contradictory when visions of a perfect world cannot accommodate the change that is necessary to a free and self organizing society But people from diverse backgrounds are currently building a new society within the old balancing literal and metaphorical utopianism and demonstrating plural possibilities for alternative futures and types of settlement Thousands of such places exist around the world including intentional communities eco villages permaculture plots religious and secular retreats co housing projects self build schemes projects for low impact housing and activist squats in urban and rural sites This experience suggests however that when planning and design are not integral to alternative social formations the modern dream to engineer a new society cannot be realized The book is structured in four parts In part one literary and theoretical utopias from the early modern period to the nineteenth century are reconsidered Part two investigates twentieth century urban utopianism and contemporary alternative settlements focusing on social and environmental issues activism and eco village living Part three looks to wider horizons in recent practices in the non affluent world and Part four reviews a range of cases from the author s visits to specific sites This is followed by a short conclusion in which a discussion of key issues is resumed This book brings together insights from literary theoretical and practical utopias drawing out the characteristics of groups and places that are part of a new society It links today s utopian experiments to historical and literary utopias and to theoretical problems in utopian thought

**William Morris's Utopianism** Owen Holland,2017-12-04 This book offers a new interpretation of William Morris s utopianism as a strategic extension of his political writing Morris s utopian writing alongside his journalism and public lectures constituted part of a sustained counter hegemonic project that intervened both into the life world of the fin de si cle socialist movement as well as the dominant literary cultures of his day Owen Holland demonstrates this by placing Morris in conversation with writers of first wave feminism nineteenth century pastoralists as well as the romance revivalists and imperialists of the 1880s In doing so he revises E P Thompson s and Miguel Abensour s argument that Morris s utopian writing should be conceived as anti political and heuristic concerned with the pedagogic education of desire rather than with the more mundane work of propaganda He shows how Morris s utopianism emerged against the grain of the now here embroiled in instrumental propagandistic polemic complicating Thompson s and Abensour s view of its anti political character Political Education in the Anthropocene Nathanaël Wallenhorst,Renaud Hétier,Jean-Philippe Pierron,Christoph Wulf,2023-10-19 This book articulates an educational theory as well as a political theory of the Anthropocene Divided into three sections it addresses educational anthropology cultures and institutions and educational recommendations in the Anthropocene Topics covered in the volume measure the impact of the idea of the Anthropocene on the type of anthropology that underlies education and on a phenomenology of relationship It links the notion of the Anthropocene with cultures and

institutions so as not to smooth out or erase the latter Finally it presents proposals and recommendations for educational practices The work advocates rethinking education as an essential component in ensuring the sustainability of human life in society by proposing to go beyond the approach of education for sustainable development or environmental education The work also brings together empirical contributions in which proposals are elaborated for programs pedagogical devices and experiments relating to the preparation of the future in the field of education This volume is of interest to researchers of the Anthropocene

**Real Green** Manuel Arias-Maldonado, 2016-03-23 What would a sustainable society look like How could it be achieved By challenging conventional wisdom about the ecological crisis and reframing the traditional values of green politics Real Green Sustainability after the End of Nature offers new answers to the key questions of the environmental debate In this ground breaking and challenging work Manuel Arias Maldonado convincingly argues that since nature has now been transformed into a part of the human environment it can be seen to no longer exist Ecological problems thus become an inevitable and normal feature of our relationship with nature Hence a post natural environmentalism realistic and liberal while remaining green is advocated In this framework sustainability democracy and liberalism become mutually reinforcing elements rather than conflicting ones Only by combining them can a green society be realised

*Futuristic Cars and Space Bicycles* Jeremy Withers, 2020 Examining representations of cars and bicycles in American science fiction from the late nineteenth century to the present day Futuristic Cars and Space Bicycles argues that science fiction by and large perceives the car as anything but a marvelous invention of modernity Rather the genre often scorns and ridicules the automobile and instead promotes more sustainable more benign more restrained technologies of movement such as the bicycle

**Green Utopianism** Karin Bradley, Johan Hedrén, 2014-03-21 Utopian thought and experimental approaches to societal organization have been rare in the last decades of planning and politics Instead there is a widespread belief in ecological modernization that sustainable societies can be created within the frame of the current global capitalist world order by taking small steps such as eco labeling urban densification and recycling However in the context of the current crisis in which resource depletion climate change uneven development and economic instability are seen as interlinked this belief is increasingly being questioned and alternative developmental paths sought This collection demonstrates how utopian thought can be used in a contemporary context as critique and in exploring desired futures The book includes theoretical perspectives on changing global socio environmental relationships and political struggles for alternative development paths and analyzes micro level practices in co housing alternative energy provision use of green space transportation co production of urban space peer to peer production and consumption and alternative economies It contributes research perspectives on contemporary green utopian practices and strategies combining theoretical and empirical analyses to spark discussions of possible futures
