The ecology and management of African wetland vegetation Patrick Denny, 2012-12-06 Interest in the biology of African wetlands was initiated in the last century with the hypothesis that Lake Tanganyika was once part of a Jurassic sea and was furthered by Cunningham's expedition at the beginning of this century which proved that it was not. In the late 1920s ecological studies encouraged by the growing importance of inland fisheries were started by British, French and Belgian biologists. Some twenty years later several government limnological research centres and fishery departments were established in tropical Africa and scientific progress was accelerated. Scientific collaboration between the regions south of the Sahara was started formally in 1951 by the Scientific Council for Africa and stimulated by the International Biological Programme 1964-74 with its emphasis on biological productivity. Some of its interests were taken on by SCOPE which recently selected continental wetlands as a Special Project hence this book. The five authors with Patrick Denny as editor have made a very valuable contribution both to science and to the management of Africa's natural resources. They have filled a gap in the synthesis of knowledge about Africa's environments which is long overdue. The term wetland is used today in several different contexts. For this purpose it excludes the seas and large open inland waters which are too deep for rooted plants but includes the huge areas of floodplains and dambos which may change seasonally from standing water to very dry lands.

Northern Forested Wetlands Ecology and Management Carl C. Trettin, 2018-12-19 Forested wetlands are a major component of northern landscapes important both for their ecological functions and their socioeconomic values. Historically these lands have been used for timber and fiber products, hunting, fishing, trapping, food gathering and recreation. There are many questions about the use and management of these lands in the future particularly with respect to forest products, hydrology and water quality, plant and wildlife ecology, landscape dynamics and wetland restoration. Northern Forested Wetlands Ecology and Management provides a synthesis of current research and literature. It examines the status, distribution and use of these wetland resources. The book focuses on understanding the role of wetlands in the landscape and on how to manage these wetlands and sustain their important functions. This is a primary reference text for the study and management of northern forested wetlands providing a forum for information discovered by researchers and managers from many nations.

Wetlands of the World I: Inventory, Ecology and Management Dennis F. Whigham, D. Dykyjová, S. Hejný, 1993-03-31 This work deals with the distributions of wetlands, the description of wetland types, wetland classification systems, ecological characteristics, primary forcing functions which are responsible for the development and persistence of the wetlands, wetland use and conservation and recommendations on what should be done for each type of wetland.

Wetland Ecosystems William J. Mitsch, James G. Gosselink, Li Zhang, Christopher J. Anderson, 2009-04-13 New focused text introduces readers to wetland ecosystems and systems approaches to studying wetlands. With its comprehensive coverage of wetland science, management and restoration, Mitsch and Gosselink's Wetlands has been the premier reference on wetlands for more than two decades. Now the coverage of specific wetland ecosystem types from earlier editions of this acclaimed

work has been updated revised and supplemented with additional content in order to create this new text focusing exclusively on wetland ecosystems This book now complements Wetlands Fourth Edition Following an introduction to ecosystems in general and wetland ecosystems in particular Wetland Ecosystems examines the major types of wetlands found throughout the world coastal wetlands freshwater marshes and forested swamps and peatlands The final chapter reviews three fundamental systems approaches to studying wetlands mesocosms full scale experimental ecosystems and mathematical modeling This new text features Updated descriptions of the hydrology biogeochemistry and biology of the main types of wetlands found in the world New content introducing general ecosystems wetland ecosystems whole ecosystem and mesocosm experiments with wetlands and systems ecology and modeling A detailed description of the ecosystem services provided by wetlands A broad international scope including many examples of wetlands located outside North America Two new coauthors offering new perspectives and additional insights into the latest ecosystem and modeling techniques An abundance of illustrations helps readers understand how different biological communities and the abiotic environment in wetland ecosystems interact and function Tables and text boxes provide at a glance summaries of key information Lastly each chapter concludes with a list of recommended readings This text has been designed as an introduction for students and professionals in wetland ecology and management general ecology environmental science and natural resource management

Wetland and Riparian Areas of the Intermountain West Mark C. McKinstry, Wayne A. Hubert, Stanley H. Anderson, 2004-07-01 Wetlands and riparian areas between the Rocky Mountains and the Sierra Nevada are incredibly diverse and valuable habitats More than 80 percent of the wildlife species in this intermountain region depend on these wetlands which account for less than 2 percent of the land area for their survival At the same time the wetlands also serve

the water needs of ranchers and farmers recreationists vacation communities and cities It is no exaggeration to call water the liquid gold of the West and the burgeoning human demands on this scarce resource make it imperative to understand and properly manage the wetlands and riverine areas of the Intermountain West This book offers land managers biologists and research scientists a state of the art survey of the ecology and management practices of wetland and riparian areas in the Intermountain West Twelve articles examine such diverse issues as laws and regulations affecting these habitats the unique physiographic features of the region the importance of wetlands and riparian areas to fish wildlife and livestock the ecological function of these areas their value to humans and the methods to evaluate these habitats The authors also address the human impacts on the land from urban and suburban development mining grazing energy extraction recreation water diversions and timber harvesting and suggest ways to mitigate such impacts In addition to the editors the contributors to this volume are Paul Adamus Oregon State University Corvallis Michael A Bozek University of Wisconsin Stevens Point Robert C Ehrhart Oregon State University Bend James H Gammonley Colorado Division of Wildlife Fort Collins Paul L Hansen Bitterroot Restoration Corvallis Montana E Andrew Hart University of Wyoming Laramie Murray K Laubhan U S Geological Survey Fort Collins Colorado Kirk Lohman University of Idaho Moscow James R Lovvorn University of Wyoming Laramie Neal D Niemuth University of Wisconsin Stevens Point Richard A Olson University of Wyoming Laramie Neil F Payne University of Wisconsin Stevens Point Mark A Rumble U S Department of Agriculture Forest Service Rocky Mountain Research Station Rapid City South Dakota Maureen Ryan University of Toledo Ohio College of Law Brian E Smith U S Geological Survey Northern Prairie Wildlife Research Center Jamestown North Dakota Mark Squillace University of Toledo Ohio College of Law Stephen A Tessmann Wyoming Game and Fish Department Cheyenne David W Willis South Dakota State University Brookings

Wetland P. C. Sinha, Rajesh Mohanty, 2002 With reference to India **Coastal Wetlands** Gerardo Perillo, Eric Wolanski, Donald R Cahoon, Charles S Hopkins, 2018-11-02 Coastal Wetlands Second Edition An Integrated and Ecosystem Approach provides an understanding of the functioning of coastal ecosystems and the ecological services that they provide As coastal wetlands are under a great deal of pressure from the dual forces of rising sea levels and the intervention of human populations both along the estuary and in the river catchment this book covers important issues such as the destruction or degradation of wetlands from land reclamation and infrastructures impacts from the discharge of pollutants changes in river flows and sediment supplies land clearing and dam operations Covers climate change and its influence on coastal wetland form and function Provides a fully updated and expanded resource including new chapters on modeling management and the impact of climate change Contains full color figures of wetlands and estuaries in different parts of the world **Wetlands Ecology** Susanta Kumar Chakraborty, Poulomi Sanyal, Ratnadeep Ray, 2023-03-11 This book discusses current knowledge and challenges with the ecological management and conservation of wetlands with a focus on the East Kolkata Wetlands of India This area is referred to as a Ramsar Site a designation given to areas with special protection statuses since it is the largest

natural waste recycling system in the world The site faces many threats to its biodiversity and ecosystem functioning due to anthropogenic activity in the region and therefore an assessment of the ecosystem services bio ecological uniqueness and issues stemming from climate change and human impacts is needed to develop protection strategies for the future ecological functioning and sustainability of the wetlands The authors use GIS and remote sensing techniques to assess and monitor harmful industrial and environmental impacts on the wetlands and to inform mitigation and conservation strategies in the face of ongoing threats such as pollution habitat destruction and bioinvasion The book also highlights various social and economic aspects tied to the functioning and management of the wetlands along with ecological biological and physio chemical considerations The study will be of use to students and researchers in aquatic ecology biodiversity and environmental sustainability and conservation as well as to environmental planners engineers and policymakers

Wetland Techniques James T. Anderson, Craig A. Davis, 2013-10-22 Wetlands serve many important functions and provide numerous ecological services such as clean water wildlife habitat nutrient reduction and flood control Wetland science is a relatively young discipline but is a rapidly growing field due to an enhanced understanding of the importance of wetlands and the numerous laws and policies that have been developed to protect these areas This growth is demonstrated by the creation and growth of the Society of Wetland Scientists which was formed in 1980 and now has a membership of 3 500 people It is also illustrated by the existence of 2 journals Wetlands and Wetlands Ecology and Management devoted entirely to wetlands To date there has been no practical comprehensive techniques book centered on wetlands and written for wetland researchers students and managers This techniques book aims to fill that gap It is designed to provide an overview of the various methods that have been used or developed by researchers and practitioners to study monitor manage or create wetlands Including many methods usually found only in the peer reviewed or gray literature this 3 volume set fills a major niche for all professionals dealing with wetlands

Wetlands: Functioning, Biodiversity Conservation, and Restoration Roland Bobbink, Boudewijn Beltman, Jos T.A. Verhoeven, Dennis F. Whigham, 2007-06-19 This book gives a broad and well integrated overview of recent major scientific results in wetland science and their applications in natural resource management After an introduction into the field 12 chapters contributed by internationally known experts summarize the state of the art on a multitude of topics The coverage is divided into three sections Functioning of Plants and Animals in Wetlands Conservation and Management of Wetlands and Wetland Restoration and Creation

Fundamentals of Tropical Freshwater Wetlands Tatenda Dalu, Ryan J. Wasserman, 2021-11-25 Fundamentals of Tropical Freshwater Wetlands From Ecology to Conservation Management is a practical guide and important tool for practitioners and educators interested in the ecology conservation and management of wetlands in tropical subtropical regions The book is written in such a way that in addition to scientists and managers it is accessible to non specialist readers Organized into three themed sections and twenty three chapters this volume covers a variety of topics exposing the reader to a full range of scientific conservation and management issues Each

chapter has been written by specialists in the topic being presented The book recognizes that wetland conservation science and management are interlinked disciplines and so it attempts to combine several perspectives to highlight the interdependence between the various professions that deal with issues in these environments Within each chapter extensive cross referencing is included so as to help the reader link related aspects of the issues being discussed Contributed to by global experts in the field of tropical wetlands Includes case studies and worked examples enabling the reader to recreate the work already done Focuses on tropical systems not available in any other book The Ecology and Management of African Wetland Vegetation Patrick Denny,1985-07-31
