Economic And Political Consequences Of Multinational Enterprise:

The Economic and Political Consequences of Multinational Enterprise Raymond Vernon, 1972 **The Role of Multinational Companies in the Middle East** Mamarinta P. Mababaya, 2002 This study investigated whether known economic and international business theories available in the literature are meaningful enough to explain the nature existence and role of multinational companies MNCs in the Middle East particularly Saudi Arabia Two sets of questionnaires were distributed in major cities of Saudi Arabia one set for 100 multinational managers and another for 280 multinational customers 234 questionnaires were collected 45 from multinational managers and 189 from customers This represents a total response rate of 62 percent which is adequate for this study The empirical results supported with comprehensive secondary data confirmed virtually all of the research hypotheses The study found that joint ventures are the dominant form of multinational business in Saudi Arabia both in manufacturing and service industries The core roles of MNCs in the Saudi foreign ventures are evident in the cross border value adding activities of marketing trading manufacturing consulting contracting project management insurance hotel operation and banking Likewise MNCs provide licensing franchising financing services and various auxiliary roles in the Kingdom Therefore the multinationality of a firm or a group of firms operating across national boundaries is not necessarily synonymous with international production the main subject of contemporary multinational theories The respondents generally perceived the competitiveness of MNCs operating in Saudi Arabia as a function of a number of economic management marketing technological and other variables They also perceived the contributions of MNCs to the Kingdom's socio economic developments as significant and positive The study also found that understanding Islamic values and ethics is important for MNCs In this regard the researcher looked at some objective indicators of business success and related them to selected measures of MNCs local cultural awareness and responsiveness The results indicate that the business success of multinationals operating in Saudi Arabia is positively related to their local cultural awareness and responsiveness Along this line this study covers some vital elements of Islamic culture which will help MNCs understand further the cultural needs values and sensitivities of the Saudi people and Muslims in general

Cohen, 2017-03-02 Prior to the 1970s few serious efforts were made to bridge the gap between economics and political science in the study of international relations Systematic scholarly analysis of International Political Economy IPE emphasizing formal integration of elements of orthodox

market and political analysis is really of very recent origin This volume brings together some of the most important research papers published in the modern field of IPE since its birth less than four decades ago emphasizing work that has significantly advanced theoretical and analytical understandings Coverage includes grand questions of systemic transformation and system governance as well as more narrowly focused explorations of the two most central issue areas of the world economy trade and money and finance The introductory essay locates this selection of articles in the context of the field s broad evolution and development to date Ford and the Global Strategies of Multinationals Maria Isabel Studer

Noguez,2003-08-27 Today the Multinational Enterprise MNE is seen as a leading agent in the process of globalization As they adopt global strategies MNE s are seen to be creating stronger deeper and more lasting links amongst countries thus shifting the balance of power inexorably in their favour to the detriment of the state This book interrogates this idea by undertaking a historical analysis of the global strategies of Ford **International Trade and Finance** Peter B.

Kenen,2008-07-10 The nine papers in this volume were written for a conference on research in international trade and finance held at Princeton University in March 1973 Each author was asked to survey research on one major topic with a view to answering three questions What have we learned from recent empirical research What are the major gaps in present knowledge How should we go about filling those gaps When answering the second question authors were urged to look at the practical requirements of those who must make policy concerning the international economy and at the opportunities and insights offered by recent developments in pure theory When answering the third they were urged to look at developments in econometric technique newly available data and work in progress in related fields **Multinational Enterprise and**

Economy R. J. Barry Jones,2002-09-11 This three volume Encyclopedia offers the first comprehensive and authoritative survey of the rapidly developing field of international political economy Its entries cover the major theoretical issues and analytical approaches within the field The set also provides detailed discussion of the contributions of key individuals and surveys a wide range of empirical conditions and developments within the global political economy including its major institutions The Encyclopedia has been designed to be eclectic in approach and wide ranging in coverage Theoretical entries range from discussions of the definition and scope of the field through core methodological questions such as rationalism and the structure agent problem to surveys of the major theories and approaches employed in the study of the international political economy Implications of Multinational Corporations in Cameroon's Underdevelopment, 1960-2015 Kingsly

Awang Ollong,2025-06-05 This book explores the complex role of MNCs in the country s economic development It argues that while MNCs can theoretically contribute to growth through positive spill over effects like R D innovation and human resource development the actual impact in Cameroon remains unclear and under researched The book presents an empirical

survey of MNCs in Cameroon focusing on their corporate social responsibility CSR initiatives and their paradoxes Despite the presence of valuable natural resources the study finds that some MNCs such as BAT may contribute more to underdevelopment than development The book concludes that MNCs could play a more positive role if Cameroon implements policies to better regulate their activities thereby ensuring that their presence benefits the country s economic growth This work adds valuable insights to the literature on MNCs in Cameroon
