Islamic finance      **The Financial Crisis in Constitutional Perspective** Poul F Kjaer, Gunther Teubner, Alberto Febbrajo, 2011-07-27 This volume presents the first thorough sociologically informed legal analysis of the financial crisis which unfolded in 2008. It combines a multitude of theoretically informed analyses of the causes, dynamics and reactions to the crisis and contextualises these within the general structural transformations characterising contemporary society. It furthermore explores the constitutional implications of the crisis and suggests concrete changes to the constitutional set up of contemporary society. Although the question of individual responsibility is of crucial importance, the central idea animating the volume is that the crisis cannot be reduced to a mere failure of risk perception and management for which individual and collective actors within and outside of financial organisations are responsible. The 2008 crisis should rather be understood as a symptom of far deeper structural transformations. For example, contemporary society is characterised by massive accelerations in the speed with which societal processes are reproduced as well as radical expansions in the level of globalisation. These transformations have however been asymmetrical in nature insofar as the economic system has outpaced its legal and political counterparts. The future capability of legal and political systems to influence economic reproduction processes is therefore conditioned by equally radical transformations of their respective operational forms and self understanding. Potentially, the 2008 crisis therefore has far reaching constitutional implications.

**Against the Current: Privatization, Water Markets, and the State in Chile** Carl J. Bauer, 2012-12-06 In 1981 Chile's military government dictated a new Water Code that radically changed the country's previous water rights system by strengthening private property rights favoring market incentives and reducing state regulation. *Against the Current: Privatization, Water Markets, and the State in Chile* is the first empirical and interdisciplinary study of water markets in Chile which is the leading international example of free market water policies. *Against the Current: Privatization, Water Markets, and the State in Chile* challenges the glowing reports given by neoliberals in Chile and the World Bank showing that the results of this economic experiment have actually been rather mixed. Within the agricultural sector the Water Code has worked fairly well although the market incentives to conserve water have been ineffective and water rights trading has been less active than expected. The Code's impact has been more negative at the level of river basins where the institutional framework has revealed critical flaws in coordinating multiple water users and resolving conflicts. *Against the Current: Privatization, Water Markets, and the State in Chile* combines law, political economy and geography to analyze the disadvantages, problems and wider contexts of water markets. This book will appeal to everyone

interested in property rights market friendly environmental policies the political economy of sustainable development and the intersection of economics with law and institutions      Democratic and Authoritarian Political Systems in 21st Century World Society Anna L. Ahlers, Damien Krichewsky, Evelyn Moser, Rudolf Stichweh, 2021-03-05 This book is about the radical novelty of modern polities in a functionally differentiated world society Premodern states were at the apex of a stratified hierarchical society They dominated society and all its groups and strata Modern polities have to be understood through the ecology of relations among different function systems They have to find and incessantly redefine their place in society They produce decisions that are collectively binding but in preparing these decisions experience constraints and knowledge deficiencies that are related to the complexity of a functionally differentiated society The book concentrates on six analytical perspectives that reflect how modern polities are embedded into 21st century society These perspectives are the concept of inclusion and the inclusion revolution constitutive of modern polities the internal differentiation of polities that endows them with an unprecedented complexity the fact that polities do not know anything about society and the ways in which they compensate for this representation and responsiveness as strategies to reconnect with society the self restriction of some polities that brings about ever new autonomous expert organizations the symmetrical rise of autocracies and democracies as the two modern variants of political regimes      Legal, Political and Economic Strategies of Subsidies within the World Trade Organization Juliana Marteli Fais Feriato, 2024-11-01 From the Law and Economics perspective the book reveals the gaps of the trade multilateral system that allows governments to draw upon subsidies strategies according to their unilateral interests The book suggests that failures in WTO mechanisms has become great challenge for the multilateral system to restrain trade diversion Due to their character as public expenditures since they are granted by governments through tax incentives or direct financial investment granting subsidies are directly linked to the economic power of the countries For this reason some subsidies constitute a serious unfair trade practice that needs to be fought multilaterally depending on global cooperation so that all countries can have access to international trade Poor countries are severely affected by these practices meanwhile not all developing countries are impacted the same way because there are considerable levels of development Based on this the book proposes a preventive mechanism to discourage subterfuge and opportunism of rich countries in search of efficiency In order to do so firstly it will be addressed the economic theories that underlie free trade and the subsidies influence over international economy Next the Law and Economics approach will be presented by which the problematic economic and political subsidy strategies of member countries will be analyzed Based on these premises the book shows how subsidies and countervailing measures are regulated within the WTO and it points out the failures of the WTO mechanisms to combat specific subsidies which accentuate the differences between rich and poor countries Finally the book proposes preventive measures to hinder harmful effects of subsidies from materializing      *New Economic Constitutionalism in Europe* George Gerapetritis, 2019-10-31 New Economic Constitutionalism in Europe focuses on the

institutional mutation of constitutionalism following the major economic crisis in the Eurozone and globally The main axis is that a new economic constitutionalism has arisen which trespasses on the conventional conceptual foundations and needs to be addressed with novel institutional vehicles The author proposes an original and searching analysis of the significant constitutional evolutions that have taken place in member states in response to the global financial crisis The book combines a sophisticated theoretical model of a new form of economic constitutionalism with detailed practical argumentation This important new work provides a valuable addition to the understanding of this hugely important topic     Economic Reform and Political Change in Eastern Europe Judy Batt,1988-06-21 Economic reform the introduction of elements of the market into a planned economy has been the central political problem for socialist states for at least three decades This book seeks to elucidate the nature of the problem through a reconsideration of the general theoretical issues and through a comparative analysis of the practice of economic reform in two countries Czechoslovakia and Hungary     *Luhmann and Socio-Legal Research* Celso Fernandes Campilongo, Lucas Fucci Amato, Marco Antonio Loschiavo Leme de Barros,2020-12-29 This book discusses the designs and applications of the social systems theory built by Niklas Luhmann 1927 1998 in relation to empirical socio legal studies This is a sociological and legal theory known for its highly complex and abstract conceptual apparatus But how to change its scale in order to study more localised phenomena and to deal with empirical data such as case law statutes constitutions and regulation This is the concern of a wide variety of scholars from many regions engaged in this volume It focuses on methodological discussions and empirical examples concerning the innovations and potentials that functional and systemic approaches can bring to the study of legal phenomena institutions building argumentation and dispute settlement in the interface with economy and regulation and with politics and public policies It also discusses connections and contrasts with other jurisprudential approaches for instance with critical theory law and economics and traditional empirical research in law Two decades after Luhmann s death the 21st century has brought countless transformations in technologies and institutions These changes resulting in a hyper connected ultra interactive world society bring operational and reflective challenges to the functional systems of law politics and economy to social movements and protests and to major organisational systems such as courts and enterprises parliaments and public administration Pursuing an empirical approach this book details the variable forms by which systems construct their own structures and semantics and irritate each other Engaging Luhmann s theoretical apparatus with empirical research in law this book will be of interest to students and researchers in the field of socio legal studies the sociology of law legal history and jurisprudence
