Sustainable Rural Transformation Through Agro-Industries U.K. Srivastava,Pramila Srivastava,2018-01-01 Indian economy is undergoing structural changes The share of agriculture and allied activities in GDP has declined over the years On farm Jobs are diminishing or stagnant There is a need to generate off farm jobs through secondary and tertiary processing of agriculture crop horticulture animal husbandry fisheries forest produce raw material and these are not increasing to keep pace with the needs despite potential In India more than 75% of agro processing is done by informal and small enterprises But most informal and small unit suffer from market and technology constraints Therefore they cannot go for higher value addition from the main products and from the by products These informal and small enterprises are not in a position to create an

integrated value chain which can have links with the farmers As technology is outmoded these units are not in a position to give quality assurance and meet food safety standards Their products are marketed only in less demanding nearby local markets World over there is transition from informal and small agro industrial enterprises to large units which are competitive in terms of price and quality equitable not exploiting any member of value chain and inclusive treating farmers as strategic business partners rather than adversaries They use latest and innovative technology and have national and international markets for selling their products They enjoy scale economies are able to comply with national and international standards of quality assurance and go for higher level of value addition They can forge linkages with the farmers through contract farming and direct procurement and assure their raw material supply by treating the farmers as strategic business partners But these enterprises require the enabling conditions which make it possible to run the enterprises profitably along with transformation of rural areas Over the years the Government of India and nearly all the State Governments have now created most attractive enabling environment Therefore in our assessment India is poised for a great leap in investments in food processing and marketing The book contains 18 chapters dealing with the entire project cycle of agro industries for sustainable rural transformation The most insightful part is the 12 real life case studies The book would be useful to agro entrepreneurs agro processing industries policy makers bankers management consultants students of agriculture universities cooperative management training institutions and MBA students

Cost-Benefit Analysis P. Richard G. Layard, Richard Layard, Stephen Glaister, 1994-06-30 Covering all the main problems that arise in a typical cost benefit exercise this second edition reflects the most recent research in the area It considers the main theoretical issues the problem of ascribing a monetary value to things and includes six separate case studies

Project Management in the Oil and Gas Industry Mohamed A. El-Reedy, 2016-02-09 Oil and gas projects have special characteristics that need a different technique in project management The development of any country depends on the development of the energy reserve through investing in oil and gas projects through onshore and offshore exploration drilling and increasing facility capacities Therefore these projects need a sort of management match with their characteristics and project management is the main tool to achieving a successful project Written by a veteran project manager who has specialized in oil and gas projects for years this book focuses on using practical tools and methods that are widely and successfully used in project management for oil and gas projects Most engineers study all subjects but focus on project management in housing projects administration projects and commercial buildings or other similar projects However oil and gas projects have their own requirements and characteristics in management from the owners engineering offices and contractors side Not only useful to graduating engineers new hires and students this volume is also an invaluable addition to any veteran project manager's library as a reference or a helpful go to guide Also meant to be a refresher for practicing engineers it covers all of the project management subjects from an industrial point of view specifically for petroleum projects making it the perfect desktop

manual Not just for project managers and students this book is helpful to any engineering discipline or staff in sharing or applying the work of a petroleum project and is a must have for anyone working in this industry *Investment Project Design* Lech Kurowski, David Sussman, 2011-04-05 Make more informed project investment decisions by knowing what issues to examine in the planning process and how to analyze their impacts Poor or insufficient planning is primarily responsible for the inordinate number of idle and rusting capital facilities around the world with investment decisions often made on the basis of either intuition or inadequate analysis *Investment Project Design A Guide to Financial and Economic Analysis with Constraints* alerts potential investors and other stakeholders to precipitous changes in the investment milieu as a result of constraints on resources and infrastructure economic and political turmoil and population growth The guide Includes descriptions of specific methods of financial and economic analysis for new investments and for expansion of an existing enterprise Covers project risk assessment mitigation and avoidance Provides real life case studies adapted for presentation and addresses the design of projects large and small as well as those in both private and public sectors Features spreadsheet layouts and computations *Investment Project Design* is the ultimate resource in the methods of designing and appraising investment projects
