Economic Development In New Zealand The Dynamics Of Economic Space:

Dynamics of Economic Spaces in the Global Knowledge-based Economy Sam Park, 2014-09-19 This book addresses how economic spaces dynamically change within the context of the global knowledge based economy Specifically it centers the discussion on integrated views of understanding and conceptualizing dynamic changes of global economy under the global megatrends of globalization knowledge based economy information society service world climate change and population aging Focusing on East Asia especially on Korea it deals with case studies regarding the processes and patterns of these global dynamics looking at economic spaces of various spatial scales and types of economic actors This book develops a theoretical model for understanding and analysing the dynamics of economic spaces that are being reshaped within the larger global economy It also emphasizes the analysis of empirical studies at the level of firm region and state by considering an evolutionary perspective over time In developing its theoretical framework this book examines regional resilience intangible assets service innovation path dependence and other notions related to the evolution of economic spaces and incorporates these elements into real world case studies The integrated theoretical framework examined here contributes a new perspective on spatial disparities in the global economy An integral model of service innovation the integration of path dependence and regional resilience the interaction between firm and region for the accumulation of intangible assets and the roles of governments and global firms these are all essential to understanding the dynamics of economic spaces in East Asia The theoretical model and case studies in this book suggest policy implications for developing countries especially in the Asian and African regions with regard to regional development and innovation policies **Missing Links in Labour**

Geography Ann Cecilie Bergene, Dr Sylvi B Endresen, Professor Hege Merete Knutsen, 2012-11-28 Addressing a number of missing links in the analysis of labour and its geographies this volume examines how theoretical perspectives on both labour in general and the organizations of the labour movement in particular can be refined and redefined Issues of agency power and collective mobilizations are examined and illustrated via a wide range of case studies from the global north and global south in order to develop a better and fuller appreciation of labour market processes in developed and developing countries

Innovative Behaviour in Space and Time Cristoforo S. Bertuglia, Silvana Lombardo, Peter Nijkamp, 2012-12-06 In the past decade there has been growing recognition that economic development is not mainly exogenously determined but to a large extent is a transformation process induced and governed by economic actors who respond to competitive institutional and political challenge This challenge and response model is increasingly accepted as a valid analytical framework in modern growth theory and also explains the popularity of endogenous growth approaches to technological innovation issues However a major and as yet largely under researched topic is the question of the diffusion and adoption of new technological changes in the context of space time dynamics This diffusion and adoption pattern has obviously clear spatial and temporal variations connected with behavioural responses which may vary over time and different locations This means that a closer analysis of

spatio temporal opportunities and impediments is necessary in order to fully map the complex interactions of technology and economy in space and time This volume sets out to bring together a collection of original contributions commissioned by the editors to highlight the spatio temporal patterns and backgrounds of the diffusion and adoption of new technologies Some are in the nature of a survey others have a modelling background and again others are case studies The contributions originate from different countries and different disciplines This book is complementary to a previously published volume on technological innovation Technological Change Economic Development and Space edited by C S Bertuglia M M Fischer and G Preto and also published by Springer Verlag 1995 **Library of Congress Subject Headings** Library of Congress,1991

Crooks, 2008-11-12 Biological invasions are considered to be one of the greatest threats to the integrity of most ecosystems on earth This volume explores the current state of marine bioinvasions which have been growing at an exponential rate over recent decades Focusing on the ecological aspects of biological invasions it elucidates the different stages of an invasion process starting with uptake and transport through inoculation establishment and finally integration into new ecosystems Basic ecological concepts all in the context of bioinvasions are covered such as propagule pressure species interactions phenotypic plasticity and the importance of biodiversity The authors approach bioinvasions as hazards to the integrity of natural communities but also as a tool for better understanding fundamental ecological processes Important aspects of managing marine bioinvasions are also discussed as are many informative case studies from around the world **Coworking Spaces** Janet Merkel, Dimitris Pettas, Vasilis Avdikos, 2023-11-07 This contributed volume considers the emergence of coworking as centered in labor issues More specifically its chapters consider it as a coping mechanism in the worldwide rise of independent modes of work i.e. self employment that leaves more and more workers exposed to precarity as they must organize and manage their own labor Grounded in this perspective this volume aims to understand the transformative social and political potentials emerging through coworking as a social and spatial practice There is a distinct lack of discussion within coworking research on the emancipatory potentials of coworking and if it is discussed more cautionary views prevail highlighting the ambivalence of coworking spaces both as a space of alternative economic practices and as integrated into market economies The aims of this collection are twofold First it aims to make visible the plurality of existing practices around shared resources in coworking and the assemblages of human and non human actors as agents of change associated with coworking and the re organization of work and labor power And second it aims to develop a more emancipatory narrative for coworking and the role of coworking spaces for workers but also the different spatial contexts in which these spaces are situated A narrative that does

not emphasize entrepreneurship or coworking as the epitome of the neoliberal entrepreneurial self as in the dominant interpretations in the current research but rather one that centers coworking in the creation of meaningful careful social relationships supporting empathy and an ethics that recognizes mutual interdependencies and builds a foundation for social change So it is about alternative narratives emancipation politics and the wider social role that coworking spaces might play in neighborhoods cities or beyond because they are crucial contexts for the formation and maintenance of social relations With this specific direction this collection aims to bring coworking research into a fruitful dialog with other research fields such as sociology of work feminist perspectives on care alternative and diverse economies post capitalist transformation critical geography positioning coworking within a range of progressive alternatives in the articulation of economic and social relationships
