these spaces are increasingly neglected by economic agents The editors have identified a gap in current research because there is not enough empirical evidence about these places as well as about the role of their actors Abandoning regions can lead to for example pollution uncontrolled forest fires vandalism heritage deterioration and potentially untreated industrial facilities carrying potential costs not only in environmental sustainability but also in values such as landscape aesthetics Thus this book reflects on the dimensions of the identification of such Forgotten Spaces on the design of policies focused on minimizing associated costs and on the scope of programs to promote these areas not only for upgrading them but also for promoting their environmental sustainability The comparative approach of the empirical part also allows knowledge and experience from diverse longitudes and latitudes The editors highlight the richness of the experience of Latin American countries the polarization and interesting experiences from several sector rediscovered in Europe as well as the holistic cases coming from several African experiences This book will attract the attention of academicians politicians and ultimately the attention of all decision makers who most likely are forgetting many of the Spaces around them

**Innovative Start-Ups and the Distribution of Human Capital** Ronney Aamoucke,2016-09-14 This book contributes to our understanding of the reasons for the uneven geographic emergence and distribution of innovative start ups and human capital analyzing the role of the regional knowledge base and specifically academic knowledge Using extensive datasets from West German regions and advanced econometric tools it confirms a strong relationship between the presence of higher education institutions and the emergence of innovative start ups It also shows that the influence increases in direct relation with the innovativeness of the respective start up and that certain fields of knowledge are more influential than others in fostering innovative start ups In a second step the multidimensional concept of quality of life is used to explain the geography of human capital across West German regions Based on these empirical findings the book shares valuable insights for higher education and regional development policy

**A Behavioural Theory of Economic Development** Robert Huggins,Piers Thompson,2021-01-14 Innovation entrepreneurship knowledge and human capital are widely acknowledged as key levers of development Yet what are the sources of these factors and why do they differ in their endowment across regions Motivated by a belief that theories of economic development can move beyond the generally accepted explanations of location and the organization of industries and capital this book establishes a behavioural theory of

economic development illustrating that differences in human behaviour across cities and regions are a significant deep rooted cause of uneven development Fusing a range of concepts relating to culture psychology human agency institutions and power it proposes that the long term differentials in economic development between cities and regions both within and across nations is strongly connected to the underlying forms of behaviour enacted by humans on an individual and collective basis Given a world of finite and limited resources coupled with a rapidly growing population especially in cities and urban regions human behaviour and the expectations and preferences upon which it is based are central to understanding how notions of development may change in coming years This book provides a novel theory of the role of psychocultural context and human behavioural and institutional frameworks in uneven economic development on a global scale Community, Economic Creativity, and Organization Ash Amin, Joanne Roberts, 2008-09-25 Communities of practice like social capital and networks is an idea that has been widely adopted in the social sciences particularly in discussion of innovation and creativity This book evaluates the concept and its uses and will be an essential guide for students and researchers
