This Handbook presents in-depth research conducted on a myriad of issues within the field of financial literacy. Split into six sections, it starts by presenting prevalent conceptions of financial literacy, before covering financial literacy in the policy context, the state and development of financial literacy within different countries, issues of assessment and evaluation of financial literacy, approaches to teaching financial literacy, and teacher training and teacher education in financial literacy. In doing so, it provides precise definitions of the construct of financial literacy and elaborates on the state and recent developments of financial literacy around the world to show ways of measuring and fostering financial literacy and to give hints towards necessary and successful teacher trainings.
