globalization world order culture the state information technology economics production development and Bretton Woods Institutions from the perspective of four diverse sociological paradigms functionalist interpretive radical humanist and radical structuralist This multi perspective approach forces readers to abandon their preconceived assumptions and allows them the opportunity to view globalization through new eyes Kavous Ardalan argues that social theory can usefully be conceived in terms of these four key paradigms because each one is founded upon different assumptions about the nature of social science and each one generates useful theories concepts and analytical tools This method facilitates distancing from one's favored paradigm and appreciating other available approaches to better understand social phenomena The knowledge of paradigms increases awareness of the boundaries and limitations of each individual paradigm While most books on the topic focus on particular aspects of globalization from specific viewpoints this fair and unbiased volume provides readers with a balanced understanding of globalization The United States Catalog Mary Burnham, Carol Hurd, 1928 Catalogue University of Wisconsin, 1921 Some nos include Announcement of courses **Economic Growth** Tai-Yoo Kim, Almas Heshmati, 2013-11-29 This book shows that the existing theories on economic growth have clear limitations in terms of how much they can effectively contribute to actual economic growth Therefore this book presents a more effective theory on economic growth for countries and leaders looking to promote economic growth It is essentially centered around the theory of economic growth and theory of national development written for agricultural developing countries pursuing industrialization and late starting industrialized countries pursuing their own development Nevertheless it also makes a significant contribution to the very development of human civilization through the growth of developing countries late starting industrialized countries and early industrialized countries throughout the world **Technical Education Program Series** United States.
