Challenges in Volunteer Management Matthew Liao-Troth, 2008-09-01 Volunteer management has many challenges not the least of which is how we study it and view it Academics examine it from a variety of disciplines and practitioners experience it in a variety of contexts However both approaches have limitations In academia we go to public administration schools to learn about public and nonprofit management to business schools to apply the principles of private enterprise to nonprofit management to sociology departments to study the phenomena of volunteerism to psychology

departments to understand the motives of volunteers and economics departments to examine the value or economic worth of volunteerism The liability of the academic approach is the segmentation of study and research into departmental areas The study of volunteers and volunteerism needs to cross all of these organizational and discipline boundaries to be fully appreciated and understood as a field of interest In contrast practitioners view volunteer management from their own unique experiences They try to gauge success in volunteer management based on what they have encountered in particular organizations towns cultures and countries in which they work As important as these insights are they are difficult to generalize beyond local settings Just because an individual has been successful in working with volunteers it does not mean that the lessons learned in one situation can be translated to others under all conditions The target audience for this volume is anyone who manages volunteers The goal of the volume is to demonstrate the breadth of thought on volunteer management both across disciplines and a wide range of settings in which volunteers work
