Effectivity Functions In Social Choice:

Effectivity Functions in Social Choice J. Abdou, Hans Keiding, 2012-12-06 The present book treats a highly specialized topic namely effectivity functions which are a tool for describing the power structure implicit in social choice situations of various kind One of the advantages of effectivity functions is that they seem to contain exactly the information which is needed in several problems of implementation that is in designing the rules for individual behaviour given that this behaviour at equilibrium should result in a prescribed functional connection between preferences and outcome We shall be interested in both formal properties of effectivity functions and applications of them in social choice theory and among such applications in particular the implementation problem This choice of emphasis necessarily means that some other topics are treated only superficially or not at all We do not attempt to cover all contributions to the field rather we try to put some of the results together in order to get a reasonably coherent theory about the role of the power structure in cooperative implementation The authors are indebted to many persons for assistance and advice during the work on this book In particular we would like to thank Peter Fristrup and Bodil Hansen for critical reading of the manuscript and Lene Petersen for typesetting in LEX

Rights and Decisions Martin V.B.P.M. van Hees, 2013-03-14 The game theoretic analysis of rights forms a rapidly growing field of study to which this book makes an important contribution Van Hees combines the game theoretic approach with the results and tools from logic in particular from the logic of norms The resulting synthesis between logic and game theory provides a firm foundation for the game theoretic approach The analysis shows how different types of right are related to the strategic opportunities of individuals and of groups of individuals Furthermore the book makes an important contribution to the theory of liberalism in particular

to the study of the so called liberal paradoxes It demonstrates how the paradoxes resurface in the new decision theoretic framework In fact they not only do so at the level of ordinary decision making but also at the level of constitutional decision making Ethics, Rationality, and Economic Behaviour Francesco Farina, Frank Hahn, Stefano Vannucci, 1996 The connection between economics and ethics is as old as economics itself and central to both disciplines The essays included in the present volume provide an analysis of the connections between ethics and economics as viewed from several different oft

Social Networks and Trust Vincent Buskens, 2005-12-27 Social Networks and Trust discusses two possible explanations for the emergence of trust via social networks If network members can sanction untrustworthiness of actors these actors may refrain from acting in an untrustworthy manner Moreover if actors are informed regularly about trustworthy behavior of others trust will grow among these actors A unique combination of formal model building and empirical methodology is used to derive and test hypotheses about the effects of networks on trust The models combine elements from game theory which is mainly used in economics and social network analysis which is mainly used in sociology The hypotheses are tested 1 by analyzing contracts in information technology transactions from a survey on small and medium sized enterprises and 2 by studying judgments of subjects in a vignette experiment related to hypothetical transactions with a used car dealer

Freedom and Happiness in Economic Thought and Philosophy Ragip Ege, Herrade Igersheim, 2012-04-27 Starting from a distinction made by the American philosopher John Rawls in 2000 between two kinds of liberalism liberalism of freedom and liberalism of happiness this book presents a range of articles by economists and philosophers debating the most fundamental aspects of the subject These include the exact significance of Rawls distinction and how it can be related to European political philosophy on the one hand and to utilitarianism on the other hand the various definitions of happiness and freedom and their implications and the informational basis of individual preferences The objectives of the book are twofold first it is devoted to a thorough analysis of the founding texts of both liberalisms It aims to determine the logic of selection of the concepts which these traditions consider as relevant The Kantian pair Reasonable Rational can be seen as the basis on which these concepts are defined our final concern being to reveal the profound relations of complementarity between them we call it reconciliation Secondly we consider a fundamental issue of welfare economics how to appraise individual preferences in light of the Rawlsian distinction It is emphasized that neither a

criterion based on liberalism of freedom by itself nor an evaluation in terms of liberalism of happiness by itself exhausts the question of utility One must combine both aspects in order to cope with that issue To do so it is claimed that one can resort to the concept of metaranking of preferences All the contributions included in this book are the outcomes of a collective research project of three years The contributors come from a variety of backgrounds and yet are unified in developing a specific position about freedom and happiness This book should be of interest to those focusing on the history of economic thought as well as moral political and economic philosophy
