The Expression of Emotions in Ancient Egypt and Mesopotamia Shih-Wei Hsu, Jaume Llop Raduà, 2020-11-04. The volume

The Expression of Emotions in Ancient Egypt and Mesopotamia offers an overview of the study of emotions in ancient texts, discusses the concept of emotions in

Ancient Egypt and Mesopotamia, and shows how emotions are described in the ancient texts. In the section dedicated to

Ancient Egypt, scholars discuss emotions such as fear, depression, anger, feelings of pain, envy, jealousy, and greed, with

evidence from different text genres as well as emotions from the Late Ramesside Letters and royal inscriptions. In the section

dedicated to Ancient Mesopotamia, scholars present a wide range of perspectives on Sumerian and Akkadian literary and

archival texts that treat emotions in different periods.

Egypt and Mesopotamia R. J. Unstead, 1977.

From Egypt to Mesopotamia Samuel Mark, 1998. The possible influence of the ancient Mesopotamia cultures on the development of Ancient

Egypt has been the subject of archaeological debate for most of this century. Whilst the fact that there was contact between

the two regions has now largely been accepted, the means by which that contact occurred has been neglected.

The Mathematics of Egypt, Mesopotamia, China, India, and Islam Victor J. Katz, Annette Imhausen, 2007-08-05. In recent decades

it has become obvious that mathematics has always been a worldwide activity. But this is the first book to provide a

substantial collection of English translations of key mathematical texts from the five most important ancient and medieval

non-Western mathematical cultures and to put them into full historical and mathematical context. The Mathematics of Egypt,

Mesopotamia, China, India, and Islam gives English readers a firsthand understanding and appreciation of these cultures'

important contributions to world mathematics. The five section authors: Annette Imhausen (Egypt), Eleanor Robson

(Mesopotamia), Joseph Dauben (China), Kim Plofker (India), and J. Lennart Berggren (Islam), are experts in their fields. Each author

has selected key texts and, in many cases, provided new translations. The authors have also written substantial section

introductions that give an overview of each mathematical culture and explanatory notes that put each selection into context.

This authoritative commentary allows readers to understand the sometimes unfamiliar mathematics of these civilizations and

the purpose and significance of each text. Addressing a critical gap in the mathematics literature in English, this book is an

essential resource for anyone with at least an undergraduate degree in mathematics who wants to learn about non-Western

mathematical developments and how they helped shape and enrich world mathematics The book is also an indispensable guide for mathematics teachers who want to use non Western mathematical ideas in the classroom *Early Civilizations*

Birth of the State readers learn what researchers nowadays think about the rise and stabilization of the oldest statehood in the original civilization centres of the Old World Egypt Mesopotamia India and China The scholar takes them through essential economic political and spiritual changes caused in those societies by the rise and stabilization of the first states The overviews are completed with a comprehensive view of the entire theme attempting to provide a balanced view of the rise of the oldest states not only as a question of economy politics or power but also as exceeding the basic threshold in the spiritual sphere The book allows the very founders and cultivators of the oldest state units to speak in the moments when their work seemed to be on the verge of total collapse they spoke to their contemporaries urging them to defend the ideals that formed the basis of their civilizations The book is intended for university students as well as others interested in the rise and development of the oldest states of the humankind **Beliefs, Rituals, and Symbols of Ancient Egypt, Mesopotamia,**

During the last hundred years scholarship has revealed the existence of two other eastern literatures which are not only as old as that of the Hebrews but very much older namely those of Egypt and Babylonia Although much of Babylonian literature is known to us mainly from the Assyrian versions found in Assurbanipal's library recent discoveries have shown that many of its best epic and lyric productions go back at least two thousand years further and have their roots in the Sumerian civilization In Egypt too religious literature is found in a highly developed state as early as the Pyramid Texts which in the form in which we have them are as old as 2500 B C and possibly go back in part to much earlier originals These discoveries make it no longer possible to regard the literature of the Hebrews as an isolated phenomenon in the ancient East and they furnish a host of new criteria which must be applied to any attempt to explain and to appraise the Old Testament from the Preface
