*Itinerant Kingship and Royal Monasteries in Early Medieval Germany, C.936-1075* John W. Bernhardt, 2002-08-22 In examining the relationship between the royal monasteries in tenth and eleventh century Germany and the German monarchs this book assimilates a great deal of European scholarship on a central problem that of the realities and structures of power It focuses on the practical aspects of governing without a capital and while constantly in motion and on the payments and services which monasteries provided to the king and which in turn supported the king's travel economically and politically Royal monastic relations are investigated in the context of the itinerant kingship of the period to determine how this relationship functioned in practice It emerges that German rulers did in fact make much greater use of their royal monasteries than has hitherto been recognised **Journal of the Royal Asiatic Society of Great Britain and Ireland** Royal Asiatic Society of Great Britain and Ireland, 1921 **Bulletin of the New York Public Library** New York Public Library, 1914 Includes its Report 1896 1945 **Journal of the Royal Statistical Society** Royal Statistical Society (Great Britain), 1909 Published papers whose appeal lies in their subject matter rather than their technical statistical contents Medical social educational legal demographic and governmental issues are of particular concern J. comprehensive study in any language of the development of secondary schools for girls in the various German states during the nineteenth century and of the struggles waged by women after 1865 to gain access to higher education and the liberal professions Through comparisons with contemporaneous developments in other European countries he points out what was typical and what unique in the German experience in such areas as the operation and curricula of girls schools the opportunities for women teachers the debates over increased educational and employment opportunities for women and the strategies and tactics adopted by feminist organizations The work is based on a wide variety of published sources and on the previously unexplored archives of the Prussian Ministry of Education Topics discussed include the divisions between feminists interested in separate educational institutions for women and those wanting coeducational study at both the secondary and the university levels and the impact of feminists on the major educational reforms introduced in Prussia and other German states between 1900 and 1910 Acknowledging that German women gained the right to matriculate at domestic universities later than did their sisters in most other European countries the author suggests that an examination of the entire spectrum of educational and employment opportunities for women reveals no discernable German Sonderweg or special path of modernization in this area Originally published in 1989 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **A catalogue**
