**Economic Science Fictions** William Davies, 2018-05-11 An innovative new anthology exploring how science fiction can motivate new approaches to economics From the libertarian economics of Ayn Rand to Aldous Huxley's consumerist dystopias economics and science fiction have often orbited each other In *Economic Science Fictions* editor William Davies has deliberately merged the two worlds asking how we might harness the power of the utopian imagination to revitalize economic thinking Rooted in the sense that our current economic reality is no longer credible or viable this collection treats our economy as a series of fictions and science fiction as a means of anticipating different economic futures It asks how science fiction can motivate new approaches to economics and provides surprising new syntheses merging social science with fiction design with politics scholarship with experimental forms With an opening chapter from Ha Joon Chang as well as theory short stories and reflections on design this book from Goldsmiths Press challenges and changes the notion that economics and science fiction are worlds apart The result is a wealth of fresh and unusual perspectives for anyone who believes the economy is too important to be left solely to economists Contributors AUDINT Khairani Barokka Carina Brand Ha Joon Chang Miriam Cherry William Davies Mark Fisher Dan Gavshon Brady and James Pockson Owen Hatherley Laura Horn Tim Jackson Mark Johnson Bastien Kerspern Nora O Murch Tobias Revell et al Judy Thorne Sherryl Vint Joseph Walton Brian Willems

*Geography of Horror* Marko Lukić, 2022-04-27 This book provides a comprehensive reading of a space place based experience from the birth of the American horror genre nineteenth century American Romanticism to its rise and evolution in the twentieth and twenty first centuries Exploring a series of narratives this study focuses on the role of space and place as key elements for successful articulation of horror The analysis therefore employs different theoretical premises and concepts belonging to human geography which while being part of the larger discipline of geography predominantly directs its attention towards the presence and activities of humans By connecting such theoretical readings with the continuously evolving American horror genre this book offers a unique insight into the academically unexplored trans disciplinary spatially based reading of the genre

referen **A/moral Economics** Claudia C. Klaver, 2003 A Moral Economics is an interdisciplinary historical study that examines the ways which social science of economics emerged through the discourse of the literary namely the dominant moral and fictional narrative genres of early and mid Victorian England In particular this book argues that the classical economic theory of early nineteenth century England gained its broad cultural authority not directly through the well known texts of such canonical economic theorists as David Ricardo but indirectly through the narratives constructed by Ricardo s popularizers John Ramsey McCulloch and Harriet Martineau By reexamining the rhetorical and institutional contexts of classical political economy in the nineteenth century A Moral Economics repositions the popular writings of both supporters and detractors of political economy as central to early political economists bids for a cultural voice The now marginalized economic writings of McCulloch Martineau Henry Mayhew and John Ruskin as well as the texts of Charles Dickens and J S Mill must be read as constituting in part the entities they have been read as merely criticizing It is this repressed moral logic that resurfaces in a range of textual contradictions not only in the writings of Ricardo s supporters but ironically in those of his critics as well *The Economic Report of the President* United States. **Relationship of Prices to Economic Stability and Growth** United States. Congress. Joint Economic Committee, 1958 Includes first report of the British Council on Prices Productivity and Income 1958 p 163 241 **Review of the United States Economic Embargo Against Nicaragua and Humanitarian Exports** United States. Congress. House. Committee on Foreign Affairs. Subcommittee on International Economic Policy and Trade, 1988 Handbook of the History of Economic Thought Jürgen Backhaus, 2011-11-12 This reader in the history of economic thought challenges the assumption that today s prevailing economic theories are always the most appropriate ones As Leland Yeager has pointed out unlike the scientists of the natural sciences economists provide their ideas largely to politicians and political appointees who have rather different incentives that might prevent them from choosing the best economic theory In this book the life and work of each of the founders of economics is examined by the best available expert on that founding figure These contributors present rather novel and certainly not mainstream interpretations of the founders of modern economics The primary theme concerns the development of economic thought as this emerged in the various continental traditions including the Islamic tradition These continental traditions differed substantially both substantively and methodologically from the Anglo Saxon orientation that has been dominant in the last century for example in the study of public finance or the very construct of the state itself This books maps the various channels of continental economics particularly from the late 18th through the early 20th centuries explaining and demonstrating the underlying unity amid the surface diversity In particular the book emphasizes the writings of John Stuart Mill his predecessor David Ricardo and his follower Jeremy Bentham the theory of Marginalism by von Th nen Cournot and Gossen the legacy of Karl Marx the innovations in developmental economics by Friedrich List the economic and monetary contributions and struggle of escape by John Maynard Keynes the formidable theory in public finance and

economics by Joseph Schumpeter a reinterpretation of Alfred Marshall L on Walras Heinrich von Stackelberg Knut Wicksell Werner Sombart and Friedrich August von Hayek are each dealt with in their own right **The 1975 Economic Report of the President** United States. Congress. Joint Economic Committee,1975 *The Economics of Biodiversity* Partha Dasgupta,2024-07-11 Explains the current state of play in relation to biodiversity loss and explores a sustainable path for the future **Adam Smith's Sociological Economics** David Alexander Reisman,2014-06-03 First published in 1976 this book provides an interdisciplinary study of the thoughts of Adam Smith showing in particular how the link between economic basis and social superstructure was central to his work The work is split into six sections dividing Smith's views along the following lines: methodology, conduct and character, consumer behaviour, the upper classes, the lower classes and finally the State **Logic of political economy** Thomas De Quincey,1863 *The Relationship of Prices to Economic Stability and Growth* United States. Congress. Joint Economic Committee,1958 *Contributions to the History of Economic Thought* Renee; Murphy Prendergast,2000 Featuring original contributions from some of the leading contemporary figures in the history of economic thought this book offers new perspectives on key topics from Smith's *Wealth of Nations* to the Jevonian Revolution Drawing inspiration from the life and work of R D C Black formerly Professor of Economics at Queen's University Belfast this book will be of essential interest to any serious scholar of economic thought *Reading, Wanting, and Broken Economics* Simon R. Frost,2021-05-01 Uses a historical study of bookselling and readers as a way to question and rethink our understanding of the market for symbolic goods Combining historical study, theorization and experimental fiction this book takes commodity culture and book retail around 1900 as the prime example of a market of symbolic goods With the port of Southampton, England as his case study Simon R Frost reveals how the city's bookshops, with their combinations of libraries, haberdashery, stationery and books, sustained and were sustained by the dreams of ordinary readers and how together they created the values powering this market The goods in this market were symbolic and were not consumed but read Their readings were created between other readers and texts in happy disobedience to the neoliberal laws of the free market Today such reader-created social markets comprise much of the world's branded economies which is why Frost calls for a new understanding of both literary and market values *Hearings, Reports and Prints of the Joint Economic Committee* United States. Congress. Joint Economic Committee,1975
