Economic Theories of Exhaustible Resources T. J. C. Robinson, 2017-10-18 Originally published in 1989 Professor Robinson begins by examining natural resource classification and the nature of return in mining giving particular emphasis to different sources of long run price changes in mining and their relevance for user cost and the economic treatment for exhaustible resources He then traces the development of the economic theory of exhaustible resources from the last quarter of the eighteenth century to the first quarter of the twentieth documenting the differing views of various authors about the future availability of mineral resources and the extent of user cost involved in their exploitation He identifies a link between the perceived availability of exhaustible resources and the nature of the economic theory used to explain their exploitation This book should be of interest to students and researchers of Economic Theory and Policy **The**

Economic Theory and International Trade in Natural Exhaustible Resources Cees Withagen, 2012-12-06 This study is concerned with the economic theory of exhaustible resources My interest in exhaustible resources dates back several years when prof dr J Cramer and prof dr C von Weizsacker stimulated me to direct my research at the Faculty of Actuarial Science and Econometrics of the University of Amsterdam to the exploitation of Dutch natural gas This issue raised many theoretical problems in which I got gradually more and more involved I was lucky to find in prof dr H Weddepohl a person prepared to listen patiently and to read and criticize my numerous attempts to solve these problems The actual work on the present monograph started in 1982 at the Faculty of Philosophy and Social Sciences of the Eindhoven University of Technology in the context of the program Equilibrium and Disequilibrium of the voorwaardelijke financiering university financing system I wish to thank here my supervisors prof dr P Ruys and prof dr H Weddepohl for their comments on earlier drafts of this monograph When looking back I realize that their remarks and our discussions have led to notable improvements Also the International Institute for Applied Systems Analysis Laxenburg Austria has made a valuable contribution by offering me the opportunity to spend three months in its serene academic environment in the summer of 1983 Thanks also to the energy group of I I A S A and the I I A S A foundation Netherlands Economic Theory and Exhaustible Resources Partha Dasgupta, G. Shephard,2013-12-14 *Optimal Economic Growth with Exhaustible Resources* Prem C. Garg,2017-10-17 Originally published in 1979 For decades conservationists have argued that increasing population will eventually out strip the limited natural resources of the earth Economists have responded by saying that any resource scarcity will be forestalled by changes in tastes and technology induced by the appropriate price signals This study is an attempt to develop a theoretical framework for analysing some of the issues related to this debate Using an optimal growth theory framework the author analyses the problem of optimally allocating a finite stock of the resource over time In the process the author points out the crucial parameters and value judgments relevant to the various issues This title will be of interest to students of environmental economics **Economic Theory and Sustainable Development** Vincent Martinet,2012 This work examines the different ways in which the concepts of sustainability and sustainable development are interpreted in economics As well as the oft studied neoclassical take on matters the author develops new approaches that are less reliant on utilitarianism and discounting **Economic theory and international trade in natural exhaustible resources** Cornelius Antonius Adrianus Maria Withagen,1984 **A Reflection on Sraffa's Revolution in Economic Theory** Ajit Sinha,2021-06-02 This book presents a substantial collection of essays from a wide range of well respected scholars addressing several aspects of Piero Sraffa s economics in light of continuing controversies over the interpretation that should be placed on his work It moves beyond extant scholarship with an added emphasis on the philosophical dimension of Sraffa s seminal work *Production of Commodities by Means of Commodities* Contributors probe new ways of thinking about the political economy of Sraffa and in doing so alongside the comments to each contribution by other scholars provide a cutting edge debate and discussion on non mainstream economic theory This book will be of interest to academics and advanced graduate students in economics with additional interest from scholars in philosophy and the methodology of science Sustainable Resource Use and Economic Dynamics Lucas Bretschger,Sjak Smulders,2007-07-19 This volume includes a selection of papers presented at the conference Sustainable Resource Use and Economic Dynamics SURED held on Monte Verita in Ascona Switzerland in June 2004 Thirty years after the publication of the famous symposium issue of the

Review of Economic Studies in 1974 which started the neoclassical literature on growth theory and resource economics. The conference sought to reinforce research efforts in order to provide adequate solutions for today's challenges in the field of sustainable development. The conference compiled innovative research from resource energy and environmental economics and dynamic economic theory. By bringing together leading experts, junior and senior scholars in these fields, it covered a broad range of aspects regarding the relationship between natural resource use and long term economic development. The SURED conference made use of the wonderful surroundings on the mountain of truth and the remarkable history of the conference centre which was shaped by the desire to return to a natural way of life. In this tradition, the conference aimed at finding ways of living in an economically developed world and at the same time taking into account the natural environment with its restrictions and requirements. We take the opportunity to thank the staff of the Monte Verita centre for the hospitality and the excellent service.
