

APA REFERENCING GUIDE

Edith Cowan University uses APA (6th edition) referencing style in most of its courses unless otherwise stated in the unit plan. One exception is the Bachelor of Laws course. This guide has been developed to assist undergraduate students with using APA 6th referencing style and contains examples of the most commonly referenced materials. For more detail, please refer to our comprehensive online [Referencing Library Guide](#), where you will also find a link to the APA Style Central database.

If you are unsure that APA is the correct style to use for your work, please consult your unit plan or contact your lecturer or unit coordinator.

Why should I reference?

Referencing is an essential part of writing at university. It is necessary to reference the information sources you have used in your work to:

- acknowledge the work of other writers;
- enable other researchers to trace your sources;
- demonstrate the depth of your research; and
- support your arguments or opinions put forward in your work.

By acknowledging the work of others, you avoid **plagiarism**. Plagiarism is a form of academic misconduct and is taken very seriously at university and can lead to possible exclusion from a course. Plagiarism is where you either intentionally, or unintentionally, fail to acknowledge other writers' words, ideas, or concepts, and/or claim the words, ideas, and concepts as your own. However, the use of common knowledge in your discussion is not considered to be plagiarism (i.e. the sky is blue, or the chemical formula for water is H₂O).

What is APA Referencing?

APA is the referencing style set by the American Psychological Association, and has been adopted across the majority of courses at ECU. It is an **(author, date)** style of referencing that consists of two parts:

1. **In-text Citation** – a short reference (author, date) contained within the text of your assignment **AND**
2. **End-text Reference** – the full citation details of each in-text citation used in the text of your assignment.

In-text Citations

In-text citations include the details of the author/s (usually just the surname), and the year of publication in the **(author, date)** format. You must always include an in-text citation when you:

- **Quote** another author (word for word)
 - Note: you must also include a page number for direct quotes **(author, date, page number)**. For electronic sources where there is no page number, use the paragraph number or section heading.
- **Paraphrase, summarise or synthesise** another author's work in your own words
 - In-text citations, when paraphrasing, can take a number of forms, depending on how you choose to structure your sentence. For example,
 - Kessler (2014) found that among epidemiological samples . . .
 - Early onset results in a more persistent and severe course (Kessler, 2014) showed . . .
 - In 2014, Kessler's study of epidemiological samples showed that . . .
- **Support** your own work with another author's work (either to provide an example or to provide evidence for an argument).
