However it is widely believed that fashion didn't become an industry until the industrial and commercial revolution during the latter part of the 18th century. Since then the industry has grown exponentially. Today fashion is one of the biggest businesses in the world with hundreds of billions of dollars in turnover and employing tens of millions of workers. It is both a profession, an industry, and in the eyes of many, an art. The A to Z of the Fashion Industry examines the origins and history of this billion-dollar industry. This is done through a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced entries on designers, models, couture houses, significant articles of apparel and fabrics, trade unions, and the international trade organizations.
