Tibbetts,2013 The scientific method is one of the most basic and essential concepts across the sciences ensuring that investigations are carried out with precision and thoroughness This book teaches the basic modes of scientific thought not by philosophical generalizations but by illustrating in detail how great scientists from across the sciences solved problems using scientific reason **White Knight, Red Heat** John Gribbin,Mary Gribbin,2023-06-20 President Franklin Delano Roosevelt said that Thomas Jefferson Benjamin Franklin and Count Rumford are the greatest minds that America has produced and indeed Rumford was a peer of theirs and arguably contributed more to the scientific canon and yet is nowhere near as well known Born in the British Americas as Benjamin Thompson he died a count and a knight and lived a fascinating eventful life in between founding the Royal Institution in London inventing a better chimney still in widespread use for open fires finding time along the way to invent the coffee percolator and the enclosed oven and most importantly pioneering our modern understanding of heat *White Knight Red Heat* tells the story of this notable figure in book form for the first time in over twenty years Sir Benjamin Thompson Count von Rumford was an American born British physicist government administrator and a founder of the Royal Institution of Great Britain London His investigations of heat overturned the theory that heat is a liquid form of matter and established the beginnings of the modern theory that heat is a form of motion Loyal to the British crown he served as a spy after the outbreak of the American Revolution but in 1776 he was forced to flee to London leaving his wife and daughter behind Knighted by King George III in 1784 Thompson introduced numerous social reforms and brought James Watt s steam engine into common use He was created a Count of the Holy

Roman Empire in 1791 Interest in gunpowder and weaponry stimulated his physical investigations and in 1798 he began his studies of heat and friction making one of the earliest measurements of the equivalence of heat and mechanical energy

Policing the Media David D. Perlmutter, 2000-02-10 Policing the Media is an investigation into one of the paradoxes of the mass mediated age Issues events and people that we see most on our television screens are often those that we understand the least David Perlmutter examined this issue as it relates to one of the most frequently portrayed groups of people on television police officers Policing the Media is a report on the ethnography of a police department derived from the author's experience riding on patrol with officers and joining the department as a reserve policeman Drawing upon interviews personal observations and the author's black and white photographs of cops and the clients Perlmutter describes the lives and philosophies of street patrol officers He finds that cops hold ambiguous attitudes toward their television comrades for much of TV copland is fantastic and preposterous Even those programs that boast gritty realism little resemble actual police work Moreover the officers perceive that the public's attitudes toward law enforcement and crime are directly and largely nefariously influenced by mass media This in turn he suggests influences the way that they themselves behave and perform on the street and that unreal and surreal expectations of them are propagated by television cop shows This cycle of perceptual influence may itself profoundly impact the contemporary criminal justice system on the street in the courts and in the hearts and minds of ordinary people
